# PRODUCT INTRODUCTION

## PRODUCT INTRODUCTION

### What's aluminium foil?

Aluminium foil is used in a wide variety of applications because of its unique combination of properties. For years, aluminium foil has been contributing to human comfort and health. Strong and resistant for various applications in construction or transportation, easy to sterilize for medical uses, aluminium foil remains mainly the best packaging for food products. Aluminium's excellent barrier properties give it a great advantage over many other flexible and rigid materials. A very thin layer of aluminium foil - only 6.35 microns in some cases - can render a packaging laminate completely light-proof and liquid-tight. There are many different applications, each making slightly different demands which are met by aluminium foil in the form of flexible packaging.

Aluminium's essential properties can be seen below:

- Heat conductivity
- Strength
- Hygiene
- Impermeability
- Deadfold - it stays wrapped around food items without needing further sealing
- Non-toxicity and corrosion resistance.

PopTop's household aluminium foil is the best protection available. Of all food wraps, it forms the strongest barrier against heat, moisture, air and light. And our Household Aluminium Foils have fine quality and have passed America FDA inspection.

- Cooking: Seals in juices. Controls searing.
- Storing: Keeps freshness in; Prevents odours from spreading.
- Freezing: Resists freezer burn. Store food in freezer, longer.

PopTop's full range of aluminium foil wraps provide you with the convenience of freezing, storing and reheating food... and they're recyclable where facilities exist.

#### Lining Baking Pans

For easy clean-up.

#### Freezing Meats

Prevents frost and freezer burn better than freezer bags

#### Lining Charcoal Grill

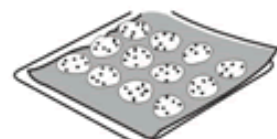

Keeps grill clean. Line grill; puncture vent openings.

#### Catching Oven Spills

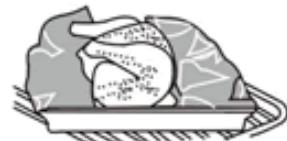

Small sheet of foil on rack below baking pan catches spills.

#### Lining Cookie Sheets

Keeps cookie sheet clean between batches.

#### Roasting Turkey

For juicy, tender turkey without splatters.

## Aluminium foil container

Ningbo PopTop Aluminium Foil Products Co., Ltd. specializes in household Aluminium Foil products, becoming the largest household Aluminium Foil rewinding company. In 2005, we brought many advanced Aluminium Foil food container equipments from both domestic and abroad, we develop and produce all kinds of kitchen use aluminium foil products, such as one-off food containers, trays, cake containers etc. Our products are widely used in airline(train) in flight(train) catering industry, snack bars, restaurants, hotels, biscuit industry etc. The products can be directly used for forming, grilling/ baking, freezing, heating, packing and storing, and all of them are recoverable and recyclable. We can also make different aluminium foil containers with different design as customers' requirements.

- Various dimensions available.
- High-temperature sterilization.
- Made of advanced pollution-free aluminum .
- Shape: round, rectangle, square, ellipse, cordate, etc.
- Environmental protection, recoverable and recyclable.
- used for storing, packing, grilling/ baking, forming heating and freezing.
- Customized orders available.

# Aluminium Foil Rolls

## Aluminium foil rolls

For years, aluminium foil has been contributing to human comfort and health. PopTop Aluminium Foil Series adopt innocuous and high quality aluminium materials without any poisonous elements, moreover, it has past America FDA inspection. PopTop's household Aluminium foil is widely sold into world wide consumer market, usually in rolls of around 250-450 millimeter width and several metres in length.

## Retail Aluminium Foil

### Specification:

Width: 250--609mm(10in—24in)

Thickness:11--25micron

Length:5m--300m(10ft-1000ft)

### Packing details:

Each roll is packed with an individual color box with plastic holder and blade in it. Color box is as per your design or PopTop's brand.

## Foodservice aluminium foil

### Specification:

width:12/18/24in

Thickness:10-25mic

Length: 500/1000ft

### Packing details:

plastic holder and blade in it. Color box is as per your design or PopTop's brand. Use pallet for pack.

# Roll Material

## Roll material

Due to perfect anti-moister, anti-pollution and electrical conductor characteristics with blare feature, the aluminum foil has been available for packing field, capacitor making field, construction field, ornament field, printing field and household packing. The main products of our company as follows: cigarette foil, golden foil paper, food foil, capacitor foil, medical foil, beer foil, housing foil and soft packing foil.

Products classify	Products Name	Specification		Alloy Type	Condition	Inner diameter (mm)	Rewound diameter (mm)	Purpose
		Thickness range(mm)	Width range(mm)					
Foil Thickness Below 0.01mm	Cigarette foil	0.006-0.007	350-1000	1235 1145	0	75 150	280-480	For cigarette packing
	Golden foil paper	0.006-0.007	700-1200	1235 1145	0	75 150	280-480	
	Food foil	0.006-0.015	280-1400	1235 1145	0	75 150	280-480	For candy or food packing
	Capacitor foil	0.006-0.007	300-800	1235 1145	0	75 150	280-480	For capacitor making
Foil Thickness over 0.01mm	Medical foil	0.012-0.026	350-1400	1235 1145	H18	75 150	400-800	For medicine packing or seal packing of medicine bottle
	Beer foil	0.009-0.0115	300-1000	8011	0	75 150	400-800	Outer packing of beer bottle
	House foil	0.012-0.017	300-520	1235 8011	0	75 150	280-480	For packing of various ointment
	Soft packing foil	0.012-0.016	600-800	1145	0	75 150	280-480	For packing of various ointment
