Application Guide:

- **Soil**
Apply 10-20 gal/A as starter fertilizer in a 2x2 or similar placement application as part of a balanced fertility program. Water may be added to increase rate as needed.

Pro-Start is premium starter fertilizer that contains key plant nutrients including patented Ortho-Ortho EDDHA chelate and high grade Fulvic Acid. Pro-Start is formulated as a starter fertilizer for use in row cropping systems. Benefits include improved early season vigor, an enhanced plant root system, as well as quickly supplying and holding needed nutrients in the root zone. Additional Micro's may be added as needed.
