Positioning For:

**MANAGEMENT COMMENTS**

- High yielding hybrid with flexibility in placement on the farm
- Brings top-end yield and exceptional overall stress tolerance
- Shorter plant stature and low ear placement with strong stalks and roots late season
- Improvement in overall plant health, most notably GLS tolerance
- Outstanding drought tolerance and very good southern movement for its maturity

**REFUGE**

*Integrated Refuge*

- 95% (YGCB, HX1, LL, RR2)
- 5% (LL, RR2)

**MARKET SEGMENTS**

HTF: High Total Fermentables (Dry-Grind Ethanol)

**DISEASE SCORES**

Gray Leaf Spot	5
No. Leaf Blight	6
Anthr. Stalk Rot	4
Diplodia Ear Rot	4
Gibberella Ear Rot	6
Tar Spot	6**

TRAIT SCORE RATINGS: 9 = Excellent; 1 = Poor; Blank = Insufficient Data.

**IMPORTANT:** Trait rating scores provide key information useful in selection and management of Pioneer® brand products in your area. Information and ratings are based on comparisons with other Pioneer brand products, not competitive products. Information and scores are assigned by Pioneer Research Managers. Scores are based on period-of-years testing through 2021 harvest and were the latest available at time of printing. Some scores may change after 2022 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. All products within a hybrid family receive the same score unless observations indicate a significant difference. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision. Refer to [www.pioneer.com](http://www.pioneer.com) or contact a Pioneer sales professional for the latest and most complete listing of traits and scores for each Pioneer brand product and for product placement and management suggestions specific to your operation and local conditions.
