## **ACCURACY, CAPABILITY, EFFICIENCY & PRODUCTIVITY!**

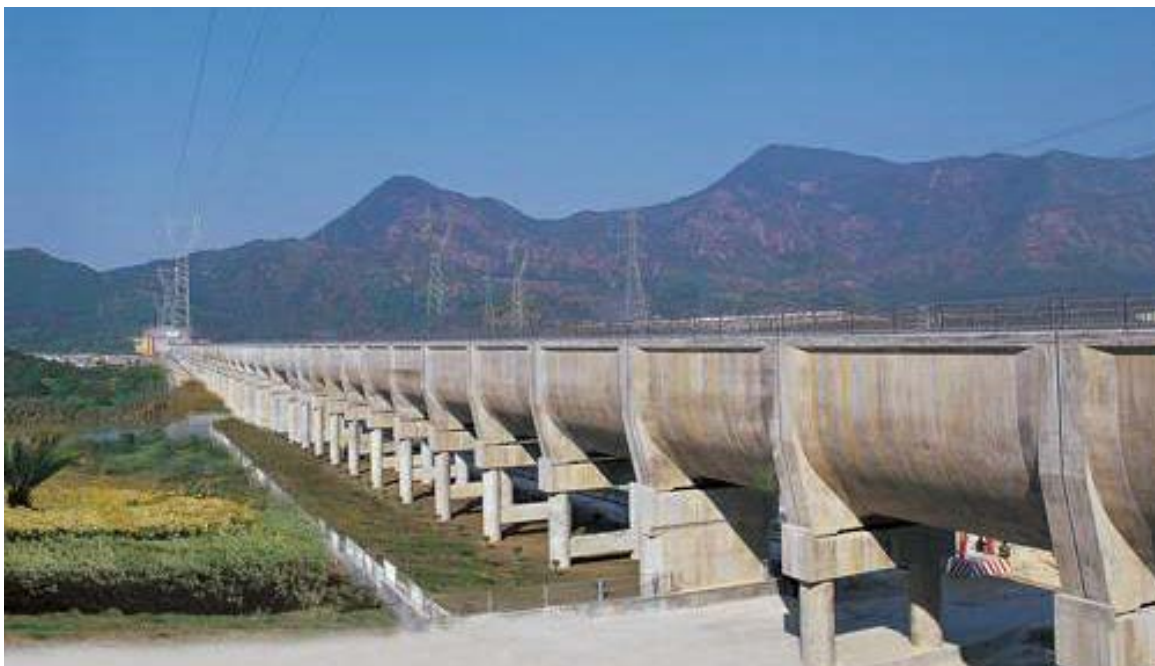

*[Following is the project case overview of a particular water transmission and purification project impeccably completed through the utilization of talent, knowledge and experience between the seamless collaboration of the **WinkGroup International Holdings Ltd.**, and its infrastructure partner in the field of water transmission, the **Guangdong Conservancy Construction (Group) Corp., Ltd.**]*

## **Case Overview: Dong Shen Improvement Project 2012**

The scale of DongShen Improvement Project is longer than 151.7 kilometers; the total amount of water that needs to be treated is more than 4.423 billion cubic meters. The designed flow capacity of the system was 140m<sup>3</sup>/sec, the relevant total investment was Renminbi ¥19.9 billion Yuan (**US3.13 billion**), and is one of those large-scale inter-basin water transfer projects. The rating of such engineering design was classified as Level 1.

The joint-venture group undertook this project and got the first tenders of watershed civil construction tasks, which including basic construction design processing, and the entire task was completed within a period in advance of more than eight months ahead of the desired schedule.

A total of 34 divisions of engineering cases were commissioned with the passing rate of 100%, and an excellence rating of 100%, with an appearance score token of more than 93.8%, the assessment concluded the entire project was completed in perfect accordance of design and output criteria commissioned
