Antenna Solutions for Tactical Communications and EW

Handheld and Manpack Antennas

We offer a large range of handhelds (10 W) and manpack (20 W) antennas for military radio communication systems. For use in severe and harsh environments, our robust and extremely flexible antennas give you excellent electrical performance to optimize your radio range.

Vehicular Antennas

Our new family of 50 W vehicular antennas features a much smaller height than most vehicular antennas available in the market, with equivalent or better electrical performances. • Less than 1.5 m high (5 ft), compared to existing 3 m (10 ft) antennas • Frequency range: broadband 30 to 512 MHz and HF 700 to 2500 MHz • Lightweight

LuxCis® ARINC 801 Contacts

SingleMode APC LuxCis- ARINC 801 contacts feature a **green** line around the ferrule holder.

SingleMode UPC LuxCis® ARINC 801 contacts feature a **blue** line around the ferrule holder.

MultiMode LuxCis® ARINC 801 contacts feature no line of color.

Adapters

LuxCis® to LuxCis® adapter, simplex bulkhead feedthrough

LuxCis® to LuxCis® adapter, simplex straight

LuxCis® to LuxCis® adapter, duplex, for PCB

LuxCis® to LC adapter, simplex, LC panel cut-out

LuxCis® to LC adapter, duplex, LC panel cut-out

LuxCis® to LC adapter, duplex, MIL-DTL-38999 panel

LuxCis® to LuxCis® adapter, quick release

LuxCis® to LC adapter, quick release

D-Lightsys, a Radiall Company, designs and manufactures high performance optical interconnect solutions for severe environment applications. In particular, D-Lightsys offer products and know-how fitting the requirements of avionics, space, transports, defense and scientific industries.

- The S-Light family, which gathers D-Lightsys **optoelectronic transceivers** (1Tx+1Rx) and single channel modules (Tx or Rx)
- The D-Light family, which gathers D-Lightsys parallel modules for **multi-fiber communications**.
