Roles and responsibilities

- Maintenance and upkeep of all Audio Visual equipment within the Business School
- Development of training guides
- Development of Lecture Capture systems
- Video Conference testing and booking

David purchased a Solo 8 unit in September 2014, and gave the following feedback:

I think the camera is a great product at a great price-point.

It feels good and robust, and I like that it has quite a lot of metal in it.

The fact that it it plug and play is a bonus, and that it works in usb 2 or usb 3 ports as well.

I can see this being used in labs and in smaller teaching spaces that don't currently have document cameras.
