

CRM:120 Positioning For:

Silk CRM: 117
GDUs to Silk: 1450
GDUs to Phy. Mat.: 2910

MANAGEMENT COMMENTS

- Leptra traited hybrid with dual mode of action control for ear feeding insects.
- High yielding dual purpose hybrid for grain or silage.
- Demonstrates ear flex under lower seeding rates.
- Position with care in fields with a known history of head smut and Fusarium ear rot.
- Planting into warmer soil conditions is recommended.

REFUGE
Integrated Refuge

- 95% (AVBL, YGCB, HX1, LL, RR2)
- 5% (LL, RR2)

MARKET SEGMENTS

HTF: High Total Fermentables (Dry-Grind Ethanol)

SUITABILITY RATINGS

KEY ENVIRONMENTS

Goss's Prone Fields Highly Suitable

SUITABILITY

High Residue Suitable
Corn After Corn Highly Suitable

SOILS

Early Planting/Cold Soils Poor Suitability
Coarse Textured Soils Suitable
Drought Prone Soils Manage Appropriately
Poorly Drained Soils Poor Suitability
High pH Soils Insufficient Data

CHARACTERISTIC SCORES

Drought Tol.	6
Stress Emergence	4
Root Strength	4
Stalk Strength	8
Mid-Season Brittle Stalk	7
Ear Ht.	6
Plant Ht.	8
Grain Drydown	7
Staygreen	8
Hybrid Family	P2088

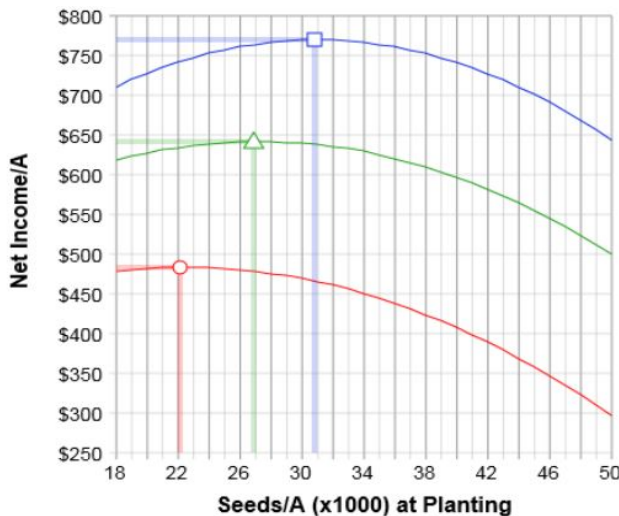

DISEASE SCORES

Goss's Wilt	7
Gray Leaf Spot	6
No. Leaf Blight	5

TRAIT SCORE RATINGS: 9 = Excellent; 1 = Poor; Blank = Insufficient Data.

ESTIMATED SEEDING RATE

Contact your Pioneer sales professional for additional information. Planting rate estimates provided for informational purposes only. Information here is provided for a hybrid family and not individual products. Product performance is variable and depends on many factors, such as soil type, management practices, environmental stress, disease, and pest pressure. Individual results may vary. Planting rate and seeding costs have been increased by 5% to account for early season stand loss.

P2088	
Grain Price:	\$3.50
Seed Cost:	\$3.50
Years Tested:	2011, 2012, 2013, 2014, 2015
Locations:	62

Optimum Planting Rate*		
Yield Goal	Seed Rate/A	Net Income/A
160	22,200	\$480
210	26,900	\$640
250	30,800	\$770

IMPORTANT: Trait rating scores provide key information useful in selection and management of Pioneer® brand products in your area. Information and ratings are based on comparisons with other Pioneer brand products, not competitive products. Information and scores are assigned by Pioneer Research Managers. Scores are based on period-of-years testing through 2021 harvest and were the latest available at time of printing. Some scores may change after 2022 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. All products within a hybrid family receive the same score unless observations indicate a significant difference. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision. Refer to www.pioneer.com or contact a Pioneer sales professional for the latest and most complete listing of traits and scores for each Pioneer brand product and for product placement and management suggestions specific to your operation and local conditions.
