 GDUs to Phy. Mat.: 2630

MANAGEMENT COMMENTS

- Leptra traited hybrid with dual mode of action control for ear feeding insects.
- Moderately statured plant with exceptional drought tolerance and good test weight.
- Above average Fusarium Ear Rot and Goss's Wilt tolerance.
- Consider fungicide applications in fields with a known history of Northern Leaf Blight.

REFUGE
 Integrated Refuge

- 95% (AVBL, YGCB, HX1, LL, RR2)
- 5% (LL, RR2)

MARKET SEGMENTS

HTF: High Total Fermentables (Dry-Grind Ethanol)

SUITABILITY RATINGS

KEY ENVIRONMENTS

Goss's Prone Fields Suitable

SUITABILITY

High Residue Suitable
 Corn After Corn Suitable

SOILS

Early Planting/Cold Soils Suitable
 Coarse Textured Soils Highly Suitable
 Drought Prone Soils Highly Suitable
 Poorly Drained Soils Suitable
 High pH Soils Insufficient Data

CHARACTERISTIC SCORES

Hybrid Family	P1464

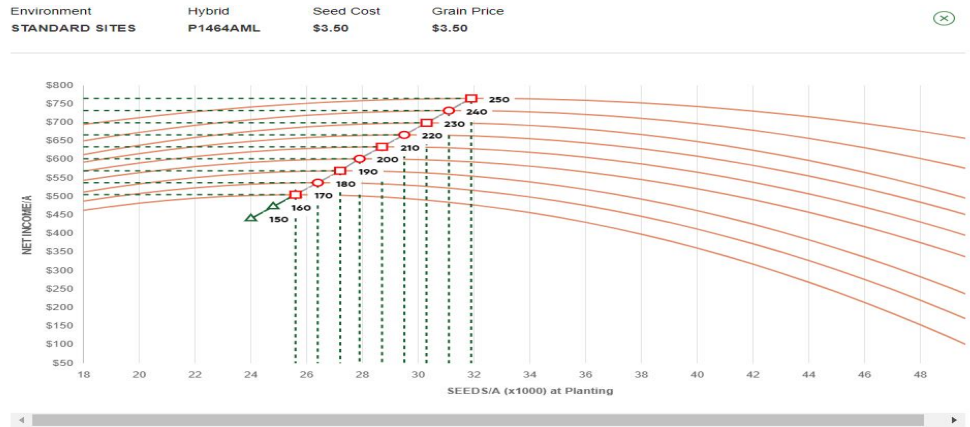

DISEASE SCORES

Goss's Wilt	6
Gray Leaf Spot	5
No. Leaf Blight	3

TRAIT SCORE RATINGS: 9 = Excellent; 1 = Poor; Blank = Insufficient Data.

ESTIMATED SEEDING RATE

Contact your Pioneer sales professional for additional information. Planting rate estimates provided for informational purposes only. Information here is provided for a hybrid family and not individual products. Product performance is variable and depends on many factors, such as soil type, management practices, environmental stress, disease, and pest pressure. Individual results may vary. Planting rate and seeding costs have been increased by 5% to account for early season stand loss.

Years Tested: 2018 2019 | **Locations:** 28
 Seeds/A (x 1000) at Planting* indicates PLANTER SETTING seeding rate assuming planting rate & seed cost were increased by 5% to account for early season stand loss.
Legend
 - Based on trend line estimates from data.
 - Extrapolated beyond trend line.

IMPORTANT: Trait rating scores provide key information useful in selection and management of Pioneer® brand products in your area. Information and ratings are based on comparisons with other Pioneer brand products, not competitive products. Information and scores are assigned by Pioneer Research Managers. Scores are based on period-of-years testing through 2021 harvest and were the latest available at time of printing. Some scores may change after 2022 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. All products within a hybrid family receive the same score unless observations indicate a significant difference. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision. Refer to www.pioneer.com or contact a Pioneer sales professional for the latest and most complete listing of traits and scores for each Pioneer brand product and for product placement and management suggestions specific to your operation and local conditions.
