---

**Thank you Alyssa for posting my presentation statement for the APCD Hearing Board meeting 4/30/2018.**

**Stanley Fisher, Nipomo, CA**

**My name is Stanley Fisher, I will show you a very short 2 minute Video about my Disease -Idiopathic Pulmonary Fibrosis, IPF.**

**As a 12 year resident on the Nipomo Mesa I am a victim of the airborne micro pollution which causes Lung disease and kills lung cell. The disease in end-stage.**

**Today before you, the Hearing Board, are;**

**The **BLUE SHIRTS** representing 1.5 million people who come from the valley every year to pulverize the sand at Oceana dunes making powder. They create dangerous air pollution up to 100 day/year. **The worst air quality in California.** Remember they recreate, ride their ORV's upwind from the pollution they create. They don't breathe the dangerous polluted air being up-wind. Question, should their desire to play in the sand trump or override the rights of the population down-wind to breath clean air?**

**State Parks, they could care less about public health when it come to Oceana Dunes ORV recreation Park!**

**Nothing has been done to fix the Public Health problem for the last eight years. The 50% reduction is fine as a start and as suggested by the Hearing Board, the Bureaucratic State Parks proposed 5 year plan will lead to more lung disease and should be denied. Take 200 Acres now from the La Grande track and fix the problem in 6 months.**

**APCD Board with the current Three County Supervisors will always back business before they support public health and safety. Shameful**

**The **RED SHIRTS** know the hearing board are an APCD Independent Board. **You are our last hope for a breath of clean air to breathe on a daily basis.****

**Please help us and those thousands being denied clean air and are exposed to dangerous airborn pollution. Medical experts have confirmed how dangerous**

**micro silica airborne pollution is to the residents of the Mesa.**

**Please stay firm on the 50% and make the State Parks take 200+ ac NOW to Fix the problem. Give State Park a mandate to take the remaining acreage in from La Grande tract with in 2 years and achieve 100% Reduction.**

**Thank you Please play the Video;**
