

Islam
The Next Frontier

We always open Praising and giving Thanks To The Most High, Allah who we believe is The Cherisher and Sustainer of all Worlds, and may Peace be upon His Messenger our Prophet, Muhammad (of over 1400 years ago) and also all of the other Prophets who came to deliver a message from The Most High.

In order to recognize The Next Frontier we must have a stronghold on the happenings (in various areas) such as Education, Science, Spiritual matters, Political matters, Material matters, Mental matters, Moral matters.

Let's start with Moral matters--Prophet Yusuf prayers and peace be upon him. His morality has been tried and he has succeeded and is to succeed against the fiery passions. And the Cold And while being clean he is able to interpret stories and events. On whom Allah perfects favor, On him and his posterity (us) and to the posterity of Jacob even as he perfected it to thy fathers Ibrahim and Isaac aforesaid. Quran 12:6 For thy Lord is full of Knowledge and Wisdom.

Education, G-d has said that he has completed his favor on us and chosen Islam as our Religion. So what does that mean? It means we have the knowledge available to us that we need (In Quran) to be Progressive.. Islam and Sunnah of Prophet Muhammad leaves out nothing (it is a guide) for humanity And in America we say In G-d we trust. And The Quran a single book consistent with what has come before us..The Abrahamic Faiths A Holy Quran is Volumes and Volumes and Volumes for man and woman, babies children adolescents and teenagers. Islam is our Natural Inheritance says The Honorable Imam W.D. Mohammed. The Quran is Allah expression of himself to man. Education for ourselves, even though The Quran may not be in Public Schools yet is essential for our human development.

Spiritual Matters

In Bible it says that Allah Spirit hovered above the waters Allah prepares water. And Jesus walking on water represents that he is a champion in the area of being sensitive to what is tampering with The Ummat. By the way, Prophet Esau ibn Maryam always had an answer to one who was coming against him(who practice Evil), Allah U Akbar. Water represents sensitivities.

Material Matters-It looks like material inventions need to be more difficult to use. You know some people take the stairs instead of the elevator. When our people were in captivity and after-Products and inventions were made to make life easier because their work was so hard...But nature is made to get stronger. Animals of the wild constantly adapt. And people are under the climatic changes and the forces of nature. What I'm trying to say is this, It looks like our inventions should become more difficult to use. Maybe good for both parties. Meaning this, Perhaps airlines will put exercise bikes on

airplanes. Give their passengers discounts so they (the airplanes) don't have to have a supply of much fuel. And generate energy for aircraft.

Science

An Imam (Oh Yeah Imam Plemon isn't that Ironic) said the last time he saw Imam Warith Deen Mohammed he relayed the message. "Scripture is the Science of Human Behavior". "Scripture is the Science of Human Behavior, Scripture is the Science of Human Behavior", So think deep and broad on scripture. However, we are not to forget the basic.

What is religion about? Amongst other things--Building and Defending

Men-tall (mental) matters

Man means mind woman means womb of mind. They are the first teachers to children. Think deep and broad on scripture..

Political Matters

There is no separation of Masjid and State in Islam.-- You know, Church and State.. A little humor there. Ok, now, some said that they did not want for an African American to whip or spank a European American child in school. Now in 2018 we see where racism has gotten us. As-Salaam-Alaikum!

Remake The World

Imam W.D. Mohammed in his Remake The World address started off by giving an update of the most recent happenings of what was happening with the immediate community. And he explained evidently after study (while being clear and observant) the happenings amongst Africans and African Americans and Europeans on Earth. Many people still have slave mentalities. As Imam Muhammed taught the worst enslavement is the enslavement of the mind....

You know, We generally use The Muslim Journal Frequently and Regularly. However in our immediate households it looks like we have leveled as it relates to presenting the paper at least once (even one ayat right). We have leveled like an airplane reaching its cruising altitude. Remember in Savior's Day 2008? The Honorable Imam W.D. Mohammed quoted the sister as saying "Not only can a few devoted and determined people get together and change the world.. That's the only way it has ever been done. So now we need to look outside of our households. I know we historically may want to present The Journal to African Americans first because they are our physical family, however, they may be far away from being our spiritual family.

As President Obama said we need to turn the television off sometimes for our children. That can be applied for adults also. Reflect on The One who is Most High - Allah, Highly Glorified is He.

The way I understand it the authors of these television chemercials study destructive science or some may have idle minds which are devil workshops. It looks like by way of trying to take control of our senses (hearing, seeing, tasting-touching, smelling). They actually dish out illnesses. They study the way the human body is made. So that you will be compelled to buy their product. And the side effects of most of these medications that are televised have side effects that out weigh the initial illness. Terrible, lethal side effects. So, if the authors of these chemercials dish out what they have learned from study of science how do we have a return to our Good Strong Original Nature? By taking something from nature that has proved true. By believing in Allah. And Praying to him and doing good deeds, using our Natural Talents and Gifts. And now these televised chemical influences have found their way into screenplays, movies, films. Radio and on the computer (the internet).

And many drugs are destroying peoples worlds. We all have our own worlds (minds) that which we must attend to. You have your world your (mind). I have mine. We share the Earth though. With these drugs (street drugs), and pharmaceutical drugs, a major attempt by the Wicked are trying to keep it hidden that it's a case of divide and conquer. But Allah wants us to know that we are not in our world alone. Al-Islam has brothers and sisters on every continent on Planet Earth. About one out of every five people on Earth is Muslim. And the perpetrators who carry out serving drugs are usually driven by the want to earn extra dollars.

Note: At least with my perception, Christians are gaining more experience with The Bible - They are recognizing more of the substance involved whether they acknowledge

G-d or not.

A return to the Original. How do we have a return to our original nature. By bearing witness that nothing deserves worship besides Allah the one true G-d and that Muhammad is his servant and messenger. After believing then do Good Deeds.

You know we want to take back our colors. And know the meanings of colors. Now the queer minded people use the colors of the rainbow. The rainbow. A symbol that Allah used as it has it in The Bible a promise that he would not destroy the earth again the way he did in the time of Prophet Noah May Prayers and Peace be with him. We want the Beautiful Rainbow not the Ugly Rainbow. And G-d don't like Ugly.

He also gave good news about the community about different areas of the country.

He spoke about how we as African Americans were cut off from our land and our people. We had no way to get back home. No way to know anything about our culture. So what I am saying is where are they doing the same things today (that have evolved for greater evils) or what is it that is going on today. Many of them are doing the same things that there fore parents did. The Crimes against Humanity have evolved. Hiding it in plain sight.

We need fascinating thoughts, think on How our Human makeup is made and that everything in nature tells us something about ourselves, we even have metal in our bodies, like the earth has. We have a sun in us and frequencies and unseen oxygen hydrogen etc.

The Honorable Imam W. Deen Mohammed said "There is no such thing that is dead that Allah can't give life to." People, the world needs us. We have been striving or at least we should be striving using our G-d given talents and gifts working towards our goals. Using them towards what G-d would have us to tend towards those sharpened or oiled tools. We must first recognize that we need to make adjustments. May G-d choice blessings be on our people the real people who endured the captivity situation here in America. However it looks like adjustments need to be made in the material world. In America (we've been told) the wealthiest nation on Earth had the African Americans working so hard that we were dying meaning the spirit leaving the bodies in the age of our thirties. The ages of the individuals were in their 30's. Our people must have said this work is too hard and we don't know how long we will be in this situation we ought to and we will make it easier for our children and grandchildren. America being possibly the most influential country on Earth--Other nations emulated what America did. Now in our factories our situation here today in the USA many of the products have become so much easier to use that after people get off their 9 to 5 we have to go exercise to keep the blood pressure down and to have a healthy body.

I believe we should have products that work our bodies more. Just like taking the stairs instead of the Elevator or getting up to turn the TV on instead of sitting on the couch and

using a remote control to change the channel.

Talents & Gifts interests--We use our smaller gifts, talents and interests for and towards Allah Greater plan. Imam W.D. Mohammed stressed - Get involved with Business. He said The Believers in this community will NOT be poor. One way this can be understood is to mean without work to do. Busy-Ness(t). And evidently the bird passes on (or dies) in the nest. Otherwise we would see birds throughout our city streets.

We often say there is plenty of work to do. Some say name one thing. We can sell Muslim Journals to help get the word out. Maybe by Getting Flyers made and pass them out.

Now some believe in telepathy. In order to make it easier on the Presidents and Leaders of the future, we should recognize that It's ironic that about the same time the happenings on this planet Earth have become One, cell phones w/computers that we can carry around with us came into being. It looks like the rulers of the past used telepathy to look out. That's why they kept their surroundings maybe Palaces quiet... So that they can look out and see what is going to take place. But now its probably too much. I think that calls should be screened and for a future leader, they should use a physical phone most of the time. When telepathy would be too much.

We need to take a look at The Next Frontier. Islam is The Final Frontier. It's a continuation of what we were Fed with Before. The Seven Heavens and The Earth with the representatives of the Heavens. And all can make their contributions.

Look broad and deep when reading scripture. Though these representatives works are to be looked upon as one. All Praises be to Allah. The believing community in the Heavens and Earth and all the plants, animals and insects. Solar rays, infrared rays, comets planets. Allah who is Most Gracious is the One Lord of All of this. Praise be to Allah.

Now changing the subject to something that needs to be addressed. This community-The Muslim American Society recognizes that Pimps are Slave Traders. A Pimp is one who solicits clients for a prostitute. And on the streets and in some songs it's said that Prostitution is the oldest Profession. Well how can a man pay a prostitute in the first place if he did not have a job. Work is the oldest profession. In many Rap Songs and on the Streets this topic has been spreading, gaining ground. The talk is that some in high offices are Pimps and have a door open to them and some have walked through the door. Its not right to have this pimp language spread. Its not good to justify it.

Now, several groups of people have been calling themselves and each other Beasts from having a high powered automobile to men dunking a basketball in the N.B.A. to music. Some of the misguided masses have gone from Cats to Dogs to Rats and now Beasts. So how can this talk be corrected. By believing in the Most High by using Quran as our guide. That's how to gain a return to the Original Man, Original Woman, or Original Teenager, Original Adolescent, Original Child and last but not least we want our Babies

to be Original.
