Positioning For:

MANAGEMENT COMMENTS

- New full season leader hybrid
- Moves north of zone well
- Average root strength with outstanding stalk strength
- would benefit from fungicide application

REFUGE

Integrated Refuge

- 95% (AVBL, YGCB, HX1, LL, RR2)
- 5% (LL, RR2)

MARKET SEGMENTS

HTF: High Total Fermentables (Dry-Grind Ethanol)
 HAE: High Available Energy (Monogastric Feed)

SUITABILITY RATINGS

KEY ENVIRONMENTS

High Yield Environment	Highly Suitable
Variable Yield Environment	Highly Suitable

SUITABILITY

Corn After Corn	Manage Appropriately
Late Harvest	Highly Suitable

SOILS

Drought-Prone Sandy Soils	Suitable
Early Planting/Cold Soils	Suitable

CHARACTERISTIC SCORES

Drought Tol.	6
Root Strength	5
Stalk Strength	7
Mid-Season Brittle Stalk	6

 11KF Updated as of 02/2022

IMPORTANT: Trait rating scores provide key information useful in selection and management of Pioneer® brand products in your area. Information and ratings are based on comparisons with other Pioneer brand products, not competitive products. Information and scores are assigned by Pioneer Research Managers. Scores are based on period-of-years testing through 2021 harvest and were the latest available at time of printing. Some scores may change after 2022 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. All products within a hybrid family receive the same score unless observations indicate a significant difference. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision. Refer to www.pioneer.com or contact a Pioneer sales professional for the latest and most complete listing of traits and scores for each Pioneer brand product and for product placement and management suggestions specific to your operation and local conditions.
