

The Omni LTe Controller

The Omni LTe is a full sized security and automation system with flash memory and five serial ports, as well as an Ethernet port for remote access. The system provides enhanced comfort, safety, convenience, and energy savings by coordinating audio/video, lighting, heating and air, security, scenes and messaging based on activity and schedule.

Security

Omni LTe controllers are UL Listed, CP-01 compliant security and fire for residential installations. They detect intrusion, smoke and fire, carbon monoxide, water, vehicles, motion, and other hazards with wireless or wired sensors. Security zones are fully configurable and expandable. You may set the validity of user codes by time and authority. For example, the security code or access card for the nanny, housekeeper, or contractor only works during specified times. The Omni LTe supervises zones, battery, and bell circuits.

Surveillance cameras may be added to Omni LTe systems. Automatically display live video feed on the Touchscreen or television when the doorbell rings. Activate video recording when an alarm trips, and send an alert to a cell phone or e-mail address. Omni LTe systems have a built-in digital communicator for use with a central station and can dial up to 8 additional phone numbers chosen by the owner for voice notification.

Lighting

The Omni LTe system can control your home lighting by schedule, motion detection, door openings, sunrise, sunset, alarm activation and more. It provides the benefits of a sophisticated lighting control system by setting scenes, fades, and dimming levels. Omni LTe supports Leviton Lighting Control products

20A00-70 Omni LTe in Enclosure

20A00-72 Omni LTe for
Structured Wiring Enclosures

20A00-73 Omni LTe -
Board Only

including HLC, Omni-Bus, Vizia RF +, Z-Wave, and ZigBee. Supported products include dimmers, switches, remote controls, and plug-in modules.

Energy Management

If you add Leviton's Omnistat2 wireless or wired communicating thermostats, you may control your temperatures through your Omni LTe system by schedule and activity - such as home, asleep, away, room occupancy, outdoor temperature, etc. Leviton temperature and humidity sensors allow for temperature based programming of events in your Omni LTe controller. They may be used to activate programs for controlling temperatures in attics, garages, greenhouses, basements, wine cellars, or coolers. ZigBee devices allow for wireless control of water heaters, pumps, fountains, and much more.

Audio/Video

An Omni LTe may be connected to a Leviton Hi-Fi 2 whole home audio system. Use the Bluetooth Remote Input Module to stream music from your iPhone or Android phone throughout the entire home or business. Use a home telephone to make an announcement through the

audio speakers, such as calling the kids downstairs for dinner. The Home Theater Extender 2 may also be utilized. Automate audio/video based on schedule or push one button on your phone or Touchscreen to activate appropriate A/V equipment, lower a projection screen, close the window coverings, adjust the temperature, dim the lights, and lock all doors.

Interface Options

Within the home or business, Touchscreens offer the ability to control every sub-system from a dedicated built-in device. The Omni LTe may be controlled remotely from a PC, laptop, tablet, smartphone, or e-Reader. Apps exist for Android, iOS, and Windows devices. ■

LTe supports the following protocols and products: X-10, UPB, Omni-Bus, ZigBee, Vizia RF Z-Wave, Clipsal C-Bus, Dynalite, Coolmaster, KNX, Hi-Fi, Hi-Fi 2
