

Corn Grain:

P1656WAM (AM,LL,RR2)

Additional Products in this Family: P1656WAM (AM,LL,RR2) | P1656W

CRM:116

Silk CRM: 119

GDUs to Silk: 1480

Phy. CRM: 114

GDUs to Phy. Mat.: 2760

Positioning For:

MANAGEMENT COMMENTS

- Exciting White Hybrid that brings outstanding top end yield potential.
- Tall hybrid with strong stalks and average roots.
- Very good resistance to NCLB, moderate GLS resistance, and strong staygreen
- Slightly below average resistance to mid-season brittle stalk

REFUGE

Integrated Refuge

- 95% (YGCB, HX1, LL, RR2)
- 5% (LL, RR2)

MARKET SEGMENTS

WH: White food corn

HTF: High Total Fermentables (Dry-Grind Ethanol)

11KE Updated as of 02/2022

IMPORTANT: Trait rating scores provide key information useful in selection and management of Pioneer® brand products in your area. Information and ratings are based on comparisons with other Pioneer brand products, not competitive products. Information and scores are assigned by Pioneer Research Managers. Scores are based on period-of-years testing through 2021 harvest and were the latest available at time of printing. Some scores may change after 2022 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. All products within a hybrid family receive the same score unless observations indicate a significant difference. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision. Refer to www.pioneer.com or contact a Pioneer sales professional for the latest and most complete listing of traits and scores for each Pioneer brand product and for product placement and management suggestions specific to your operation and local conditions.
