

Harvest Reminders

118646 County Road N, Edgar, WI 54426

N2491 US-45 South, Antigo, WI 54409

Claims: If you agree with your adjuster's appraisals, we encourage you to let the adjuster finish the claim process out. **Please do not withdraw** your claims even if you don't have a loss!

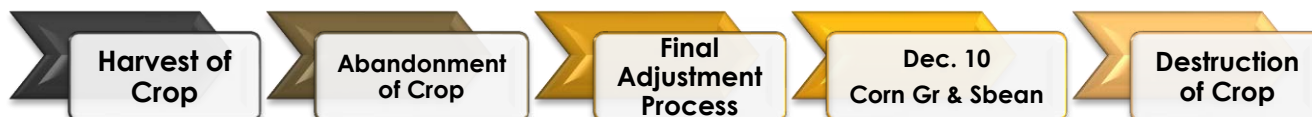

If you **disagree** with your adjuster's production numbers, please **do not** sign your claim! Contact your agent and we can help you.

Claim Deadlines: To start a claim, a Claim Notice must be given to your agent within the time frames specified below:

- ❖ Within **72 Hours** of discovery of possible loss
- ❖ Within **15 days** from the end of insurance
- ❖ Within **45 days** after release of **Harvest Prices** (Beginning of November) when the only loss is prices; not damage or yield

Dry Corn/Soybeans: If you have Revenue Protection and think you have a revenue or yield loss, please contact your agent to put a notice in. Do not wait until you have your weight slips to start your claim process.

End of Insurance: Your crop insurance ends on the earliest of:

Delayed Harvest: If you expect your crops will **NOT** be harvested by **December 10th**, please be sure to contact your insurance agent by **December 1st**.

Production Reports: Please be sure to keep accurate and detailed records of your production, as random audits are happening more frequently.

When reporting your yields, your agent will need to know the record type of how your yields were obtained (Weight tickets, appraisal, combine monitor, etc.). We also need to know if your yields were commingled across multiple sections or if each section was kept separate. Questions, please reach out to your agent.

Prices: The Spring price is used to establish your guarantee. This is based on the average market prices in February. The Spring price is applicable for Yield Protection and Revenue Protection.

The Fall/Harvest Price only pertains to policies that have Revenue Protection coverage. This is based on the average market prices for October and will be factored in with your harvest yields to determine if you have a loss.

Please sell your grain in the same farm name that your policy is written in!

Harvest Reminders

Commodity	Spring Price	Harvest Price
Corn- silage	\$35.00/ton	Not Applicable
Corn- grain	\$4.62/bushel	TBD/bushel
Soybeans	\$11.09/bushel	TBD/bushel

Crop Insurance Cover Crop Rebate: DATCP will be running the \$5 off Cover Crop program. You can only qualify for this program if you are NOT in any other program.

Dairy Revenue Protection (DRP): If you are interested in discussing DRP or requesting an update on market prices/premiums, please contact Cassie at 715-498-9042. The deadline for **1st Quarter for 2027 (Jan-Mar)** will be **December 15th**.

FSA: Fall seeded crops, including cover crops, need to be reported to FSA by **November 15th** or late fees will be applied!
