* Contact MCBMP for specific weight solids and volume solids % on individual colors. 307° to 389°

SURFACE PREPARATION

Surface must be clean, dry, properly prepared and free of dirt, grease, or loose chipping paint and particles. Glossy surfaces must be de-glossed with sandpaper or similar process before finishing. New or bare surfaces should be primed with a suitable primer before applying finish coat.

APPLICATION

Brush, roller, or airless or conventional spray. **Note:** This material needs little or no thinning for brushing and rolling. The consistency has been formulated to provide best results from full-body application.

THINNING

Thin if necessary with turpentine, mineral spirits or synthetic thinner.

CLEAN UP

Tools and equipment may be cleaned with mineral spirits or synthetic thinner.
