

December 11, 2013

Jeff Scroggins, Principal with The Whetstone Group attended Mazda Motorsports' STEM Meeting held today at Daytona International Speedway in Daytona Beach, FL.

*We would like to thank Mazda Motorsports and their entire racing team for inviting us to a fascinating day spent with the team discussing Mazda's STEM initiative leveraging the content of their top level sports car racing program throughout the 2014 season. TWG looks forward to future opportunities for providing input and support to Mazda's STEM racing initiative.*

*-The Whetstone Group*

On behalf of everyone at Mazda North American Operations and Mazda Motorsports, we sincerely appreciated your taking the time to be with us on Wednesday, December 11, 2013 at Daytona International Speedway. Your insights regarding the challenges and opportunities surrounding STEM were invaluable, and your passion for the STEM initiatives is inspiring.

We hope that you enjoyed seeing our new Mazda SKYACTIV-D Clean Diesel Prototypes, and meeting some of our drivers, engineers and crew. We are hopeful that the garage tour and pit lane visit were also insightful.

We are looking forward to our first STEM presentation in January, and hope that, with your insights and support, we can inspire the next generation of STEM All-Stars.
