---

My wife has developed spots in her lungs no idea why a non smoker thin and fit vegetarian...I am appalled that the government agencies do not value protecting the public health down wind of the dune buggies ..shut down the off road area for two years and measure the dust...State Parks is a typical government fiefdom no intent to fix the problem as it might

cause a loss of some ranger positions and loss of budget appropriations and the off road riding has created a serious nuisance...the current "stipulated" agreement is a farce
