SUITABILITY

Silage	Highly Suitable
Grazing	Suitable
Hay	Suitable
Green Chop	Suitable
High Grain Content Forage	Suitable

MANAGEMENT COMMENTS

- 68 RM slick leaf Forage Sorghum with best in-class Sugarcane Aphid Tolerance.
- Highly suitable option for high yielding, high grain content silage.
- Moderate plant height with excellent stalk strength and root strength.
- Similar to other sorghum forages, appropriate management practices should be used to avoid issues with prussic acid and/or nitrates.

SUGARCANE APHID TOLERANCE: Pioneer® brand sorghum hybrids with the Pioneer Protector® technology designation have a sugarcane aphid tolerance rating of 5 or greater.

IMPORTANT: Trait rating scores provide key information useful in selection and management of Pioneer® brand products in your area. Information and ratings are based on comparisons with other Pioneer brand products, not competitive products. Information and scores are assigned by Pioneer Research Managers. Scores are based on period-of-years testing through 2020 harvest and were the latest available at time of printing. Some scores may change after 2021 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. All products within a hybrid family receive the same score unless observations indicate a significant difference. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision. Refer to www.pioneer.com or contact a Pioneer sales professional for the latest and most complete listing of traits and scores for each Pioneer brand product and for product placement and management suggestions specific to your operation and local conditions.
