Subject: RE: Deal between State Parks and San Luis Obispo Air Pollution Control District
Date: Friday, March 16, 2018 10:41:37 PM

I have used Oceano Dunes SVRA many times. I look forward to bringing my 7 year old grand daughter there this summer. I am a resident of beautiful Hermosa Beach in Southern California and can certainly appreciate clean beach air and water. Please, before making any decision to close or limit vehicular access to Oceano Dunes SVRA, I ask you to first thoroughly investigate the validity of silica coming from the SVRA. Also what is the impact of the marine biological material from the ocean as a contributor to the air monitoring Data? What percentage of dust actually comes from the SVRA? Until these variables are researched the agreement between State Parks and San Luis Obispo APCD should not go forward. Our wonderful State Parks belong to all Californians. As a disabled senior citizen I can no longer do much hiking or pedestrian touring of our state parks and now rely on SVRA's for much of my recreation. I Trust you will exercise your due diligence on this important issue. Thank You, Ron Wloch, Hermosa Beach,CA
