

SecuRise®

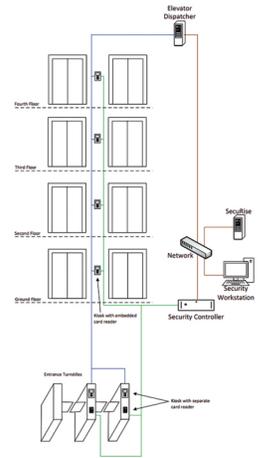

A PRODUCT OF CENTENNIAL SECURITY INTEGRATION, INC.

*'Elevating the Standard
for Vertical Security.'*

Elevator control has evolved from the days of pushing a button, then waiting, then entering the car, then telling it where to go...

Bridging the gap between security and vertical transportation. **SecuRise** allows a building's security management system to directly interface with the elevator management system and streamline the process of getting authorized people into the building and to their final destination. Today, a bank of elevators can be programmed to utilize mathematical algorithms to regulate the most efficient route to each floor.

The **SecuRise** system allows the security control point to be located outside the car minimizing travel time by allowing people to be routed to their floors in the most efficient manner possible. Combined with a proximity card reader system, SecuRise assists people in immediately knowing which elevator to enter; they swipe and are directed to which elevator to enter. This prevents the log jam of people attempting to access the in-cab card reader in a traditional elevator security system. This streamlines building entrance times and reduces waiting.

SecuRise FEATURES:

- Browser based interface
- Little or no operator intervention required after initial setup
- Does not require server O/S for most applications
- MSSQL Database, Express or full version
- TCP/IP connectivity between the security and elevator controls
- No relays required for elevator interface
- Operational modes (modes can be combined)
- Multi floor – users with access to multiple floors can select the floor they are going to
- Turnstile/Direct – automatically selects the floor for the individual user
- Supports automatic scheduling for secured or free operation
- Support for holiday scheduling
- Support for visitor elevator access
- Card technology independent - supports cards, keypads and biometrics
- Unlimited number of floors

System Requirements:

- Microsoft Windows 7 or above & IIS 7.5 or above

SecuRise 48-02 25th Ave # 407 Queens, NY 11103
