

Equipment Spec Sheet: Teryx with Steadiseat

4 seater off road camera car. Our "Shock Gun" shock mount and Lev head can mount front or back, and provide smooth stable images over extreme surfaces, and at speeds up to 80 kph or 50 mph. Its small footprint and 5 foot width also makes it useful for tight roadwork or sidewalk operation. Need to jump a curb at speed? No problem.

It boasts room for Director and focus puller, along with full monitor and comms system, and full on board battery support. An enclosed support trailer comes equipped with change of tires to go from off road to smooth surface filming in no time.

FEATURES AND SPECIFICATIONS:

- Seats 4
- 50mph or 80 kph
- Off road or on road capable
- Full on board battery support included
- Monitors and comms
- Can change from front to back shock mount configuration in 20 minutes
