BigDataRevealed Receives Cloudera Certification

BigDataRevealed "The High-Performance Digital Data Detective that quickly and easily discovers data anomalies and personal information that impact your business. "

Buffalo Grove, IL, February 15, 2016…BigDataRevealed an emerging technology company is now Cloudera certified. BigDataRevealed was recently certified on Cloudera Enterprise and support integration with Apache Impala (incubating), Apache Spark, and Cloudera Navigator.

BigDataRevealed was developed with a modular design and delivers all front-end and back-end processes as callable modules. BigDataRevealed process modules simplify critical big data processes: Data Discovery, Column Classification, Pattern Analytics/Compliance Discovery, Outlier/Anomaly Detection, Alerting, Dual Variable Outliers/Anomaly (Regression line Outliers), Live Streaming Data Processing, and Correlation Coefficient. BigDataRevealed also provides Executives and Data Scientists a complete Graphical User Interface and Application Solution to use for collaboration on Metadata.

"BigDataRevealed certification by Cloudera provides peace of mind for companies that are using Cloudera Enterprise for business transformation to support global business use cases, and need to discover data anomalies that negatively impact business performance," said Steven Meister,

"We see enterprise customers accelerating their implementation of Cloudera Enterprise to support mission-critical Big Data analytics and Data Discovery to improve their business performance" said Tim Stevens, vice president of Business and Corporate Development at Cloudera. "BigDataRevealed helps our customers bring fast and easy Data Discovery and Anomaly Detection to the Cloudera platform".
