

## ACIDS & ACID CLEANERS

### Coil Cleaner-Acid

Acid Coil Cleaner is a blend of acids, water based solvent detergents along with wetting, penetrating, and rinsing surfactant technology designed for heavy duty cleaning and brightening of condenser cooling coils, fins and other equipment surfaces. For good maintenance and equipment efficiency, use Acid Coil Cleaner two times per year. Acid Coil Cleaner removes hard water build up on coils as well as grease and oily soils.

### Aluma-Brite

Aluma-Brite is used to brighten aluminum trailers by removing that dull grey oxide that accumulates on the sides of trailer, wheels, fuel tanks and aluminum trim on trailers. Aluma-Brite will help remove rust on steel hinges and wheels or other areas where rust may occur. Aluma-Brite will clean non aluminum painted trailers as well. Aluma-Brite may be used on wheels, and fuel tanks. Apply with weed sprayer or through a two step trailer/truck wash system starting from the bottom and applying Aluma-Brite towards the top, this stops streaking. Rinse with high pressure. No brushing needed. CAUTION: Keep off glass and mirrors as product will etch. If Aluma-Brite is accidentally sprayed on glass or mirrors remove immediately with a clean water spray.

### Aluma-Brite 200

The same as Aluma-Brite except it is twice as strong, making it a great freight saver. A 55 gallon drum of Aluma-Brite 200 can be cut 50/50 and make two drums of Aluma-Brite. CAUTION: If Aluma-Brite is accidentally sprayed on glass or mirrors remove immediately with clean water spray.

### Phosphatizer

Phosphatizer is a unique blend of organic acids, surfactants and water based solvents to clean and prep metal surfaces for painting. This product is diluted at a rate of 1:1 to 1:100 depending upon the surface to be prepped or cleaned.

## Polished Aluminum Cleaner - For Polished Aluminum Trailers, Wheels and Fuel Tanks

Polished Aluminum Cleaner is a unique cleaning product for cleaning polished aluminum trucks, fuel tanks or wheels. Unlike aluminum brighteners Polished Aluminum Cleaner will not turn aluminum "white" and it won't take off the polish. Polished Aluminum Cleaner will remove road film, scale, hard water spots and soil without dulling the polished aluminum when used as directed. Apply from the bottom up with fine bristle truck wash brush. Rinse with hose or pressure washer. Dilute at the rate of 1part Polished Aluminum Cleaner to 10 parts of water. Contains no fluorinated acids.

## Brick Cleaner & Restorer

This non-fuming acid cleaner is excellent for removing that white chalky material that defaces brick (efflorescence). In addition to cleaning brick it cleans mortar, tile, stone, pavers and other masonry surfaces and restores these surfaces to like new. It quickly and easily removes scale, lime, mineral deposits, and encrustations as well as soap scum, corrosion, and more. An economical blend of acid and detergents, this formula contains advanced surfactant technology for quick penetration, and rinsing. In addition, this product is concentrated for maximum savings. Dilute at the rate of 1:10 with water.

## Foaming Shower Cleaner

Foaming shower is a cleaner that contains safe mild acids, wetting agents, soil trapping properties, foaming surfactants and rinsing aids to remove hard water deposits, soap scum, water spots, mineral deposits, scale and body oils from shower stalls, ceramic tile, vinyl tubs, glass shower doors, stainless steel shower fixtures, counter tops, drinking fountains, terrazzo, swimming pools and spas, tile grout and sinks with just a spray and wipe application in most instances. For some areas (heavily encrusted fixtures etc.) repeat application may be needed along with the use of a scrubbing brush depending upon the soil accumulation. This product also produces rich foam generated through the use of a small foam gun attached to the end of a garden hose similar to a garden hose weed sprayer. The foam clings to vertical surfaces allowing penetration time so soils can be more easily removed. Light scrubbing with a brush can be used on areas that require additional attention. This product may also be used to clean toilets, urinals, exterior glass, brick or stucco to remove hard water build up from sprinkler systems. This product contains **no** hydrochloric acid which will damage stainless steel and chrome.

## Concrete Truck Foamy Acid Cleaner Concentrate

This product was formulated especially for the concrete industry. With special organic acids and advanced surfactant technology. Our Foaming Concrete Truck Acid Cleaner not only cleans off the concrete residues but safely removes it. Our product contains special inhibitors to protect against rusting. In addition we have added special cleaning agents and water based solvents to clean oil, grease and soot. This product may be used full strength or diluted up to 1:5-1:10 with water depending upon the concrete accumulation and soil condition of your truck or tools.

## Concrete Truck Foamy Acid cleaner-Ready To Use (RTU)

This is the same product as above except it is made in a ready to use form for those persons or companies who wish to alleviate any potential misuse of a concentrate and be sure they are getting a consistent cleaning action.

## Ox-Off - Concrete Truck Oxidation Remover/Cleaner

FROM THIS

TO THIS

A highly concentrated blend of detergents, water base solvents and inorganic acids formulated to make your cement truck barrels & bodies look like new. Formulated

with wetting agents and penetrating agents this product removes what regular cement truck acid will not remove. Dilute concentrate with 1:2 TO 1:25 parts of water. Apply solution to surface to be cleaned with brush or sprayer, working in small sections from the **bottom** upward to avoid streaking. Allow solution to remain on surface for 1-3 minutes. Do not allow surface to dry out during application. Agitate surface with a long handle brush to remove heavy soils, and then rinse with clear water. Avoid contact with glass as product will etch. If contact should occur, rinse immediately with water.

## Ultra-Violet Light Cleaner

UVLC is a blend of safe organic acids, surfactants and sequestrants that clean ultra-violet light tubes used in industrial waste water treatment plants. The tubes become coated with hard water and other contaminants that reduce the effectiveness of the UV light transmitting ability to the waste water. Therefore periodic cleaning of the UV tubes is necessary. UVLC was developed for this purpose. UVLC is added to a stock solution tank and the UV tubes are immersed in the solution until clean. Time of immersion depends upon hard water build up. This blend will not damage UV light tubes or the racks they are attached to if used according to label directions. Contains NO hydrofluoric acid.

## Stainless, Chrome and Tile Cleaner

Stainless, Chrome and Tile Cleaner is a concentrated lime and scale solvent that has been designed especially to meet the problems caused by the buildup of hard water deposits

and soap film. Stainless, Chrome and Tile Cleaner is excellent for cleaning and brightening on stainless steel, aluminum food utensils, chrome fixtures tile and porcelain fixtures. Use on drinking fountains, bathroom fixtures, steam cookers, coffee makers, steam tables, dishwashing machines, sinks and glassware. Stainless, Chrome and Tile Cleaner is safe for use on all metals. Stainless, Chrome and Tile Cleaner is economical to use due to the high percentage of active ingredients. Saves time because it's fast acting, non-fuming and free rinsing.

## Toilet and Urinal Restorer & Cleaner

Toilet and Urinal Cleaner is a highly efficient toilet bowl cleaner and urinal cleaner. It removes hard water scale that has remained for months without removal. Deep penetrating agents remove encrusted, hard-to-remove mineral and water scale within

seconds. Cleans and deodorizes toilet bowls, urinals and other similar surfaces. Removes soils, stains, and scum with ease.

## Dyna-Mite Drain Opener

Dyna-Mite removes extreme blockages in clogged drains. Turns a solid mass into free-flowing liquids. Liquefies rags, paper, grease, etc. in seconds. Saves time and money by eliminating the roter service. Can be used on a routine basis to keep drains free flowing. Intended for extreme blockages only!

## Concrete Etch & Cleaner

Concrete Etch is concentrate and may be diluted to clean, etch, and bleach concrete in one application. It is intended for cleaning and etching concrete prior to the application of concrete sealers and/or finishes. Concrete Etch pulls grease and oil to the surface where it can be easily removed. It neutralized lime salts present in new concrete. It thoroughly removes soap and cleaner scum, so the finish will stay put. It etches, to provide a "hold tight" bond for paint or finishes/coatings. Quickly removes stubborn stains, oil and grease. This product is applied before painting or sealing to give you a bondable surface for your finish. This product can also be used to prepare masonry, brick, and flagstone.

## Rust Remover

A concentrated blend of inorganic acids, wetting agents, detergents, and water softeners specifically formulated for the rapid removal of rust. The detergent action helps to remove grease and oils, which may have accumulated on the surface. May be used on concrete driveways and rusted metal surfaces. Dilute 1:1 to 1:20. Dilution will depend

on rust damage.

## Ice Machine Descaler

Mineral Remover is a concentrated mixture of inorganic acids, wetting agents, penetrants, and rinse additives. It cuts through heavy build-ups of hard water scale and milk scale. Product is recommended for descaling and lime removal on high temperature food equipment, cooking kettles, steam tables, ice machines, milk pails and tanks, and other food processing equipment. Floors and walls may be effectively descaled and cleaned of food debris using this

product. Free rinsing. Non-fuming. High sudsing. Low odor.

## Jelled Toilet Bowl and Urinal Cleaner

This lemon fragrancd toilet bowl and urinal cleaner is a jelled, yellow colored bowl cleaner that cleans and deodorizes toilet bowls and other similar surfaces. Contains a deep penetrating agent that loosens encrusted lime deposits, soil, stains, and scum with ease. Destroys bacteria on contact and leaves toilet areas with a fresh, lemon odor. It's easy to use because the product is jelled and will cling to the underside of bowl rims and on vertical surfaces. Contains a high percentage of detergents for faster and easier cleaning. Saves time and money.

## Neutralizer & Cleaner for Waxed floors

When cleaning or stripping waxed floors it is essential to not remove or dull the wax surface by cleaning. This product accomplishes that result. Also after stripping a waxed floor there is always a residue of stripper left, which if not removed may cause the sealer to not bond efficiently to the flooring material, using this product will safely neutralize any remaining stripper. This product contains mild organic acids, synthetic wetting agents and emulsifiers, and couplers to clean and neutralize floors.
