

Biography – Umut ORS

Umut ORS was born in 1984 in Bartın. He continually graduated from Atatürk Anatolian High School Zonguldak, University of Istanbul from department of Electronics Engineering and Yildiz Technical University from department of Master of Science in Electronics Engineering. His thesis was “Mapping of EMI in Corvette Type Navy Vessels”. Moreover, he is a PhD candidate student in Electronics Engineering in University of Osmangazi from 2013. His research interests are Analytical Methods in Electromagnetic Propagation, Radars, Radio Communication Systems and their planning.

He started his career as a service engineer for MRI and CT systems. Eventually, enlisted in Turkish Coast Guard as a Navy Officer with the title of Officer of Electronics Engineer in 2008. He worked as a planning officer and project manager in various military procurement/R&D projects based on Radar Multisensor Fusion and Radio Communication systems. He resigned from his occupation in 2014 and transferred to Civil Aviation sector as an Electronics Engineer in State Airports Authority. Now he is working as a Radar Systems Engineer focused on Track Inconsistencies, Radar Performance Analysis, Multisensor Fusion and Track Exchange.
