---

Sherry/Dan;

I am sorry this happened to you.

Thanks for your letter to Alyssa. I am sure she will post it.

Dick

**Subject:** Clean Air for All in SLO

I urge all who have control over a citizen's right to clean air in San Luis Obispo county, specifically the SLO County Air Pollution Control District board members and California Department of Parks, to come to their senses.

My husband, Dan, and I have been attending the various clean air meetings and had the April 30 meeting on our calendar. However, we now have more immediate business that day.

After being cancer-free since 2009 and within two years of moving to the Nipomo Mesa area full time, he has been diagnosed with stage three lung cancer and will be getting a weekly chemotherapy infusion and daily radiation treatment instead that day.

Was the cancer caused by the particulates kicked into the air by the State Parks OHV area on the Oceano Dunes?

There is certainly enough science behind that reasoning. Even the American Lung Association is appalled that State and County authorities continue to allow the creation of a dangerous air plume.

Are all the people involved in allowing the continued recreation of breaking down the sand and throwing particulates into our air willing to be responsible for those at risk breathing this unhealthy concoction?

If so, know that you may be negotiating away the futures of your own friends and loved ones, and be prepared to live with that reality as it unfolds down the road.

Sherry Trade
