

Gyro Sift

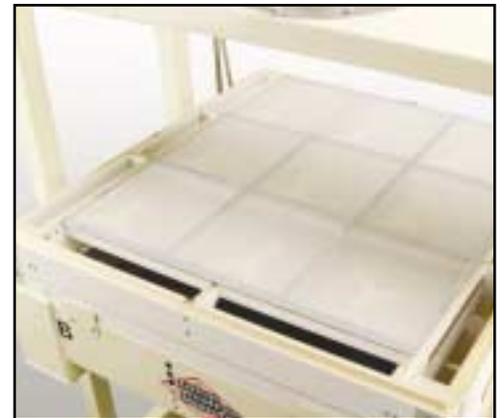

The benefits of a gentle gyratory sifting motion in a simple, economical, and reliable machine.

Designed for applications requiring smaller screen areas. The GyroSift is available with 1 to 3 sieves in a choice of three different sieve types to match your process requirements.

Able to make 2 to 3 separations. It can be furnished with the support frame for floor mounting or suspended from your structure.

- Simple design
- Ease of access
- Gentle gyratory sifting
- Economical
- 2 to 3 separations
- Flexible installation
- Low maintenance

Gyro Sift

The GyroSift is available with a choice of three different sieve types depending on your processing requirements. Each sieve features an easily removed lift out tray design that enables quick change-overs or screen replacement.

Modular Sieve

Designed for stapled on screen attachment with intercrimp backwire and a sloped stainless steel pan. 3.9 ft²/sieve.

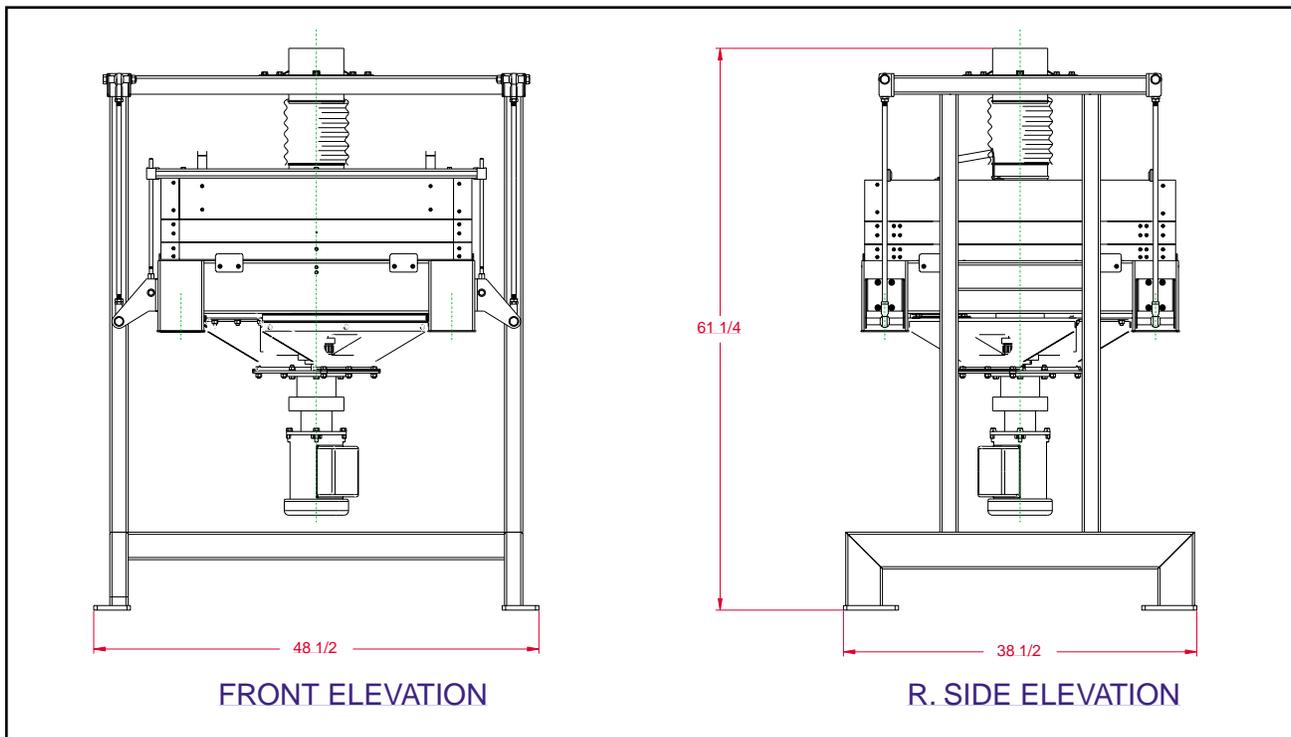

NOVA Sieve

The unique design of the patented NOVA sieve eliminates the sieve backwire and is designed only for mechanically stretched and glued-on screens. 5.0 ft²/sieve.

Stainless Steel Sieve

For the utmost in sanitation, the stainless steel sieve can be provided with glued-on screens or with mechanical screen attachment. 4.7 ft²/sieve.

Approximate weight: 750 lbs. (complete with support stand)
Motor: 1/2 hp TEFC Gearmotor
Standard Speed/Throw: 220 rpm/2" diameter
