

First cut along the dashed line to get the square

Folding instructions:

1. Fold the white corner up
2. Fold the small tip of the corner from the first step back
3. Fold the white triangle with the folded tip up so that it lies on top of the yellow part
4. Fold back the two corners to form the egg
5. Fold back the two side flaps to form the chicken
6. Fold back the top of the chicken to form the head
7. Fold up the top of the chicken to form the beak

	<p>Dashed line: Valley fold The dashed line shows where the paper should bend.</p>
	<p>Dashed-dotted line: Mountain fold The dashed-dotted line shows where the paper should be folded back</p>

Geocaching coordinates:

If the chicken was folded correctly it will reveal the end coordinates where the cache is hidden.
