

Trees of Life and Light

Episcopal Church of the Redeemer
2944 Erie Ave,
Cincinnati, Ohio

As I watch trees come to life here in Toronto, it seems fitting to share new windows created on the Tree of Life theme.

It was a real pleasure to work once again with architect Phillip Markwood as he transformed a shadowed, deep-set chancel into a revitalized space full of grace, light and movement, fully integrated into the traditional stone architecture of the church.

These windows, wall panels and pulpit frontal were inspired by the Heavenly Tree image from The Book of Revelations (Rev 22) – two trees of life growing on either side of the river of the water of life. The leaves of these trees are for the healing of the nations.
