

CRM:109 Positioning For:

Silk CRM: 109
GDUs to Silk: 1360
GDUs to Phy. Mat.: 2580

MANAGEMENT COMMENTS

- Exciting Optimum® AQUAmax® hybrid provides consistent performance across variable soils.
- Strong leaf disease package.
- Excellent Goss's wilt tolerance.
- Good brittle stalk tolerance and strong late-season plant health.
- Consider placement on freshly strip-tilled or conventional tilled fields due to average roots.

MARKET SEGMENTS

AQ: Optimum® AQUAmax(TM) hybrids for water-limited environments
HTF: High Total Fermentables (Dry-Grind Ethanol)
HES: High Extractable Starch

SUITABILITY RATINGS

KEY ENVIRONMENTS

Goss's Prone Fields Highly Suitable

SUITABILITY

High Residue Suitable
Corn After Corn Highly Suitable

SOILS

Early Planting/Cold Soils Suitable
Coarse Textured Soils Highly Suitable
Drought Prone Soils Highly Suitable
Poorly Drained Soils Suitable
High pH Soils Suitable

11CH Updated as of 03/2022

IMPORTANT: Trait rating scores provide key information useful in selection and management of Pioneer® brand products in your area. Information and ratings are based on comparisons with other Pioneer brand products, not competitive products. Information and scores are assigned by Pioneer Research Managers. Scores are based on period-of-years testing through 2021 harvest and were the latest available at time of printing. Some scores may change after 2022 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. All products within a hybrid family receive the same score unless observations indicate a significant difference. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision. Refer to www.pioneer.com or contact a Pioneer sales professional for the latest and most complete listing of traits and scores for each Pioneer brand product and for product placement and management suggestions specific to your operation and local conditions.
