

Harvest Preparation and Management

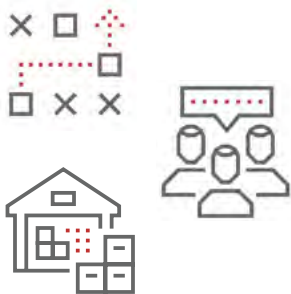

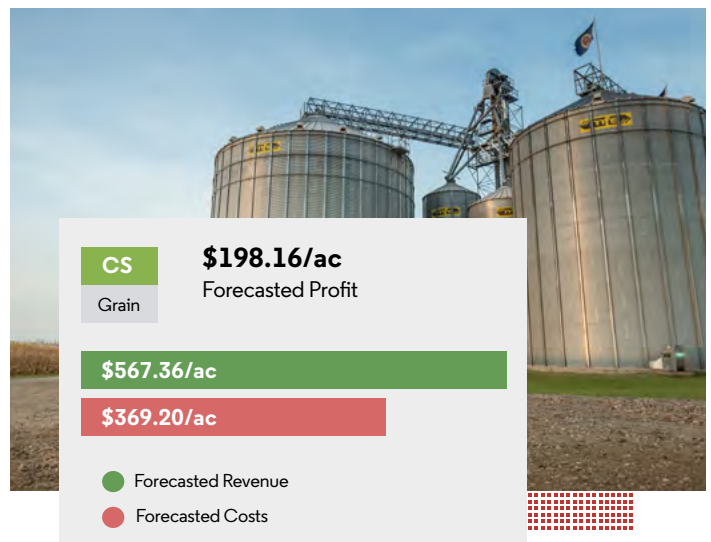

Why Granular Business for Harvest

Capture real-time harvest data from multiple sources, inform crop marketing decisions, and enhance stakeholder relationships

Make More Confident Decisions

- **Never miss a load:** Track every bushel, bale, or ton from field to storage to customers
- **Manage Inventory:** See real-time inventory balances by bin, location, and owner
- **Crop marketing:** Forecast revenue and profits

Manage Harvest with Unprecedented Control

- **Organize teams in less time:** Manage and prioritize your team's work from any device
- **Streamline data sources:** Whether you're leveraging work orders, machine data, or importing from scale software, track yield from field to bin
- **Analyze yield:** Determine financial impact of yield variability by field, crop, and landowner
- **Monitor contract fulfillment:** See what's contracted, what's been delivered, and what's left to deliver

Granular Business for Harvest — Why Now?

Catch Errors Before They Hit Your Bottom Line

- **Seamlessly manage the complexities of harvest:** Even if you farm across multiple counties, frequently bring on new operators, or deal with managing multiple crops and customers, Granular Business provides actionable oversight into your operation
- **Simplify reporting:** Easily get the right information to the right person, whether they are a landlord, lender, vendor, or customer
- **Get up and running in under two weeks:** Backed by industry expertise, our Customer Success and Professional Services Teams have the tools needed to quickly deliver results

“With Granular Business we know which fields are making the cut or not by understanding our field-level profits real-time and in season.”

– Justin Durdan, Durdan Farms, IL

“Not having to double-enter field records and scale tickets easily saves us 30+ hours per week and helps automate harvest reconciliation.”

– Mark Bryant, Bryant Ag, OH
