

# LEV HEAD

## Equipment Spec Sheet: Lev Head

This 3-Axis Stabilized Head is quite possibly the most versatile head in the industry, capable of accommodating a wide range of cameras, including the larger IMAX 3D cameras. In fact, we have yet to find a camera it can't handle.

The Lev Head fits easily with any Mitchell Head Mount Crane, and is perfect for Techno-Cranes due to its incredibly light yet durable 40 lb. frame. This allows for quick lens-changes, saving time and money for other aspects of production.

### FEATURES AND SPECIFICATIONS:

- Ultra lightweight frame
- 3 axis gyro stabilized camera head (Pan, Dutch, Tilt)
- Accepts most motion picture film, HD, 3D or still cameras
- Supports standard Arri's and Panavision Panaflex or combinations of both
- Quick and easy installation onto any standard Mitchell Mount
- Highly stabilized image operating on virtually any type of terrain
- Operates from either joysticks or wheels as required – fully remote controlled
- Setup time is approximately one hour
- Weighs approximately 40 pounds
