APCD Board,

Once again I am writing to ask you to please require the State Parks to complete the remediation of the dunes as originally directed. They have not adhered to the plan, schedule or directives ever! Those of us who live in the path of the silica sand with respiratory distress continue to suffer and incur cardiac problems. I have been diagnosed with an EKG abnormality since moving here.

All we are asking for is to make State Parks do what they were told to do.

Thank you for your efforts on our behalf.

Louise and Jim Easton
