Subject: [EXT]Input Comments for APCD Hearing Board Meeting 10-14-22

ATTENTION: This email originated from outside the County's network. Use caution when opening attachments or links.

Greetings APCD Board,

Let's face it, the OHVSVRA is one big sandbox, where off-road vehicles are allowed to tear up the dunes as a form of their entertainment and recreation. While most of the dune riders do not live in the area, we who do must, live and breathe this unhealthful air that this "entertainment" creates.

My husband and I are ten year residents on the Nipomo Mesa. We live everyday with the specter of unhealthful air blowing into our development. We firmly reject State Parks' effort to reduce the compliance target from 50% down to 40.7%. If this were second hand smoke, would you accept inhaling 10.3% additional harmful particles into your lungs than required? In our view, State Parks should be bending over backwards to show that they truly want to comply and cleanup the source of our polluted air.

Thank you for your consideration of our comments.

Sincerely,
Marcia & Dale Johnson
