Subject: Plea to reject the Proposal to close Oceano Dunes SVRA
Date: Saturday, March 17, 2018 9:42:35 PM

To the Committee preparing to change our lives;

We are a 4 generation family that enjoys off roading activities. We are responsible citizens and maintain our vehicles to best protect our environment. We respect the land we have the privilege to wheel on. Without access, this family would never be able to enjoy seeing this great country.

The beach is a particularly popular area, as my family loves the water. We support beach clean up efforts and always take away more trash than we bring to any area.

I would like to respectfully ask that you investigate the validity of silica coming from the SVRA and what impact does the marine biological material coming from the ocean have on all the air monitoring data? Also, what percentage of dust is coming from the SVRA?

Thank you for your consideration, and please, please, do not close this area to our family enjoying our sport.

Sincerely,
Ed Webster, Linda Webster, Greg Webster, Shaunna Webster, Taj Webster, Ahja Webster, Becca Webster, Dustin Webster, Garet Webster, Chase Webster and Vera Webster.
