

PIONEER® BRAND POWERCORE® ENLIST® REFUGE ADVANCED® CORN PRODUCTS

P10796PCE 110 CRM/108 Silk CRM

NEW

PowerCore® Enlist®: An advanced combination of high-yielding genetics, unsurpassed flexibility and protection against above-ground insects stacked with the Enlist® corn trait for multiple modes of action against tough weeds.

Management Insights

- Early silking 110 CRM product with good drought tolerance that offers consistent performance across moderate and high yielding acres
- Slightly below average ear height and above average root strength should help in-season standability
- Very good Northern corn leaf blight resistance, good staygreen and above average test weight
- Average resistance to tar spot and gray leaf spot and slightly below average mid-season brittle snap resistance

Suitability and Placement Guide

Highly Suitable	Poorly Drained Soils
Suitable	Continuous Corn
Manage Appropriately	Late Harvest
Poor Suitability	High Residue
	Drought Prone Soils
	Early Planting/Cold Soils

P10796PCE

PCE - Powercore® Enlist® Refuge Advanced® corn products with HX1, VTP, ENL, LL, RR2. Contains a single-bag integrated refuge solution for above-ground insects. In EPA-designated cotton-growing counties, a 20% separate corn borer refuge must be planted with PowerCore Enlist Refuge Advanced products. **HX1** - Contains the Herculex® I insect protection gene which provides protection against European corn borer, southwestern corn borer, black cutworm, fall armyworm, lesser corn stalk borer, southern corn stalk borer, and sugarcane borer, and suppresses corn earworm. **LL** - Contains the LibertyLink® gene for resistance to glufosinate herbicide. **RR2** - Contains the Roundup Ready® Corn 2 trait that provides crop safety for over-the-top applications of labeled glyphosate herbicides when applied according to label directions. **AQ** - Optimum® AQUAmax® product. **Product performance in water-limited environments is variable and depends on many factors such as the severity and timing of moisture deficiency, heat stress, soil type, management practices and environmental stress as well as disease and pest pressures. All products may exhibit reduced yield under water and heat stress. Individual results may vary.**

NEW

PowerCore® Enlist®: An advanced combination of high-yielding genetics, unsurpassed flexibility and protection against above-ground insects stacked with the Enlist® corn trait for multiple modes of action against tough weeds.

Management Insights

- High yield potential 111 CRM product with strong southern movement and consistent performance best suited for moderate and high yielding acres
- Above average staygreen and stalk strength and respectable overall disease resistance including average Gray Leaf Spot, tar spot and Northern corn leaf blight resistance
- Above average stress emergence which is beneficial when conditions after planting are predicted cold and wet
- Slightly below average mid-season brittle snap tolerance
