

# 16 ARCHANGELS AT A GLANCE

# My Angels and Me

This chart is a synthesis of information I have gathered mainly from Doreen Virtue's books and my own personal experience with the archangels. This list is not exhaustive – there are many, many more archangels. These 16 are simply the core group of archangels I work with most often. I have included a pronunciation guide for the archangels' names. However, there are many alternative interpretations, and the archangels don't care which you use – so feel free to say their names in whatever way sounds best to you!

As with all reference materials dealing with spiritual topics, please use your intuition and see what resonates with you – when you connect with the archangels for yourself, explore what gifts they bring especially for you. Perhaps you perceive an archangel's aura color, affiliated gemstones, or strengths differently than Doreen Virtue or myself. And that is all perfectly okay! As we all perceive Spirit through our own personal filter, and as Spirit is unlimited, it is natural for there to be different interpretations of Spirit.

I thank the angels for guiding you here – and enjoy!

In Love and Light, Andrea

| Name                            | Name Meaning                        | Aura Color & Chakra Link  | Gemstone Links  | Special Strengths  | Key Words  |
