

2027

SOYBEAN PRODUCTS

**P18Z01E™**

1.8 RM | PEKING SCN

- New ultra-early yield leader
- Stout agronomic package
- Improved charcoal rot for sandy soils

P19Z93E™ NEW

1.9 RM | PI88788 SCN

- Companion variety to P18Z01E
- Good white mold tolerance
- Strong emergence with good late season standability
- +0.8 bu over P18Z01E

P21Z71E™

2.1 RM | PEKING SCN

- Early season racehorse
- Has stress tolerance but may shrink on stressed soils
- Average White Mold tolerance

**P23Z82E™**

2.3 RM | PEKING SCN

- Strong standing/versatile line for every acre
- Good white mold tolerance
- Highly tolerant to Brown Stem Rot and SDS

**P23Z65E™ NEW**

2.3 RM | PI88788 SCN

- New companion for P23Z82E
- Very good standability and White Mold Tolerance
- Strong Frog Eye Leaf Spot tolerance
- +1.8 bu over P23Z82E

**P26Z86E™**

2.6RM | PI88788 SCN

- Dependable option for every acre
- Very good White Mold Tolerance and standability
- +1.2 bushel increase over P25A16E

P28Z30E™

2.8 RM | PI88788 SCN

- Very complete agronomic package in a high yield variety
- Good stress tolerance
- Strong Phytophthora package for tight/wet soils

**P28Z89E™**

2.8 RM | PEKING SCN

- Offensive new variety with a strong agronomic package
- Outstanding late season standability
- Good white mold tolerance

2027

SOYBEAN PRODUCTS

**P28Z56E™ NEW**

2.8 RM | PI88788 SCN

- First ever tri-Phytophthora genetic tolerance option for heavy, wetter soils
- Excellent SDS tolerance
- Rugged variety with great low-end stability
- -0.8 bu vs P28Z30E

**P31Z03E™**

3.1 RM | PI88788 SCN

- Versatile option for all Northern IN acres
- Good stress tolerance and ability to move on wet soils
- Average standability and Frog Eye tolerance

P32Z66E™ NEW

3.2 RM | PEKING SCN

- Outstanding yield potential with good standability
- Good emergence at planting
- Manage for White Mold
- +2.4 bul advantage over P32Z91E

**P29Z61E™**

2.9 RM | PI88788 SCN

- Yield leader with great adaptation and stress tolerance
- Good SDS tolerance but manage Frog Eye Leaf Spot
- Maintains height on stress soils but stands well on productive acres

**P32Z91E™**

3.2 RM | PEKING SCN

- Eastern adapted variety with very high yield potential
- Outstanding standability with good White Mold tolerance
- Strong Emergence package

**P36Z04E™**

3.6 RM | PEKING SCN

- Eastern adapted variety with very high yield potential
- Shorter plant with good standability
- 2.6 bu advantage over P33A62E

Glyphosate
Tolerant

STS®
herbicide tolerant trait

All Pioneer products denoted with TM are brand names.

Always follow stewardship practices in accordance with the Product Use Guide (PUG) or other product-specific stewardship requirements including grain marketing and pesticide label directions. **Varieties with BOLT® technology** provide excellent plant-back flexibility for soybeans following application of sulfonylurea (SU) herbicides such as DuPont™ LeadOff® or DuPont™ Basis® Blend as a component of a burndown program or for double-crop soybeans following SU herbicides such as DuPont™ Finesse® applied to wheat the previous fall.

Always follow grain marketing, stewardship practices and pesticide label directions. **Varieties with the Glyphosate Tolerant trait** (including those designated by the letter "R" in the product number) contain genes that confer tolerance to glyphosate herbicides. Glyphosate herbicides will kill crops that are not tolerant to glyphosate.

Varieties with the Roundup Ready 2 Yield® (RR2Y) trait: ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® technology contains genes that confer tolerance to glyphosate, an active ingredient in Roundup® brand agricultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate. Roundup Ready 2 Yield® is a trademark of Bayer Group.

Varieties with the STS® trait are tolerant to certain sulfonylurea (SU) herbicides. This technology allows post-emergent applications of DuPont™ Synchrony® XP and DuPont™ Classic® herbicides without crop injury or stress (see herbicide product labels). NOTE: A soybean variety with a herbicide tolerant trait does not confer tolerance to all herbicides. Spraying herbicides not labeled for a specific soybean variety will result in severe plant injury or plant death. Always read and follow herbicide label directions and precautions for use.

Varieties with the LibertyLink® (LL) gene are resistant to Liberty® herbicide. Liberty®, LibertyLink® and the Water Droplet Design are registered trademarks of BASF.

DO NOT APPLY DICAMBA HERBICIDE IN-CROP TO SOYBEANS WITH Roundup Ready 2 Xtend® technology unless you use a dicamba herbicide product that is specifically labeled for that use in the location where you intend to make the application. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO MAKE AN IN-CROP APPLICATION OF ANY DICAMBA HERBICIDE PRODUCT ON SOYBEANS WITH Roundup Ready 2 Xtend® technology, OR ANY OTHER PESTICIDE APPLICATION, UNLESS THE PRODUCT LABELING SPECIFICALLY AUTHORIZES THE USE. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with soybeans with Roundup Ready 2 Xtend® technology. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Soybeans with Roundup Ready 2 Xtend® technology contain genes that confer tolerance to glyphosate and dicamba. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Roundup Ready 2 Xtend® is a registered trademark of Monsanto Technology LLC used under license.

Varieties with Enlist E3® technology (E3): The transgenic soybean event in Enlist E3® soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies L.L.C. Following burndown, Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist® crops. Consult Enlist® herbicide labels for weed species controlled. Enlist Duo and Enlist One herbicides are not

registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY; and have additional subcounty restrictions in AL, GA, TN and TX, while existing county restrictions still remain in FL. All users must check "Bulletins Live! Two" no earlier than six months before using Enlist One or Enlist Duo. To obtain "Bulletins," consult epa.gov/essp/, call 1-844-447-3813, or email ESSP@epa.gov. You must use the "Bulletin" valid for the month and state and county in which Enlist One or Enlist Duo are being applied. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist® herbicides in your area. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO USE ANY PESTICIDE PRODUCT OTHER THAN IN ACCORDANCE WITH ITS LABELING. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CROPS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS, IN ADDITION TO CIVIL AND/OR CRIMINAL PENALTIES. Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at www.traitstewardship.com.

Plenish® (P) high oleic soybeans have an enhanced oil profile and are produced and channeled under contract to specific grain markets. Growers should refer to the Pioneer Product Use Guide on www.pioneer.com/us/stewardship for more information.

Pioneer® brand products are provided subject to the terms and conditions of purchase which are part of the labeling and purchase documents.
