

Notice of Public Meeting
City of Bertram Water Transmission Main and Elevated Tank Project

A public meeting is being held on March 16, 2021 at 9 AM via Zoom to discuss the City of Bertram's proposed project to construct a replacement water transmission main from the wells south of Burnet, along CR 330 and FM 243 to the new elevated storage tank. One of the purposes of this hearing is to discuss the potential environmental impacts of the project and alternatives to it. The total estimated cost of the project is \$12,770,000.00. Incremental rate increases will be required to finance this project and may be offset by impact fees from new development within the service area. An application for financial assistance for the project has been filed with the Texas Water Development Board, P.O. Box 13231, Austin, Texas, 78711-3231. An Environmental Information Document for the project has been prepared which will be available for public review at the City Hall at 110 E. Vaughan Street, Bertram, Texas between the hours of 8 AM and 5 PM for 30 days following the date of this notice or online at www.cityofbertram.org. Written comments on the proposed project may be sent to PO Box 1604, Bertram, Texas 78605 or to the Texas Water Development Board by mail at the address provided above, or by e-mail at Kristin.Miller@twdb.texas.gov.

Floodplain/Wetland:

The proposed project will not directly affect wetlands. Temporary floodplain impacts from construction will be addressed for erosion control and the waterline will be installed by trenchless method in any identified sensitive areas. No permanent floodplain impacts will result from the project.

The meeting can be accessed as follows:
