

**Amar BOUALI, VP Sales South-Europe, Turkey, MEA**

### **Experience**

Amar Bouali works at Esterel Technologies, a subsidiary of Ansys Inc., as Vice-President managing the operations in South-Europe, Turkey, and MEA, occupying this position since 2010. From 2003 to 2010, Amar acted as deputy CTO for Esterel Technologies managing the company's technical expertise on the field world-wide including: model-based engineering for critical embedded systems; DO-178B/C certification and tool qualification; training and consulting services in pre- and post-sales phases.

From 2001 to 2003, Amar acted as senior R&D engineer for Esterel Technologies.

Before joining Esterel Technologies, and from 1993 to 2001, Amar was research scientist at Inria, the French National Institute for Research on Information and Communication Technologies, focusing on formal methods for concurrent and real-time systems.

### **Education**

- 1993: PhD in Computer Sciences in 1993 from University of Paris VII and Ecole des Mines.
- 1989: Msc in Computer Sciences in 1989 from University of Paris VII
