

## Equipment Spec Sheet: Shockgun Shock Mount

The Shockgun Shock Mount is an amazingly adaptable mounting system. Accepting any Mitchell Mount Head, it can be mounted in minutes with a standard speed rail system – and can produce an amazingly stable image, even in the toughest of rough-terrain shooting conditions.

### FEATURES AND SPECIFICATIONS:

- Fully Dampened Camera Mount Platform
- Designed to accept any camera head utilizing a Mitchell Mount
- Capable of operating in extreme conditions over 100 MPH
- Turntable suspension optimizes dampening for off-road conditions
- Typical mountings include Cameras Cars, Off-Road Trucks, Quads, and Helicopters
- Can be adapted to mount to virtually any type of equipment imaginable
- Has 2" standard square tubing for most standard receivers
