

EL2000 WHEELED LITTER CARRIER

The EL2000 can be transported by one or two people. It becomes a stable aid station with the pull of a handle and is quickly mobile by means of a quick release foot tab.

Backboards and Litters are now also available, please contact us for more information.

The EL2000 Patient Transport Device

Now entering its second year of availability, and featuring several improved features, including flat-free wheels! This product has been rigorously tested and was named the product of choice by the US Military. Over 1000 units have entered the field over the last 12 months! The EL2000 is ideal anywhere rugged terrain is encountered, especially in places an ambulance can not reach. It has been designed to fit back boards and stretchers of all shapes and sizes. Our patented clamp system allows for one handed tightening and releasing.

ADVANTAGES:

- Sets up for use, and folds up for transport; both in 30 seconds.
- Highly durable Italian steel frame, powder coated and corrosion resistant.
- Custom made wheels and accessories designed, built, packaged in the USA.
- Can also be used to transport large/heavy items. (500 lb weight limit)
- Used for mobile patient transport and as a stable medic station.
- Legs lock in place and can be released easily by the responder.
