Just throwing my 2 cents in on this whole deal about closing down the dunes. You are ruining lots of families lives by going ahead with this. There is a lot of tradition that has been around the dunes.

Can you guys get another 3rd party person to retest the silica that is said to be flying and causing humans lung cancer?

Please rethink about the impact you will cause to families and local businesses. I can't see any good coming from closing down the dunes.

Thank you for your time.
