

# Radiance, Reflection, Revelation

Glass Tower for the First Unitarian Congregation of Toronto  
Leaded Glass Technique & Dichroic Glass

*"The scale and scope of the First Unitarian commission are breathtaking –*

*The glass in the tower represents one of Toronto's largest single commissions for stained glass.*

*While the First Unitarian glass is uncompromisingly modern and innovative, it blends seamlessly with the new building and surrounding architecture."*

K. Corey Keeble  
Royal Ontario Museum

*"Circular as our way is, it leads not back to that snake-haunted garden, but onwards to the tall city of glass that is the laboratory of the spirit."*

R. S. Thomas
