LaSalle, ON N9J 3E8

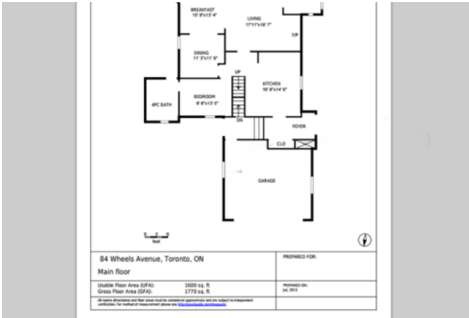

I specialize in providing a service that records a facility's visual and dimensional space. Each listing has a story, and my job is to show that story from multiple perspectives. I make your listings stand out from the rest and raise the standard of expectations. Some of the services I provide include:

- 360 degree views
- Laser measurement tools
- Floorplan creation and calculation of square footage
- Easy embedding to use on your own website
- Photo gallery, area maps, and instant social media links
- Branded or unbranded banner links
- Property sell sheets
- Listing analytics
- Estate promo videos

Laser measurements taken during photography gives detailed information in any area. This provides the buyer a way to envision their belongings within the house. Provides an updated source of space calculation, confirming the value placed on the listing.

Floorplans are downloadable, saving time and resources by providing all the data necessary for planning the perfect space. This saves you time by attracting serious buyers and limiting fruitless requests for a showing.

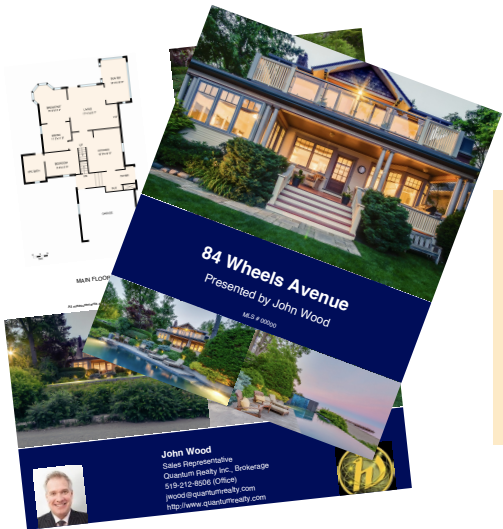

Photo galleries, social media links, area maps, even sell sheets are as easy as clicking a mouse. Measuring the distance to school, work, groceries, or transit stops for the tenant just became that much easier.

Analytics provides detailed information that highlights how many people viewed the property, how long they stayed, and where they came from. This gives insight where to focus or adjust your marketing.

Video estate tours tell the story of a unique property. Interviews, details, voice over narration, and sweeping drone footage work together to capture the attention of a high end buyer.
