Dear Sirs and Madams

The mitigation measures agreed upon by the State Parks Dept and the SLO APCD **MUST** go forward. While I would have hoped for an even more aggressive approach, this deal you have reached is a step in the right direction. A 30% decrease in particulate pollution over the planned 5 year period is a noble goal. With the right mitigation measures and **with no disturbance** to the mitigated areas, this goal is achievable. So, please do not go back on you word and press forward with this mitigation as agreed. Of course, some special interest groups don't want anything to change but change they must for the health and well being of people living near the Oceano Dunes.

Sincerely,

Steve DuBow
