

Pioneer® Variety	RM	Tech. Segment	Characteristics and Disease Ratings										Poorly Drained Soils	Drought-Prone Soils	Irrigated	Early Planting	Wide Rows	Product Management Suggestions
P19A27PR	19	RR/Plenish™	Emergence	6	PRR	1c	SDS	6	Canopy Width	4	MA	MA	S	S	S		New VARIETY for early harvest. Good emergence, very good SDS tolerance, PEKING resistance and excellent late season standability. Plant early into productive soils. Watch plant height under stress.	
			Height	5	PFT	4	WMD	4	Metribuzin	4								
			Standability	7	FEY		SCN	PK	SU Tolerance	4								
P24A46PR	24	RR/Plenish™	Emergence	7	PRR	1k	SDS	6	Canopy Width	5	S	S	HS	S	S		High performing variety that will tolerate a wide range of yield environments. Great emergence with PEKING cyst resistance. Good plant height, should maintain height in high stress environments.	
			Height	5	PFT	4	WMD	5	Metribuzin	5								
			Standability	7	FEY		SCN	PK	SU Tolerance	5								
P27A26PR	27	RR/Plenish™	Emergence	8	PRR	1k	SDS	6	Canopy Width	6	S	S	HS	S	S		LEADER VARIETY with high yield potential. Stable product with PEKING SCN resistance. Shorter plant type with excellent emergence, standability and agronomics. Matures earlier than 2.7 maturity.	
			Height	4	PFT	5	WMD	6	Metribuzin	6								
			Standability	8	FEY		SCN	PK	SU Tolerance	6								
P28A74PR	28	RR/Plenish™	Emergence	7	PRR	1k	SDS	4	Canopy Width	5	MA	HS	S	S	S		Proven high yielding variety with PEKING SCN resistance. Stress tolerant genetics allows flexible placement. Manage below average white mold tolerance. Great harvest standability.	
			Height	5	PFT	4	WMD	3	Metribuzin	5								
			Standability	7	FEY	7	SCN	PK	SU Tolerance	5								
P28A83PR	28	RR/Plenish™	Emergence	8	PRR	1k	SDS	6	Canopy Width	4	S	S	S	S	S		Defensive companion variety to P28A74PR for the poorly drained challenging acre. Solid performance at all yield levels. Strong emergence and standability at harvest.	
			Height	5	PFT	5	WMD	6	Metribuzin	4								
			Standability	7	FEY	6	SCN	PI	SU Tolerance	4								
P29A57PR	29	RR/Plenish™	Emergence	7	PRR	1k	SDS	6	Canopy Width	5	S	S	HS	HS	HS		NEW LEADER PLENISH™ variety offering combining top yield potential and solid agronomics. Looks to fit every acres and package well with other Plenish varieties.	
			Height	5	PFT	7	WMD	5	Metribuzin	5								
			Standability	7	FEY		SCN	PI	SU Tolerance	5								
P30A46PR	30	RR/Plenish™	Emergence	7	PRR	1k	SDS	8	Canopy Width	4	S	HS	S	S	S		Top end yield potential with great agronomics. Above average plant height with solid standability. Strong SDS tolerance. Widely adapted placement on most soil types.	
			Height	5	PFT	6	WMD	5	Metribuzin	4								
			Standability	7	FEY	4	SCN	PI	SU Tolerance	4								
P30A93PR	30	RR/Plenish™	Emergence	7	PRR	1k	SDS	5	Canopy Width	4	HS	S	S	S	S		NEW VARIETY. High yield addition to the early group three Plenish lineup. Particularly fit for tigher day soils while having top end yield potential. Taller variety that stands well.	
			Height	5	PFT	7	WMD	5	Metribuzin	4								
			Standability	7	FEY	3	SCN	PI	SU Tolerance	4								
P31A48PR	31	RR/Plenish™	Emergence	7	PRR	1k	SDS	8	Canopy Width	4	S	HS	HS	S	S		NEW VARIETY. Top end yield potential with excellent agronomics. PEKING SCN resistance with excellent standability and white mold tolerance lend well to irrigated acres.	
			Height	5	PFT	6	WMD	5	Metribuzin	4								
			Standability	7	FEY	9	SCN	PK	SU Tolerance	4								
P34A59PR	34	RR/Plenish™	Emergence	7	PRR	1k, 3a	SDS	8	Canopy Width	5	HS	HS	HS	HS	S		Proven leader variety with PEKING SCN tolerance. Widely adapted for versatile placement for all yield environments. Stacked Phytophthora resistance gene. Excellent FEY and SDS tolerance.	
			Height	5	PFT		WMD	5	Metribuzin	5								
			Standability	6	FEY	8	SCN	PK	SU Tolerance	5								
P34A65PR	34	RR/Plenish™	Emergence	8	PRR	1k	SDS	5	Canopy Width	5	S	S	S	S	S		Companion variety to P34A59PR providing better harvest standability for productive soils. Good overall agronomics. Best suited for high yield environments.	
			Height	4	PFT	5	WMD	6	Metribuzin	5								
			Standability	7	FEY	6	SCN	PI	SU Tolerance	5								
P36A94PR	36	RR/Plenish™	Emergence	7	PRR	1k, 3a	SDS	8	Canopy Width	6	S	S	S	S	S		Top end yield potential with excellent agronomics. PEKING SCN resistance and stacked Phytophthora resistance gene. Excellent SDS tolerance and FEY resistance.	
			Height	5	PFT		WMD	5	Metribuzin	6								
			Standability	7	FEY	9	SCN	PK	SU Tolerance	6								
P37T51PR	37	RR/Plenish™	Emergence	6	PRR	1k	SDS	5	Canopy Width	6	HS	HS	HS	HS	HS		Proven variety providing high yield potential for productive acres and stability across a wide range of soils. Solid agronomics with above average PFT and height. Manage FEY with foliar fungicide.	
			Height	6	PFT	8	WMD	4	Metribuzin	6								
			Standability	6	FEY	4	SCN	PI	SU Tolerance	6								
SUITABILITY RATINGS: HS = Highly Suitable, S = Suitable, M = Manage. The environment in which the variety is planted heavily influences variety yield performance. Proper placement is important for optimum performance. Use this guide along with suggestions from your Pioneer territory manager, field agronomist or local sales professional. IMPORTANT: Positioning

BUSINESS CONFIDENTIAL - FOR REP USE ONLY																		

PRR (Phytophthora Resistance) SDS (Sudden Death Syndrome)  
PFT (Phytophthora Field Tolerance) WMD (White Mold)  
FEY (Frog Eye Leaf Spot) SCN (Soybean Cyst Nematode tolerance, PK=Peeking & PI=PI88788)  
Metribuzin and SU Tolerance ( Adequate Tolerance, Response Warning, Requires Careful Management)

\* Trait Scores on products are not final and subject to change.

\*\* All Pioneer products are varieties unless designated with LL, in which case some are brands.

Always follow grain marketing, stewardship practices and pesticide label directions. Varieties with the Glyphosate Tolerant trait (including those designated by the letter "R" in the product number) contain genes that confer tolerance to glyphosate herbicides. Glyphosate herbicides will kill crops that are not tolerant to glyphosate.

Always follow grain marketing, stewardship practices and pesticide label directions. Varieties with the Genity® Roundup Ready 2 Xtend® (RR2) trait contain genes that confer tolerance to glyphosate, the active ingredient in Roundup brand agricultural herbicides. Roundup brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Genity®, Roundup® and Roundup Ready 2 Xtend® are registered trademarks of Monsanto Technology LLC used under license. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible. Pioneer is a member of Excellence Through Stewardship® (ETS). Pioneer products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Pioneer policies regarding stewardship of those products. Crops and materials containing biotech traits may only be exported to or used, processed, or sold in jurisdictions where all necessary regulatory approvals have been granted for those crops and materials. It is a violation of national and international laws to move materials containing biotech traits across borders into jurisdictions where their import is not permitted. Growers should discuss these issues with their purchaser or grain handler to confirm the purchaser or handler's position on products being purchased. Excellence Through Stewardship® is a registered trademark of the Biotechnology Industry Organization.

DO NOT APPLY DICAMBA HERBICIDE IN-CROP TO SOYBEANS WITH Roundup Ready 2 Xtend® technology unless you use a dicamba herbicide product that is specifically labeled for that use in the location where you intend to make the application. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO MAKE AN IN-CROP APPLICATION OF ANY DICAMBA HERBICIDE PRODUCT ON SOYBEANS WITH Roundup Ready 2 Xtend® technology, OR ANY OTHER PESTICIDE APPLICATION, UNLESS THE PRODUCT LABELING SPECIFICALLY AUTHORIZES THE USE. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with soybeans with Roundup Ready 2 Xtend® technology. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Soybeans with Roundup Ready 2 Xtend® technology contain genes that confer tolerance to glyphosate and dicamba. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Roundup Ready 2 Xtend® is a trademark of Monsanto Technology LLC used under license. Always follow stewardship practices in accordance with the Product Use Guide (PUG) or other product-specific stewardship requirements including grain marketing and pesticide label directions. Varieties with BOLT® technology provide excellent plant back flexibility for soybeans following application of SU (sulfonylurea) herbicides such as DuPont(TM) LeadOff® or DuPont(TM) Basis® Blend as a component of a burn-down program or for double-crop soybeans following SU herbicides such as DuPont(TM) Finesse® applied to wheat the previous fall. Always follow grain marketing, stewardship practices and pesticide label directions. Varieties with the Glyphosate Tolerant trait (including those designated by the letter "R" in the product number) contain genes that confer tolerance to glyphosate herbicides. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. Always follow grain marketing, stewardship practices and pesticide label directions. Varieties with the Genity® Roundup Ready 2 Yield® (RR2Y) trait contain genes that confer tolerance to glyphosate, the active ingredient in Roundup brand agricultural herbicides. Roundup brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Genity®, Roundup® and Roundup Ready 2 Yield® are registered trademarks of Monsanto Technology LLC used under license. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible. Varieties with the DuPont(TM) STS® gene (STS) are known as certain SU (sulfonylurea) herbicides. This technology allows post-emergent applications of DuPont(TM) Synchrony® XP and DuPont(TM) Classic® herbicides without crop injury or stress (see herbicide product labels). NOTE: A soybean variety with a herbicide tolerant trait does not confer tolerance to all herbicides. Spraying herbicides not labeled for a specific soybean variety will result in severe plant injury or plant death. Always read and follow herbicide label directions and precautions for use. Varieties with the LibertyLink® gene (LL) are resistant to Liberty® herbicide. Liberty®, LibertyLink® and the Water Droplet Design are trademarks of Bayer. (-) = Variety does not contain a herbicide resistant gene. P = Plenish® high oleic soybeans for contract production only. Plenish® high oleic soybeans have an enhanced oil profile and are produced and channeled under contract to specific grain markets. Growers should refer to the DuPont Pioneer Product Use Guide on [www.pioneer.com/stewardship](http://www.pioneer.com/stewardship) for more information.
