SUMMARY OF OUR INDUSTRY

CHEMICALS SECTOR

As per Chemexcil (Chemicals Export Promotion Council), India’s agrochemical export was estimated to be at US\$ 1.04 billion from April 2023-June 2023 (Provisional). Indian colorants industry has emerged as a key player with a global market share of ~15%. The country’s chemicals industry is de-licensed, except for few hazardous chemicals. India has traditionally been a world leader in generics and biosimilars and a major Indian vaccine manufacturer, contributing more than 50% of the global vaccine supply. India holds a strong position in exports and imports of chemicals at a global level and ranks 14th in exports and 8th in imports at global level (excluding pharmaceuticals). From April 2023 to June 2023 (provisional), India’s dye exports (Dyes and Dye Intermediates) totalled US\$ 561.56 million.

HERBICIDES:

Farmers have faced weed-related issues and solutions from the beginning of agricultural history. Farmers' ability to lessen crop-weed competition expanded with the introduction of tractors and improvements in mechanization tools. However, the development of synthetic and related herbicides gave farmers, horticulturists, and foresters the ability to manage broad leaf weeds in broad leaf crops, narrow leaf weeds in narrow leaf crops, or broad leaf weeds in narrow leaf crops in addition to narrow leaf weeds in broad leaf crops.

The earliest attempt to control weeds in India with herbicides was made in 1937 in Punjab for controlling *Carthamus oxyacantha* by using sodium arsenite. 2,4-D was first tested in India in 1946. Since then, a number of herbicides have been imported and tried for their effectiveness in controlling many weed species.

The herbicide use, in comparison to industrialized countries, is significantly low in India till today. Albeit the crop loss is more due to the weed infestation than that caused by other pests.

The Ministry of Agriculture, Government of India regulates the manufacture, sale, import, export and use of herbicides through the 'Insecticides Act, 1968'. Central Insecticides Board (CIB) constituted under Section 4 of the Act advises Central and State Governments on technical matters. The Registration Committee (RC) constituted under section 5 of the Act approves the use of pesticides and new formulations to tackle the pest problem in various crops. The Registration Committee is responsible to register pesticides after scrutinizing the chemistry, bio efficacy and toxicology of the products.

Herbicides applied in combination either pre-plant incorporated or pre-emergence or postemergence generally increase the spectrum of weed control or the length of residual weed control. Tank-mixing of herbicides may improve the spectrum of weeds controlled in a single application which saves time and labour in a weed management programme. Mixing compatible herbicides from different chemical families may improve control of specific weed populations. Herbicide combinations may also provide control of several weed types at the same time, such as grassy and broadleaf weeds.

INTERNAL RISK FACTORS

*Risk Factor No. 1 of Draft Red Herring Prospectus stands removed as the same has been rectified and the same has not been considered as material disclosure.

- 1. A few of our properties including Registered Office of our Company, are not owned by us. In the event, we are unable to renew the lease/rent agreements, or if such agreements are terminated, we may suffer a disruption in our operations.**

Some of our business premises which include Registered Office of our Company, are taken on lease of varying tenures. These leases are renewable on mutually agreed terms. Upon termination of the lease, we are required to return the said business premises to the Lessor/Licensor, unless renewed. There can be no assurance that the term of the agreements will be renewed and in the event the Lessor/Licensor terminates or does not renew the agreements on commercially acceptable terms, or at all, and we are

required to vacate our offices, we may be required to identify alternative premises and enter into fresh lease or leave and license agreement. Such a situation could result in loss of business, time overruns and may adversely affect our operations and profitability. For details on properties taken on lease/rent by us please refer to the heading titled “Our Properties” in chapter titled “Business Overview” beginning on page 139 of this Red Herring Prospectus.

2. Rajasthan State Pollution Control Board has directed the company to deposit the amount to the tune of Rs.1,92,02,400 towards environment compensation.

Rajasthan State Pollution Control Board has directed to our company to deposit the amount to the tune of Rs.1,92,02,400 towards environmental compensation. In response to this, we have filed an appeal before National Green Tribunal. Our inability to get the favorable order from NGT to set aside the direction or any other adverse order from NGT may lead us to pay the directed amount and our inability to pay such amount can have adverse effect on our business.

3. Our Board of Directors and Management may change our operating policies and strategies without prior notice or shareholders’ approval.

Our Board of Directors and Management has the authority to modify certain of our operating policies and strategies without prior notice (except as required by law) and without shareholder’s approval. We cannot predict the effect of any changes to our current operating policies or strategies, on our business, operating results and the price of our Equity Shares.

4. Some of the raw materials that we use as well as our finished products are hazardous, corrosive and flammable and require expert handling and storage, as applicable. Any accidents may result in loss of life or property and disrupt our operations which may have an adverse effect on our results of operation, cash flows and financial condition

Certain of the raw materials that we use are hazardous, corrosive and flammable and require expert handling and storage, as applicable. Any failure of our control systems, mishandling of hazardous chemicals, leakages, explosion or any adverse incident related to the use of these chemicals or otherwise during the manufacturing process, transportation, handling or storage of products and certain raw materials, may cause industrial accidents, fire, loss of human life and property, damage to our and third-party property and / or environmental damage, require shutdown of one or more of our manufacturing facilities and expose us to civil or criminal liability. The occurrence of any such event in the future may adversely affect our reputation and may also result in a loss of life or property which in turn could lead to disruption of our operations, resulting in an adverse effect on our results of operations, cash flows and financial condition. The improper storage or mishandling of our products during transit may compromise the quality of the products being delivered to our customers and can potentially expose us to liabilities and claims which could adversely affect our brand image and reputation and have a material and adverse effect on our business prospects, results of operations and financial condition

5. Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution and actual cost may vary compared with the estimated amount.

Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by bank or financial institution and are based on our estimates. In view of the competitive and dynamic nature of our business, we may have to revise our expenditure and fund requirements as a result of variations including in the cost structure, changes in estimates and other external factors, which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the expenditure for a particular purpose from its planned expenditure at the discretion of our board. In addition, schedule of implementation as described herein are based on management’s current expectations and are subject to change due to various factors some of which may not be in our control.

The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors/Management and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

6. Substantial portion of our revenues has been dependent upon our few clients. The loss of any one or more of our major clients would have a material adverse effect on our business operations and profitability.

We haven't entered into any long-term agreement with our customers. Our Top 5 Customers contribute 98.63% revenue in the stub period and 98.88% in the Financial Year 2022-23. The loss of our major customers or a decrease in the volume of products sourced from us may adversely affect our revenues and profitability. We cannot assure you that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our operations and profitability.

7. Our Company, Promoters, Directors and group Companies are involved in certain litigations including tax related litigations, which if determined against them/us, can affect financial conditions of our company.

We cannot assure you that these legal proceedings will be decided in favour of our Company, Promoter, and Directors, as the case may be, or that no further liability will arise out of these proceedings. If any new developments arise, such as change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our Restated Financial Statements that could increase our expenses and current liabilities. Further, such legal proceedings could divert management time and attention and consume financial resources. Any adverse outcome in any of these proceedings may have an adverse effect on our results of operations and financial condition. Further, there is no assurance that legal proceedings will not be initiated against our Company, its directors, Promoters in future. For details kindly refer the chapter titled "Outstanding Litigation and Material Developments" beginning on page no. 286 of this Red Herring Prospectus.

8. We require a number of approvals, licenses, registration and permits for our business and failure to obtain or renew them in a timely manner may adversely affect our operations. In some cases, we may be operating without all the required permissions, risking civil and criminal sanctions.

We may require several statutory and regulatory permits, licenses and approvals in the ordinary course of our business. Many of these approvals are granted for fixed periods of time and some need renewal from time to time. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension, delay in issuance or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business.

9. Our results of operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees / workers or any other kind of disputes with our employees / workers.

We operate in a labor-intensive industry. There can be no assurance that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may adversely affect our business and results of operations.

10. Our Company has obtained insurance coverage which may not adequately cover all potential losses to which we may be subject to, and this may have a material adverse effect on our business, result of operations and financial conditions.

Our insurance coverage may not adequately protect us against certain operating hazards and this may have a material adverse effect on our business. There can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part or on time. Accordingly, to the extent that we suffer loss or damage that is not covered by insurance or which exceeds our insurance coverage, our results of operations or cash flows may be affected. There is a risk that our insurance policies may not be sufficient in covering all losses in which we or any third parties may suffer. If we suffer in an event for which we are not adequately insured, there is a risk that it could have a material adverse effect on our business, results of operations and financial condition.

In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial performance could be adversely affected. Further our two-wheeler, public liability industrial, Standard Fire and Special Perils Policy and Workmen Compensation insurance policy were expired and we applied for the renewal of the same.

11. The seasonality of the business of the issuer may affect the business of the issuer

Our business is divided in into Two seasons, namely Kharif (Summer and Rainy Season) and Rabbi (Winters Season). In general, during both the seasons company performs well in terms of Sales but the transition time from Rabbi to Kharif i.e. monsoon season is mainly a non- season which lasts for approx. 2 months which slightly affects the demand of our products in market. Though it is not pertinent to comment on the environmental changes, still the season change affects the sales pattern of business. We do not consider seasonality change a major risk factor but as it remains unpredictable how the market reacts to environmental and global changes it somehow shows unfavourable changes affecting the business. To counter the seasonality effects the company exports during the transition phase from Kharif to Rabbi.

However, there is no loss occurred in the past due to the seasonality in the company.

12. Our business and the demand for our products is reliant on the success of our customers' products with end consumers and any decline in the demand for the end products could have an adverse impact on our business, results of operations, cash flows and financial condition.

Our revenue is attributable to Crop Care and Specialty Chemicals. The demand for our products and margin of our products is dependent on and directly affected by factors affecting these industries. Consequently, any reduction in demand or a temporary or permanent discontinuation of manufacturing of products on account of breakthrough in the development or invention of alternate formulations, may expose us to the risk of our products becoming obsolete or being substituted by such alternatives. Any failure on our part to effectively address such situations or to successfully introduce alternate products or the shifting of the practice in these industries towards developing substitutes of our products could adversely affect our business, results of operations, financial condition and cash flows. Before we can introduce a new product, we must successfully execute a number of steps that involve a significant lead time, obtaining the requisite regulatory approvals and registrations, customizing our production capacities, scaling our vendor, production and infrastructure networks, getting relevant customer approval post undertaking their audit processes and effective marketing strategies. Our failure to effectively adapt to the situations or to successfully introduce new products or new applications, under unpredicted circumstances could adversely affect our business, results of operations and financial condition as we have in the past experienced a slowdown in the demand for our products and delays in new product development. Further, we cannot assure you that we will be able to successfully make timely and cost-effective enhancements and additions to our technological infrastructure, keep up with technological improvements in order to meet our customers' needs or that the technology developed by others will not render our products less competitive or attractive. Our failure to successfully adopt such technologies in a cost effective and a timely manner could increase our costs and lead to us being less competitive in terms of our prices or quality of products. The development and commercialization process of a new product would require us to spend considerable time and money. Delays in any part of the process, our inability to obtain necessary regulatory approvals for our products or failure of a product to be successful at any stage could adversely affect our business.

13. Our Promoters, directors and group company has given personal guarantees in relation to certain debt facilities provided to us.

Our Promoters, directors and group company has given personal guarantees in relation to our secured debt facilities availed from our Bankers as stated in below table. In the event any of these persons withdraws or terminates its/their guarantee, the lender for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. Facility provided as follow:

S. No.	Name of Bank	Nature of Facility	Amount	Tenure
1.	Aditya Birla Capital	Term Loan	11,5000,000/-	144 Months
2.	Aditya Birla Capital	Drop Line LOC	30,000,000/-	84 Months
3.	NP1 Capital Trust	Non-Convertible Debentures	50,000,000/-	24 Months
4.	RevX Capital	Non-Convertible Debentures	50,000,000/-	24 Months
5.	UC Inclusive Credit Private Limited	Revolving Line of Credit	50,000,000/-	4 Months

14. Our business is dependent on our manufacturing facilities and we are subject to certain related risks. Unplanned slowdowns, unscheduled shutdowns or prolonged disruptions in our manufacturing operations or underutilization of our manufacturing capacities could have an adverse effect on our business, results of operations, cash flows and financial condition.

Our business is dependent on our ability to manage our manufacturing facility situated at Sotanala, Rajasthan, including productivity of our workforce, compliance with regulatory requirements or changes in the policies of the state or local governments of this region or the Government of India and those instances which are beyond our control, such as the breakdown and failure of equipment or industrial accidents and severe weather conditions and natural calamities or civil disasters and pandemics, including the COVID-19 pandemic which caused certain disruptions in our operations

Our manufacturing facility is subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, strikes, lock-outs, earthquakes and other natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. The occurrence of any of these risks could significantly affect our operating results.

In addition, we may be required to shut down our manufacturing facilities for various reasons such as maintenance, inspection, testing and capacity expansion. Further, the capacity utilization at our manufacturing facilities is subject to various factors such as availability of raw materials, power, water, efficient working of machinery and equipment and optimal manufacturing planning.

In the event there are any disruptions at our manufacturing facilities, due to natural or man-made disasters, workforce disruptions, regulatory approval delays, fire, failure of machinery, lack of access to assured supply of electrical power and water at reasonable costs or any significant social, political or economic disturbances, could reduce our ability to meet the conditions of our contracts, manufacture our products and adversely affect sales and revenues from operations in such period. Although we have not faced any such instances till the date of this Red Herring Prospectus.

15. Our existing manufacturing operation is geographically located at one place. Hence, we may face the risk of geographical non-diversification of manufacturing facilities.

Although we exercise centralized control, being a single point manufacturing facility will prove to be disadvantageous at times because of any disruption on account of labour unrest, power failures, natural calamities, or civic unrest. Our operations will have to be stalled which will impact our production, delivery of goods and financial results.

16. We are subject to strict quality requirements, regular inspections and audits, and the success and wide acceptability of our products is largely dependent upon our quality controls and standards.

Our products have end uses in mainly Pharma, Agro Specialty chemical. Given the nature of our products, adherence to quality standards is a critical factor in our manufacturing process. Our customers maintain strict quality standards that includes strict qualification and certification procedures. Our products go through various quality checks at various stages at our manufacturing facilities. While we have quality control systems in place, there can be no assurance that such quality controls may not be subject to failure. Failure of our products to meet the quality standards expected by our customers may result in rejection and reworking of our products. Any manufacturing or quality control problems may subject us to regulatory action, damage our reputation and have an adverse effect on our business, results of operations, financial condition and cash flows. However, company has all the business license and ISO Quality certificates to maintain the quality of the product. *Details pertaining to business license and ISO Certificate you may refer at page no. 139 in the “Business Overview Chapter”.*

17. Any increase in the cost of our raw material or other purchases or a shortfall in the supply of our raw materials, may adversely affect the pricing and supply of our products and have an adverse effect on our business, results of operations and financial condition.

The success of our operations depends on a variety of factors, including our ability to source raw materials at competitive prices. Raw material supply and pricing can be volatile due to a number of factors beyond our control, including demand and supply, general economic and political conditions, transportation and labour costs, natural disasters, pandemic, competition and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use. We seek to source our raw materials from reputed suppliers and typically seek quotations from multiple suppliers. We typically do not enter into long-term agreements with our suppliers. We may be required to track the supply demand dynamics and regularly negotiate prices with our suppliers in case of significant fluctuations in raw material prices or foreign currency fluctuations.

Further, any increase in raw material prices may result in corresponding increases in our product costs. Our ability to pass on any increases in the costs of raw materials and other inputs to our customers may be limited. There may be a significant difference in the price of raw materials when raw materials are ordered and paid for and the prevailing price when the raw materials are received and we may not be able to pass on the difference in the prices to our customers. A failure to maintain our required supply of raw materials, and any inability on our part to find alternate sources for the procurement of such raw materials, on acceptable terms, could adversely affect our ability to deliver our products to our customers in an efficient, reliable and timely manner, and consequently adversely affect our business, results of operations and financial conditions.

18. Our Company has allotted Equity Shares at a price lower than the Issue Price during last 12 (twelve) months preceding the date of this Red Herring Prospectus.

During last 12 (twelve) months preceding the date of this Red Herring Prospectus, in October 2023, our Company has made allotment of 9,39,399 Fully Paid-up Equity Shares of ₹10/- each at ₹ 49.5 per Equity Share, i.e. at price lower than the Issue Price. For further details please refer the section titled “Capital Structure” on page 77 of this Red Herring Prospectus.

19. We are dependent on our management team for success whose loss could seriously impair the ability to continue to manage and expand business efficiently.

Our success largely depends on the continued services and performance of our management and other key personnel. The loss of service of the management team and staff could seriously impair the ability to continue to manage and expand the business efficiently. Further, the loss of any of the senior management or other key personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to implement new projects and expand our business.

20. Our company has a negative cash flow in some of the previous years, details of which are given below. Sustained negative cash flow could impact our growth and business.

Our Company had negative cash flows from our operating activities, investing activities as well as financing activities in some of the previous year(s) as per the Audited Restated Financial Statements and the same are summarized as under:

Particulars	(Amt in Lakhs)			
	As on January 31, 2024	As on March 31, 2023	As on March 31, 2022	As on March 31, 2021
Cash Flow from/ (used in) Operating Activities	(823.44)	944.11	560.73	274.31

Cash Flow from/ (used in) Investing Activities	(141.55)	(308.55)	(75.30)	(116.71)
Cash Flow from/ (used in) Financing Activities	947.13	(623.37)	(507.64)	(149.02)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow in future, it may adversely affect our business and financial operations.

21. Our Company is reliant on certain suppliers and customers for the majority of its operations. The loss of any one or more of them would have a material adverse effect on our business operations and profitability.

Company relies significantly on specific suppliers and customers to conduct the majority of its operations. This dependence poses inherent risks to the Company's business continuity and financial performance. Any disruption in the supply of raw materials from these key suppliers or a decrease in demand from customers could adversely affect the Company's production capabilities, revenue streams, and profitability.

Furthermore, the Company's heavy reliance on these suppliers and customers may limit its ability to negotiate favourable terms, diversify its supplier base, or explore alternative sales channels. As a result, the Company may be more vulnerable to changes in market conditions, supplier or customer financial instability, or other external factors beyond its control.

22. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all relevant statutory and regulatory compliances. However, there can be no assurance that deficiencies in our internal controls will not arise or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected. However, no such instances have occurred in the company's history.

23. We depend on the accuracy and completeness of information about customers and counterparties and any misrepresentation, errors in or incompleteness of such information could cause our business to suffer.

In deciding whether to extend credit or enter into other transactions with customers, we rely on information furnished to us by or on behalf of customers. We may also rely on certain representations from our customers as to the accuracy and completeness of that information. For ascertaining the credit worthiness, we do not obtain any independent support from credit information companies or credit bureaus and/or independent valuers in relation to the value of the net worth of such parties. Our reliance on any misleading information given may affect our judgment of credit worthiness of potential customers, which may affect our business, prospects, results of operations and financial condition.

24. All of our product verticals are extremely competitive segments and we face risk of competition affecting our margins and profitability as we scale our operations.

Our purchase and sales models include various intermediaries who may connect with our competitors and share details of the specialties of our products or our sourcing processes etc. We may not be able to protect our trade secrets and may not be able to detect the same as well. We have not entered into any non-disclosure agreements with our intermediaries and thus our efforts towards marketing of our products may be leaked to other players in the market. This may affect the demand and exclusivity of our products and make us subject to fierce competition thereby adversely affecting our business, financial condition and results of operations.

25. Failure to procure inventory could have an adverse effect on our net sales, profitability and cash flow.

Our Company works on a model wherein the inventory/goods are procured by us based on the demand or customer requirement. Our inability to procure the inventory/goods in timely manner will adversely affect our net sales, profits and cash flow. Further, our inability to supply the inventory/goods in timely manner to our customers, may result in loss of business from the said customer and thereby decrease in our net sales and profitability.

26. We could be exposed to risks arising from misconduct, fraud and trading errors by our employees and Business Associates.

Frauds or other delinquencies by employees could include indulging in transactions that exceed authorized limits or present unacceptable risks to us; hiding unauthorized or unsuccessful trading activities from us; or the improper use of confidential information. Such misconduct could result in unacceptable business risks, losses, invite regulatory sanctions and seriously harm our reputation and could even lead to litigation. The precautions we take to prevent and detect these activities may not be effective. Any delinquencies or trading errors on the part of our employees could materially affect our business operations, financial position and/or reputation. However, no such instances have occurred in the company's history.

27. Our insurance coverage may not be sufficient or adequate to protect us against all material hazards or business losses, which may adversely affect our business, results of operations and financial condition.

Our operations are subject to hazards including inherent in chemical manufacturing facilities. Our principal types of coverage include Public Liability Insurance, anti-burglary policy, accident policy. We could be held liable for accidents that occur at our manufacturing facilities or otherwise arising out of our operations. In the event of personal injuries, fires or other accidents suffered by our employees or other people, we could face claims alleging that we were negligent, provided inadequate supervision or be otherwise liable for the injuries. While we believe that the insurance coverage which we maintain would be reasonably adequate to cover the normal risks associated with the operation of our business, to the extent that we suffer loss or damage, for which we have not obtained or maintained insurance, or which is not covered by insurance, which exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations and financial condition could be adversely affected. In addition, our insurance policies expire from time to time and we may not be able to renew our policies in a timely manner, or at acceptable cost.

We cannot assure you that, in the future, any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. Further, an insurance claim once made could lead to an increase in our insurance premium, result in higher deductibles and also require us to spend towards addressing certain covenants specified by the insurance companies.

28. We have certain contingent liabilities, which, if materialized, may affect our financial condition and results of operations.

Our contingent liabilities as per AS 29 as of January 31, 2024 were as follows:

Particulars	As at January 31, 2024 (Amt in Lakhs)
Outstanding Tax Demand with Respect to any Revenue Authorities	870.88

For further details of the contingent liabilities and commitments of our Company, see **Annexure XII “Restated Financial Information – Contingent Liabilities”** starting from page 270. If a significant portion of these liabilities materialize, it could have an effect on our results of operations and financial condition. Further, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

29. Our Company has entered into certain related party transactions and may continue to do so in the future.

Our Company have entered into various transactions with our Directors/ Promoter and Promoter Group members in the Past years. These transactions, inter-alia include, remuneration, loans and advances, etc. For details, please refer to “Annexure-IX- Related Party Transactions” under Section titled “Financial Information of the Company” of this Red Herring Prospectus. Our Company has entered such transactions on arms-length price in compliance with provisions of Companies Act, 2013 and other applicable laws. Although all related-party transactions that we may enter into in the future are subject to approval by Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions are not entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future, the same will be in compliance with the Companies Act 2013 & applicable Laws.

30. We depend on certain brand names and our corporate name and logo that we may not be able to protect and/or maintain.

Currently our company is using  as logo, which is not owned by it. Currently, we do not have registered trademarks for our corporate name and logo under the Trade Marks Act, 1999. Consequently, we do not enjoy the statutory protections accorded to registered trademarks in India for the corporate name and logo of our company. In the absence of such registrations, competitors and other companies may challenge the validity or scope of our intellectual property right over these brands or our corporate name or logo. As a result, we may be required to invest significant resources in developing new brands or names, which could materially and adversely affect our business, financial condition and results of operations. The estimated project dates as well as costs may change depending on the circumstances like changes in laws and regulations, competition, irregularities or claims with respect to title of land, the ability of third parties to complete their services, delays, cost overruns or modifications to our ongoing and planned projects. Such circumstances can have an impact on our financial condition and results of operation.

40. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the objects of the Issue as has been stated in the section “Objects of the Issue” on page no. 102 of the Red Herring Prospectus. We are unable to trace certain corporate records in relation to allotment of shares, forms for change in directors of our Company. We have also been unable to trace copies of certain transfer deeds for transfer of equity shares. These documents pertain to the period commencing from 1985 to 2006. Despite having conducted an extensive search in the records of our Company, we have not been able to retrieve the aforementioned documents, and accordingly, have relied on other documents, such as our share transfer register, register of members, register of directors, board resolutions and minutes, annual returns to verify the details of our equity shares allotted during this period and change in directors of the Company

EXTERNAL RISK FACTORS

42. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended / changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

43. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, financial condition, results of operations, cash flows and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For instance, the Companies Act 2013, several provisions of which (including rules issued thereunder) contain significant changes to Indian company law, including in relation to the issue of capital by companies, related party transactions, corporate governance, audit matters, shareholder class actions, restrictions on the number of layers of subsidiaries and corporate social responsibility.

Compliance with such requirements may require significant financial and administrative resources, and any failure to comply may adversely affect our business and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. If a determination is made that we were in violation of such laws, rules or regulations, including conditions in the permits required for our operations, we may have to pay fines, modify or discontinue our operations, incur additional operating costs or make capital expenditures and our business, financial positions, results of operations or cash flows could be adversely affected. For details on the laws currently applicable to the Company kindly refer the chapter titled “**Key Industry Regulations**” beginning on page 176 of this Red Herring Prospectus.

44. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India affect the cost and prices of the products we trade in and therefore demand for such product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

45. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and chemical industry contained in this Red Herring Prospectus.

While facts and other statistics in this Red Herring Prospectus relating to India, the Indian economy and the chemical industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “**Industry Overview**” beginning on page 123 of this Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

46. The extent and reliability of Indian infrastructure could adversely affect our Company’s results of operations and financial condition.

India’s physical infrastructure is in a developing phase, as compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company’s normal business activity. Any deterioration of India’s physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company’s business operations, which could have an adverse effect on its results of operations and financial condition.

47. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other

political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

48. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

49. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

50. A slowdown in economic growth in India and globally could cause our business to suffer.

We are highly dependent on prevailing economic conditions in India and globally and our results of operations are significantly affected by factors influencing the Indian and global economy. A slowdown in the economy and per capita income could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy. Factors that may adversely affect the Indian and global economy and per capita income, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing;
- prevailing income conditions among Indian and global consumers and corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- variations in exchange rates;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- prevailing regional or global economic conditions; and other significant regulatory or economic developments in or affecting India and other countries.

Any slowdown in the Indian or global economy and per capita income or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. Specifically, it has been seen that in our industry, that general correlation exists between demand for pharmaceuticals and per capita income, and therefore any slowdown in per capita income would adversely affect the Indian pharmaceutical market, as well as our business. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

51. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

52. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami and floods in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

53. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time-to-time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

54. The occurrence of natural disasters may adversely affect our business, financial condition and results of operations.

The occurrence of natural disasters, including hurricanes, floods, earthquakes, tornadoes, fires and pandemic disease may adversely affect our financial condition or results of operations. The potential impact of a natural disaster on our results of operations and financial position is speculative, and would depend on numerous factors. The extent and severity of these natural disasters determines their effect on the Indian economy. An outbreak of a communicable disease in India would adversely affect our business and financial conditions and results of operations. We cannot assure you that such events will not occur in the future or that our business, financial condition and results of operations will not be adversely affected.

Funding to meet working capital requirements

Working capital of the Company has been increased by Rs. 450.97 lakhs in FY 22-23 and Rs. 1,559.89 lakhs in the stub period ended January 31, 2024 due to the following reasons:

- a) In FY 22-23, there was an increase of Rs. 636.94 lakhs in inventory. This was necessitated by the need for an adequate supply of raw materials and work-in-progress items to sustain our manufacturing operations and meet the demand for finished goods, thereby achieving our sales targets.
- b) The increase in Trade receivable by Rs. 2487.99 lakhs during stub period ending January 31, 2024, largely it is impacted due to Trade Receivable of Rs. 356.51 lakhs in FY 22-23 on lower side due to exceptional realization of some debtors during that Financial year. Typically, our company operates with an average debtor balance ranging from Rs. 8 to 10 Crores and due to the exceptional realisation in FY 22-23 the incremental amounts are look differently. Moreover, as part of our strategic initiatives to enhance turnover, the company began extending more generous credit periods to customers. The company has added three major customers on credit which do a turnover of more than Rs. 30 cores in FY 23-24.

Due to extend credit periods given to customers, the Company was able to attract more customers, leading to a revenue increase of Rs. 2022.05 lakhs in FY 22-23 compared to FY 21-22. During the projected period FY 23-24, the addition of new customers being sold on credit has contributed to an increase in the company's turnover by Rs. 1635.88 lakhs as compared to FY 22-23.

The expansion and increased business activities of our Company required higher levels of working capital to support larger sales volumes, increased production and a serve a larger customer base.

Additionally, the Company is going to extend the trade receivable period from 60 days to 75 days to attract new customers, thereby increasing turnover and profit margins. Simultaneously, we aim to reduce the trade payable period from 60 days to 42 days by making early or advance payments to trade payables, further bolstering profit margins.

The Company overall is expecting to increase its sales which will lead to increase in trade receivable, loan and advances and inventory which will impact the working capital requirement for FY 2025 as compare to F.Y.2024.

Justifications for Holding Period levels:

CHEMICAL SECTOR

India is the 6th largest producer of chemicals in the world and 3rd in Asia, contributing 7% to India's GDP covering more than 80,000 commercial products and employing more than 2 million people. India's chemical industry is extremely diversified and can be broadly classified into bulk chemicals, specialty chemicals, agrochemical, petrochemicals, polymers, and fertilizers. A network of 200 national laboratories and 1,300 R&D centers provides a strong base to the Indian chemical industry to drive innovations. This sector, which is currently estimated to be worth US\$ 220 billion in 2022 and is anticipated to grow to US\$ 300 billion by 2025 and US\$ 1 trillion by 2040.

As per Chemexcil (Chemicals Export Promotion Council), India's agrochemical export was estimated to be at US\$ 1.04 billion from April 2023-June 2023 (Provisional). Indian colorants industry has emerged as a key player with a global market share of ~15%. The country's chemicals industry is de-licensed, except for few hazardous chemicals. India has traditionally been a world leader in generics and biosimilars and a major Indian vaccine manufacturer, contributing more than 50% of the global vaccine supply. India holds a strong position in exports and imports of chemicals at a global level and ranks 14th in exports and 8th in imports at global level (excluding pharmaceuticals). From April 2023 to June 2023 (provisional), India's dye exports (Dyes and Dye Intermediates) totaled US\$ 561.56 million.

Chemicals market in India:

India accounts for 2.5% of the world’s global chemical sales, exporting to more than 175 countries that is contributing 7% to India’s GDP. The industry is expected to reach US\$ 304 billion by 2025 at a CAGR of 9.3%, driven by rising demand in the end-user segments for speciality chemicals and petrochemicals segment. Chemicals and petrochemicals demand in India is expected to nearly triple and reach US\$ 1 trillion by 2040. From April 2023 to June 2023 (provisional), India's dye exports (Dyes and Dye Intermediates) totaled US\$ 561.56 million. Specialty chemical companies are seeking import substitutions while exploring export opportunities to accelerate their business. The petrochemical demand is expected to record a 7.5% CAGR between 2019 and 2023, with the demand for polymers growing at 8%. India is the third largest polymer consumer in the world and is expected to consume 60 million tonnes by 2040. Chemicals and Chemical Products gross bank credit grew by 15.6% in May 2022. The agrochemical market in India is expected to register an 8.6% CAGR to reach US\$ 7.4 billion between 2021 and 2026. Specialty chemicals account for 20% of the global chemicals industry's US\$ 4 trillion, with India's market expected to increase at a CAGR of 12% to US\$ 64 billion by 2025. This gain would be driven by a healthy demand growth (CAGR of 10-20%) in the export/end-user industries.

Chemical's market is split into five key segments: -

- **Bulk chemicals:** - These are groups of chemicals, which are manufactured on a large scale and further divided into organic, inorganic and alkali chemicals.
- **Petrochemicals & polymers:** - These chemicals are derivative of several chemical compounds such as hydrocarbons, which are derived from crude oil or natural gas.
- **Fertilisers:** - These provide nutrients for plant growth; are divided into organic/inorganic and natural/synthetic. Further, these can be broadly classified into phosphate, potassium and nitrogenous.
- **Specialty chemicals:** - These are derivatives of basic chemicals that are manufactured for specific end-use solutions. The characteristics of these chemicals include high-value, high R&D and low volume.
- **Agrochemical:** - These chemicals are used to protect crops against insects and pests and include fungicides, herbicides, and insecticides, among others. These chemicals can be applied in water irrigation, seeds, soils and crops.

Advantage India: -

1. Growing demand

- ▶ Rise in demand from end-user industries such as food processing, personal care and home care is driving development of different segments in India's specialty chemicals market.
- ▶ The domestic chemicals sector's small and medium enterprises are expected to showcase 18-23% revenue growth in FY22, owing to an improvement in domestic demand.
- ▶ India is the 6th largest producer of chemicals in the world and 3rd in Asia, contributing 7% to India's GDP.
- ▶ Domestic demand is expected to rise from US\$ 170 billion-US\$ 180 billion in 2021 to US\$ 850 billion-US\$ 1,000 billion by 2040.

2. Increasing Investments and Spending

- ▶ FDI inflows in the chemicals sector (other than fertilizers) was US\$ 1850.01 million between April 2022-March 2023.
- ▶ The Department of Chemicals & Petrochemicals intend to bring PLI in chemical & petrochemical sector and will redraft the Petroleum, Chemicals and Petrochemicals Investment Region (PCPIR) guidelines.
- ▶ An investment of Rs. 8 lakh crore (US\$ 107.38 billion) is estimated in the Indian chemicals and petrochemicals sector by 2025.

approved by the Union Cabinet as of May 2021.

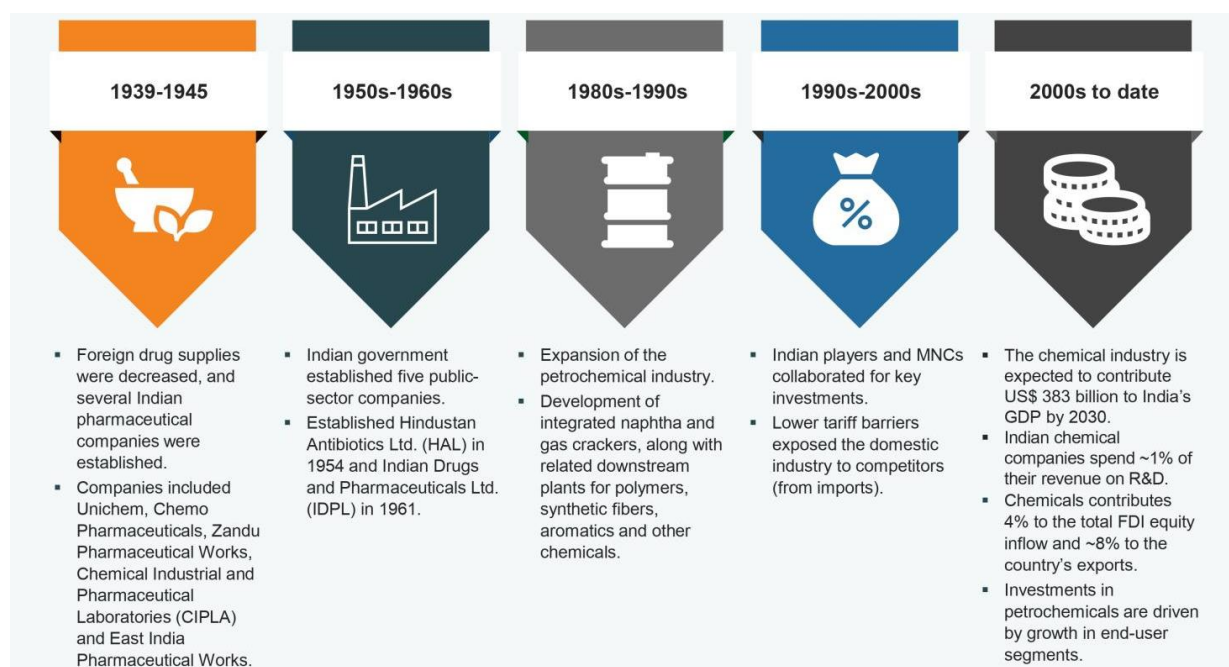

- ▶ PLI schemes were introduced to promote Bulk Drug Parks, with a budget of Rs. 1,629 crore (US\$ 213.81 million).

4. Opportunities

- ▶ India's specialty chemicals companies are expanding their capacities to cater to rising demand from domestic and overseas.
- ▶ In July 2021, the government announced discovery of indigenous deposits of phosphatic rocks. This will help expand fertiliser production domestically and boost self-reliance in fertiliser production.
- ▶ The Odisha government accepted investment applications worth ~US\$ 345.3 million in the metal, cement, chemical, plastic, food processing and manufacturing sectors in April 2021. This is likely to generate 2,755 jobs

Agrochemical trends in India: -

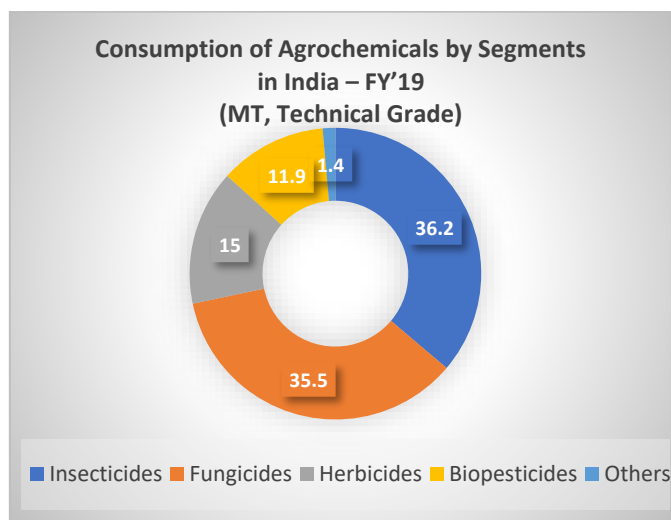

Globally, India is the fourth-largest producer of agrochemical after the United States, Japan and China. India is the fourth India is a net exporter of agrochemical and the thirteenth- largest exporter of pesticides and disinfectants. The country’s exports have increased on the account of low-cost manufacturing, availability of technically trained manpower, seasonal domestic demand, overcapacity, competitive pricing and strong presence in generic pesticide manufacturing.

Rise in demand in the agricultural segment is driving growth of agrochemicals in India. In October 2020,

the government urged players in the agrochemicals industry to come out with new molecules of global standards for the farmers' benefit, while CropLife India, the industry body, pitched for stable policies and regulatory regimes to boost growth in the sector.

The current GST on agrochemical is 18%. In January 2021, CropLife India, an industry body, demanded the government to reduce GST as this will help lower prices of agrochemicals and benefit farmers.

Agrochemical in India is currently a US\$ 5.5 billion market, growing at a CAGR of 8.3%. By 2040, it is expected to account for almost 40% of India's overall chemicals exports. As per Chemexcil (Chemicals Export Promotion Council), India's agrochemical export was estimated to be at US\$ 5.37 billion from April 2022-March 2023 (Provisional).

Herbicides:

Farmers have faced weed-related issues and solutions from the beginning of agricultural history. Farmers' ability to lessen crop-weed competition expanded with the introduction of tractors and improvements in mechanization tools. However, the development of synthetic and related herbicides gave farmers, horticulturists, and foresters the ability to manage broad leaf weeds in broad leaf crops, narrow leaf weeds in narrow leaf crops, or broad leaf weeds in narrow leaf crops in addition to narrow leaf weeds in broad leaf crops.

The earliest attempt to control weeds in India with herbicides was made in 1937 in Punjab for controlling *Carthamus oxyacantha* by using sodium arsenite. 2,4-D was first tested in India in 1946. Since then a number of herbicides have been imported and tried for their effectiveness in controlling many weed species.

The herbicide use, in comparison to industrialized countries, is significantly low in India till today. Albeit the crop loss is more due to the weed infestation than that caused by other pests.

The Ministry of Agriculture, Government of India regulates the manufacture, sale, import, export and use of herbicides through the 'Insecticides Act, 1968'. Central Insecticides Board (CIB) constituted under Section 4 of the Act advises Central and State Governments on technical matters. The Registration Committee (RC) constituted under section 5 of the Act approves the use of pesticides and new formulations to tackle the pest problem in various crops. The Registration Committee is responsible to register pesticides after scrutinizing the chemistry, bioefficacy and toxicology of the products.

Herbicides applied in combination either pre-plant incorporated or pre-emergence or postemergence generally increase the spectrum of weed control or the length of residual weed control. Tank-mixing of

herbicides may improve the spectrum of weeds controlled in a single application which saves time and labour in a weed management programme. Mixing compatible herbicides from different chemical families may improve control of specific weed populations. Herbicide combinations may also provide control of several weed types at the same time, such as grassy and broadleaf weeds.

Herbicides Classification:

In the 1940s, farmers did not have much choice for herbicides. To control broad leaf weeds, 2,4-D was used in crop fields. For non-selective weed control, herbicides like lead arsenate or salt were opted. But in the 1970s, a substantial number of herbicides of different chemical nature and with different modes of action were developed. It became urgent to develop a system to keep these products organized, so that it would be easy for the proper herbicide selection, easy diagnosis of herbicide injury symptoms, resistance management strategies, and mode and time of applications.

Herbicides were classified depending upon needs, according to the time of application, viz. pre-plant, pre-emergence, and post-emergence. Also, they were classified by their method of application, viz. foliar or root absorbed; selective or non-selective; and contact or systemic. From the chemistry point of view, herbicides were classified into different chemical groups, viz. phenoxyalkanoic acid, triazines, ureas, sulfonylureas, imidazolinones, etc. But the most effective way of herbicide classification, made by the Herbicide Resistance Action Committee (HRAC) is based on their modes of action. The system was not based on product names, rather focused on how a herbicide acted upon the plant. This system allows for the proper herbicide selection, resistance management strategies, and the more efficient diagnosis of herbicide injury symptoms.

Herbicide Regulation and Registration:

The Ministry of Agriculture, Government of India regulates the manufacture, sale, import, export and use of herbicides through the 'Insecticides Act, 1968'. Central Insecticides Board (CIB) constituted under Section 4 of the Act advises Central and State Governments on technical matters. The Registration Committee (RC) constituted under section 5 of the Act approves the use of pesticides and new formulations to tackle the pest problem in various crops. The Registration Committee is responsible to register pesticides after scrutinizing the chemistry, bioefficacy and toxicology of the products. Presently 60 technical herbicides and 17 combination herbicides are registered (as on 20.10.2015) for use in our country. Some herbicides, which were once registered are presently debarred from use in agriculture due to various problems, mainly related to toxicology.

Herbicides applied in combination either pre-plant incorporated or pre-emergence or postemergence generally increase the spectrum of weed control or the length of residual weed control. Tank-mixing of herbicides may improve the spectrum of weeds controlled in a single application which saves time and labour in a weed management programme. Mixing compatible herbicide from different chemical families may improve control of specific weed populations, such as 2,4-D applied with dicamba for broadleaf weeds. Herbicide combinations may also provide control of several weed types at the same time, such as grassy and broadleaf weeds. For example, the combinations of mesosulfuron and iodosulfuron, clodinafop and metsulfuron, and sulfosulfuron and metsulfuron control both grasses and broad leaf weeds in wheat. The combination product of chlorimuron and metsulfuron controls sedges and grassy weeds in rice. In soybean, pendimethalin + imazethapyr and imazamox + imazethapyr control grasses and broad leaf weeds. Presently, in our country, 14 combination products of two active ingredients are available. Recently, Registration Committee, Central Insecticide Board has given approval for the combination pesticides having three active ingredients. New combination products containing three active ingredients will be very useful in controlling grassy weeds, broadleaf weeds, and sedges at a time saving application cost and time. This trend in herbicide combination products is likely to continue in the crop production.

Strong demand and policy support driving investments:

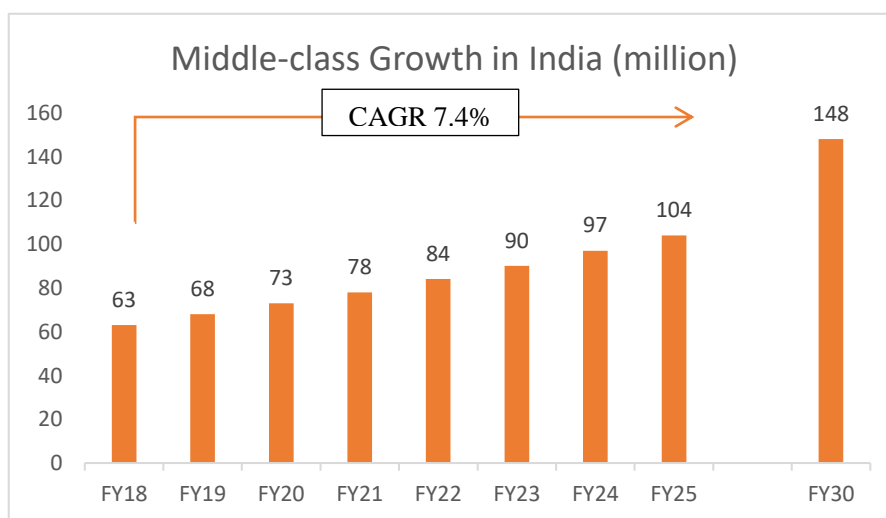

Notes: MSIHC: Manufacture Storage and Import of Hazardous Chemicals, CAEPPR: Chemical Accidents Emergency Planning, Preparedness and Response

Key Growth Driver

1. RISE IN DOMESTIC DEMAND

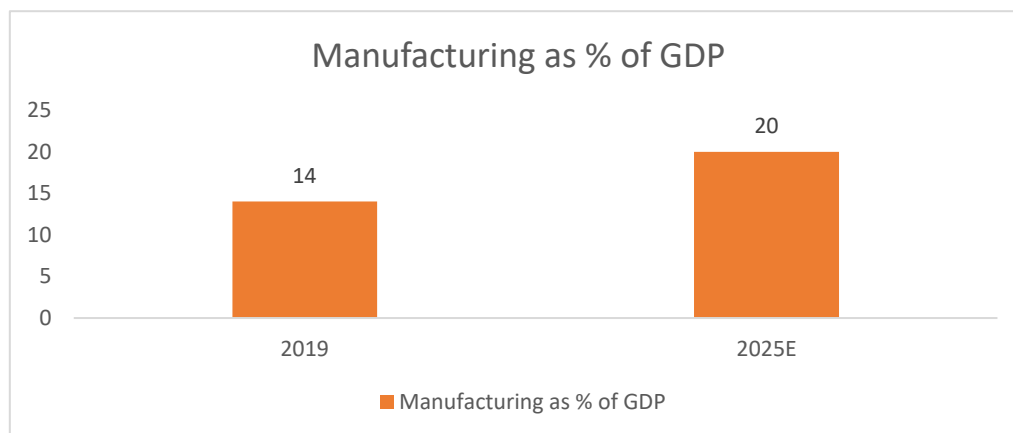

By 2030, India is likely to have ~80% of the households in the middle-income group. The growing middle-class and increasing urbanisation is driving the demand for personal care, agrochemicals, food, paints & coatings resulting into higher consumption of chemicals per capita.

2. GOVERNMENT AIMS TO BOOST MANUFACTURING SHARE IN GDP TO 20% BY 2025

Government considers the manufacturing sector to be a key focus area and has contacted ~1,450 companies

worldwide to manufacture in India. The government plan includes 2-3 autonomous zones which does not have labor and land laws. ~300 companies are actively pursuing production plans in mobiles, electronics, medical devices and textiles.

3. EMERGING MANUFACTURING HUBS

The dedicated integrated manufacturing hubs under Petroleum, Chemicals and Petrochemicals Investment Regions (PCPIR) policy to attract an investment of Rs. 20 lakh crore (US\$ 276.46 billion) by 2035.

4. RISE IN DISINFECTANT DEMAND POST COVID-19

With increasing demand for disinfection of personal and public places post COVID-19, the chloro-alkali, ethanol, personal care, and surfactant industry is expected to record significant growth in near future.

5. FOREIGN INVESTMENT

Presence of prominent global players, such as BASF, Dow Chemicals, Bayer and others, 100% FDI in the chemicals sector and stringent laws on anti-dumping to drive the Indian chemical market.

6. SKILLED AND LOW-COST MANPOWER

The skilled and low-cost labour, world-class engineering and strong R&D set-up enable chemicals industries in India.

7. GROWING END USE INDUSTRIES

Demand from packaging, construction, automotive and other industries to drive the Indian chemical market.

Source: National Council of Applied Research, World Economic Forum

Key industries driving growth:

1. AUTOMOTIVE

- Disruption in automotive sector with the emergence of autonomous driving connected
- shared mobility will affect the value chain of Indian chemical companies supplying chemicals to automotive applications

2. WATER TREATMENT

- Increasing urbanisation and population is driving the demand for safe drinking water. Moreover, rising awareness of hygiene among the people is leading to excessive water consumption.

3. TEXTILE, FLAVOURS & FRAGRANCES

- India has witnessed increasing demand for wide range of cosmetic chemicals, health care products and hygiene products that use specialty chemicals, polymers and oleo chemicals. This segment is likely to outperform other segments.

4. CONSTRUCTION

- ‘Smart City’ projects by the Indian government are driving growth of chemical companies in India. Availability of essential raw materials at low cost is anticipated to increase demand for construction chemicals.

Favorable initiatives by government:

1. 2034 vision for the chemicals and petrochemicals sector has been set up by the government to explore opportunities to improve domestic production, reduce imports and attract investments in the sector. The government plans to implement production-link incentive system with 10-20% output incentives for the agrochemical sector; to create an end-to-end manufacturing ecosystem through the growth of clusters.
2. 100% FDI is allowed in the chemical sector under automatic route with exception to few hazardous chemicals.
3. Industrial licensing is approved in most sectors, except for few hazardous chemicals.
4. The Indian Government supports the industry in research & development, reduced the basic customs duty on several products and offers support through the ‘Make in India’ campaign.
5. Four Petroleum, Chemicals and Petrochemical Investment Regions (PCPIRs) have been set-up as the investment regions for petroleum, chemicals and petrochemicals along with associated services.
6. The Government of India is considering launching a production-linked incentive (PLI) scheme in the chemical sector to boost domestic manufacturing and exports.

An era of sustained robust growth: The 2040 outlook

Over the last few years, the Indian chemicals sector has exceeded all shareholder expectations, outperforming not just the overall equity market but also the majority of its upstream and downstream industries. This exceptional growth has been fueled by consistent revenue expansion, increasing margins, and rise in multiples.

Indexed Total Shareholders Return (TSR),
Dec '11=100, USD

India is expected to become a \$850-1000 Bn chemicals market by 2040, taking 10-12% share of the global chemicals market.

Potential winning opportunities in India's chemical sector

Today, the Indian chemical industry offers several opportunities to build at-scale businesses across several Specialty, Inorganic and Petrochemical segments. Identifying these opportunities calls for the right balance between market attractiveness and cost competitiveness. While cost competitiveness is generally a function of feedstock availability, trade balance, and scope of value addition via process or tech innovation, market attractiveness is a composite of current market size, expected CAGR and macro trends.

Specialty chemicals

With a net trade surplus, the Specialty segment is the strongest pillar of India's chemicals sector. In all, 16 specialty chemicals sub-segments perform well on both cost competitiveness and market attractiveness. Two of these sub-segments are:

— **Agrochemical:** Agrochemical in India is currently a USD 5.5 billion market¹¹, growing at a CAGR of 8.3 percent. By 2040, it is expected to account for almost 40 percent of India's overall chemicals exports and nearly 13 percent of the global ag-chem market.

— **Food and Feed Ingredient Chemicals:** Constituting flavors and fragrances, food and feed additives, and nutraceutical, this sub-segment is a USD 3 billion market in India, growing at a CAGR of 7-9 percent.

Inorganic chemicals

As inorganic chemicals require little processing as compared with other segments, the Inorganic chemicals segment is predominantly dependent on feedstock availability. India, unfortunately, has a scarcity of raw material for most chemicals in this segment. However, it has a high demand for many inorganic chemicals, making it an attractive market.

Six sub-segments emerge as an opportunity for building an at-scale business in the segment, backed by high growth rate of end-use industries and natural feedstock advantages. Two of these are:

— **Fluorine:** Growing at a CAGR of more than 10 percent, fluorine is expected to become a USD 4.2 billion market by 2040. Its growth will be driven by rising demand from two of its main end-use industries: pharma and ag-chem.

— **Sodium and Caustic:** This sub-segment is expected to register CAGR of nearly 10 percent. By 2040, sodium and caustic could become a USD 13 billion and USD 11.5 billion market respectively.

OUR PROCESS FLOW CHART OF AGRO- CHEMICAL PRODUCTS

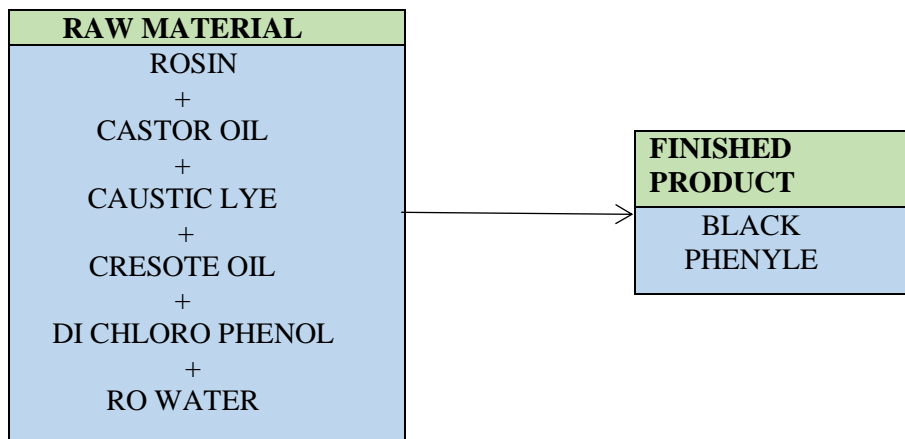

Process:

At Ambeey, we produce four finished products using the following process:

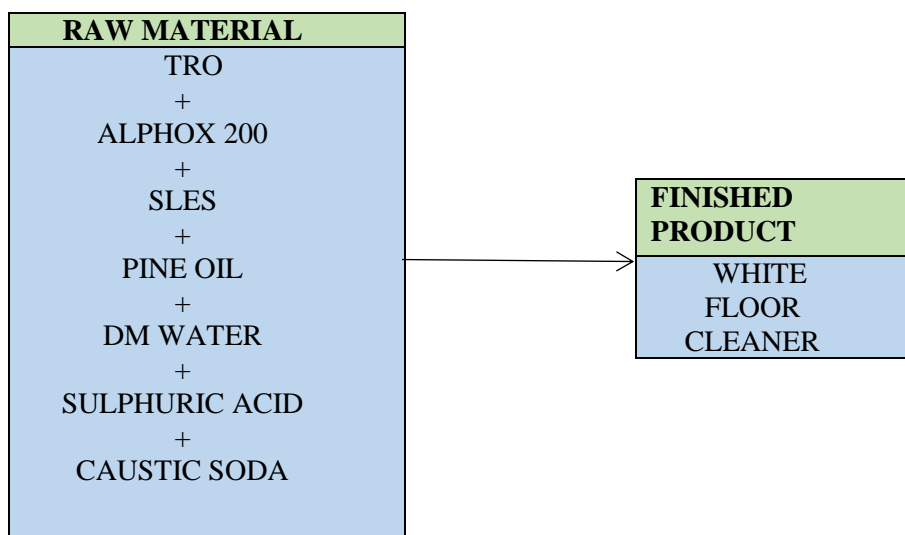

1. Firstly, the raw materials namely Phenol, Caustic Soda, Chlorine and Acetic Acid are mixed together. This produces three products, two by-products, i.e., RDCP and HCL Acid and one semi-finished 2,4D Slurry.
2. When the 2,4D Slurry is dried it gives the finished product called 2,4D Sodium Salt.
3. If the 2,4D Slurry is further mixed with HCL acid, it results in another semi-finished product called 2,4D Acid Slurry. When this product is dried, we get another finished good called 2,4D Acid.
4. In the steps to follow, 2,4D Acid Slurry is used as a raw material and mixed with either DMA or ethanol. This gives two more finished products viz. 2,4D Amine and 2,4D Ethyl Ester.

KEY REGULATIONS AND POLICIES

The business of our Company requires, at various stages, the sanction of the concerned authorities under the relevant Central, State legislation and local laws. The following description is an overview of certain laws and regulations in India, which are relevant to our Company. Certain information detailed in this chapter has been obtained from publications available in the public domain. The regulations set out below are not exhaustive and are only intended to provide general information to Applicants and is neither designed nor intended to be a substitute for professional legal advice. The statements below are based on current provisions of Indian law, and the judicial and administrative interpretations thereof, which are subject to change or modification by subsequent legislative, regulatory, administrative or judicial decisions.

RELATED TO OUR BUSINESS

THE DRUGS AND COSMETICS ACT, 1940

The Drugs and Cosmetics Act, 1940, is a pivotal piece of legislation in India that governs the manufacturing, import, distribution, and sale of drugs and cosmetics. Enacted on April 10, 1940, the Act serves as a comprehensive regulatory framework aimed at ensuring the safety, efficacy, and quality of pharmaceutical products, as well as safeguarding the interests of consumers and promoting public health. It addresses a wide spectrum of products, ranging from over-the-counter medications to prescription drugs and various cosmetic formulations.

The Act vests regulatory authority in the Central Drugs Standard Control Organization (CDSCO), operating under the Ministry of Health and Family Welfare. Tasked with formulating and implementing policies, the CDSCO plays a crucial role in overseeing compliance at both central and state levels, working in tandem with State Drug Control Organizations. Licensing and registration requirements form a cornerstone of the Act, obligating manufacturers, importers, and distributors to adhere to specified standards and Good Manufacturing Practices (GMP). The Act's meticulous classification of drugs into distinct categories, such as prescription medications, over-the-counter drugs, and controlled substances, determines accessibility and the level of regulatory scrutiny. This classification is pivotal for ensuring public safety and health.

THE HAZARDOUS CHEMICALS RULES, 1986

The Hazardous Chemicals Rules, 1986, constitute a vital regulatory framework in India designed to oversee the import, manufacture, storage, handling, and sale of hazardous chemicals. Enacted under the Environment (Protection) Act, 1986, these rules aim to prevent accidents and mitigate the impact of chemical incidents on both human health and the environment. The classification of chemicals as hazardous is rooted in their intrinsic properties, and the rules impose strict obligations on industries to comply with safety measures, conduct risk assessments, and implement effective risk management strategies.

Central to the Hazardous Chemicals Rules is the emphasis on labeling, packaging, and the provision of Material Safety Data Sheets (MSDS) for each hazardous chemical. These measures ensure that crucial information about the nature, risks, and safe handling procedures of the chemicals is communicated effectively. Furthermore, the rules mandate the development of on-site emergency plans by industries dealing with hazardous chemicals, enhancing overall preparedness and responsiveness in the event of an incident. Enforced by regulatory authorities at both central and state levels, the rules undergo continual refinement to address emerging challenges and align with international standards, reaffirming their pivotal role in fostering safe practices within the chemical industry.

THE MICRO, SMALL AND MEDIUM ENTERPRISES DEVELOPMENT ACT, 2006

The Micro, Small and Medium Enterprises Development Act, 2006 as amended from time to time (MSMED Act) seeks to facilitate the development of micro, small and medium enterprises. The MSMED Act provides that where an enterprise is engaged in the manufacturing and production of goods pertaining to any industry specified in the first schedule to the industries (Development and Regulation) Act, 1951, the classification of an enterprise will be as follows:

1. where the investment in plant and machinery does not exceed twenty-five lakh rupees shall be regarded as a micro enterprise;
2. where the investment in plant and machinery is more than twenty-five lakh rupees but does not exceed five crore rupees shall be regarded as a small enterprise;
3. Where the investment in plant and machinery is more than five crore rupees but does not exceed ten crore rupees shall be regarded as a medium enterprise.

The MSMED Act provides for the memorandum of micro, small and medium enterprises to be submitted by the relevant enterprises to the prescribed authority. While it is compulsory for medium enterprises engaged in manufacturing to submit the memorandum, the submission of the memorandum by micro and small enterprises engaged in manufacturing is optional. The MSMED Act defines a supplier to mean a micro or small enterprise that has filed a memorandum with the concerned authorities. The MSMED Act ensures that the buyer of goods makes payment for the goods supplied to him immediately or before the date agreed upon between the buyer and supplier. The MSMED Act provides that the agreed period cannot exceed forty-five days from the day of acceptance of goods. The MSMED Act also stipulates that in case the buyer fails to make payment to the supplier within the agreed period, then the buyer will be liable to pay compound interest at three times of the bank rate notified by the Reserve Bank of India from the date immediately following the date agreed upon. The MSMED Act also provides for the establishment of the Micro and Small Enterprises Facilitation Council (—Council”). The Council has jurisdiction to act as an arbitrator or conciliator in a dispute between the supplier located within its jurisdiction and a buyer located anywhere in India.

The MSMED act provides for appointment and establishment of National Board by the Central Government for MSME enterprise with its head office at Delhi. The Central Government may from time to time for the purpose of promotion and development of the MSME and to enhance the competitiveness in the sector organize such programmes, guidelines or instructions, as it may deem fit. In case of any offences under this act, no court inferior to that of Metropolitan Magistrate or Chief Metropolitan Magistrate shall try the offence under this act.

Following the issuance of the International Copyright Order, 1999, subject to certain exceptions, the provisions of the Copyright Act apply to nationals of all member states of the World Trade Organization.

While copyright registration is not a prerequisite for acquiring or enforcing a copyright, registration creates a presumption favoring ownership of the copyright by the registered owner. Copyright registration may expedite infringement proceedings and reduce delay caused due to evidentiary considerations. Once registered, the copyright protection of a work lasts for 60 years.

The remedies available in the event of infringement of a copyright under the Copyright Act include civil proceedings for damages, account of profits, injunction and the delivery of the infringing copies to the copyright owner. The Act recognizes, among others, the following forms in which an interest in an immovable property may be transferred:

- Sale: the transfer of ownership in property for a price paid or promised to be paid.
- Mortgage: the transfer of an interest in property for the purpose of securing the payment of a loan, existing or future debt, or performance of an engagement which gives rise to a pecuniary liability. The Act recognizes several forms of mortgages over a property.

REGISTRATION ACT, 1908 (THE “REGISTRATION ACT”)

A document will not affect the property comprised in it, nor be treated as evidence of any transaction affecting such property (except as evidence of a contract in a suit for specific performance or as evidence of part performance under the TP Act or as collateral), unless it has been registered. Evidence of registration is normally available through an inspection of the relevant land records, which usually contains details of the registered property. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of National Environmental Policy:

NOTES TO RESTATED FINANCIAL INFORMATION

ANNEXURE IV

SIGNIFICANT ACCOUNTING POLICY AND NOTES TO THE RESTATED FINANCIAL STATEMENTS

1. Background

Ambey Laboratories Limited ('the Company') is a Company limited by shares domiciled in India, with its registered office situated at GROUND FLOOR, PROPERTY NO. 555 TARLA MOHALLA, GHITORNI, NEW DELHI - 110030. The Company has been incorporated under Companies Act, 1956 (substituted by Companies Act, 2013) on 20 March 1985 (CIN U74899DL1985PLC020490). The Company primarily engaged in the business of manufacturing and distribution of agro and home hygiene products.

2. Summary of significant accounting policies

i) Basis of Preparation

The Restated Summary Statement of the Assets and Liabilities of the Company as at 31st January, 2024, 31st March 2023, 31st March 2022 and 31st March 2021, the Restated Summary Statement of Profit and Loss and the Restated Summary Statement of Cash Flow thereof (collectively referred to as 'Restated Summary Statements') have been compiled by the management of the Company and have been prepared specifically for the purpose of inclusion in the offer document to be filed by the Company with the Securities and Exchange Board of India ('SEBI') in connection with the proposed Initial Public Offering (hereinafter referred to as 'IPO').

These financial statements have been prepared to comply with the Generally Accepted Accounting Principles in India (Indian GAAP), including the Accounting Standards notified under Section 133 of the Companies Act, 2013 read with rule 7 of the companies (Accounts) rules 2015. The financial statements are prepared on accrual basis under the historical cost convention. The financial statements are presented in Indian rupees.

ii) Use of estimates

The preparation of financial statements requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and disclosure of contingent liabilities, at the end of the reporting period. Although, these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

iii) Property, Plant and Equipment

Tangible assets

Tangible assets are stated at cost, less accumulated depreciation and impairment losses, if any. Cost comprises the purchase price, borrowing costs, if capitalization criteria are met and any cost attributable to bringing the assets to its working condition for its intended use which includes taxes,

freight, and installation and allocated incidental expenditure during acquisition and exclusive of Input tax credit (IGST/CGST and SGST) or other tax credit available to the Company.

When parts of an item of tangible assets have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Subsequent expenditure relating to tangible assets is capitalized only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

Intangible assets

Acquired intangible assets are stated at acquisition cost, net of accumulated amortization and accumulated impairment losses, if any. Intangible assets are amortised on a straight-line basis over their estimated useful lives. A rebuttable presumption that the useful life of an intangible asset will not exceed ten years from the date when the asset is available for use is considered by the management. The amortisation period and the amortisation method are reviewed at least at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortisation period is changed accordingly.

iv) Depreciation on property, plant and equipment

Based on management's evaluation, useful life prescribed in Schedule II of the Companies Act, 2013 represent actual useful life of property, plant and equipment. The Company uses written down value method and has used following useful lives to provide depreciation of different class of its property, plant and equipment.

Particulars	Useful life in years
Building	30
Plant and machinery (Vessel/ Storage tank)	20
Plant and machinery	15
Furniture and fixture	10
Electrical Installation and Equipment	10
Laboratory Equipment	10
Office Equipments	5
Vehicles	8
Computer	3
Computer software	10

The Company has adopted Schedule II to the Companies Act, 2013 which requires identification and determination of separate useful life for each major component of the property, plant and equipment, if they have useful life that is materially different from that of the remaining asset. (Component Accounting).

Depreciation on addition to tangible assets is provided on pro-rata basis from the date the assets are ready for intended use. Depreciation on sale/discard from tangible assets is provided for upto the date of sale, deduction or discard of tangible assets as the case may be.

v) Impairment of Assets

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognised wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the assets' net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital.

After impairment, depreciation/amortization is provided on the revised carrying amount of the asset over its remaining useful life.

vi) Foreign currency translation

Initial recognition:

Foreign currency transactions are recorded in the reporting currency by applying the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

Conversion:

Foreign currency monetary items are reported using the closing rate. Non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction; non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when such values were determined.

Exchange differences:

Exchange differences arising on the settlement of monetary items or on reporting the Company's monetary items at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognised as income or as expenses in the year in which they occur.

vii) Revenue recognition

Revenue is recognised to the extent, that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Revenue from sale of goods

Revenue from sale of goods is recognised when the significant risks and rewards of ownership of the goods are transferred to the buyer.

Interest income

Interest income is recognised on a time proportion basis taking into account the amount outstanding and applicable interest rate.

Dividend income

Dividend income on shares of corporate bodies and units of mutual funds is accounted on accrual basis when the Company's right to receive dividend is established.

Revenue from sale of services

Revenue from sale of services is accounted based on stage of completion of assignments, when there is reasonable certainty of its ultimate realisation.

viii) Investment

Non-Current Investment

Non-current investments are investments intended to be held for a period of more than a year. Non-current investments are carried individually at cost less provision for diminution, other than temporary, in the value of such investments.

Current Investment

Current investments are investments intended to be held for a period of less than a year. Current investments are stated at the lower of cost and market value, determined on an individual investment basis.

ix) Cash and cash equivalents

Cash and cash equivalents include cash in hand, demand deposits with banks. Bank overdrafts are shown within borrowings in current liabilities in balance sheet.

x) Employees Benefit

Employee benefits in the form of Provident Fund and Employee State Insurance Scheme are defined contribution plans and the contributions are charged to the Statement of Profit and Loss of the year when the contributions to the respective funds are due. There are no other obligations other than the contribution payable to the respective funds.

Short-term employee benefits: All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits and are recognised in the Statement of Profit and Loss in the period in which the employee renders the related service.

Gratuity is a post-employment benefit and is in the nature of a defined benefit plan. The liability recognised in the balance sheet in respect of gratuity is the present value of the defined benefit obligation at the balance sheet date. The defined benefit obligation is calculated at the balance sheet date by an independent actuary using the projected unit credit method. Actuarial gains and losses arising from past experience and changes in actuarial assumptions are charged to the Statement of Profit and Loss in the year in which such gains or losses are determined.

xi) Inventories

Inventories are valued at lower of cost and net realizable value. Cost is determined using the first-in, first-out (FIFO) method. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct cost and related overheads.

Provision of obsolescence on inventories is considered on the basis of management's estimate based on demand and market of the inventories.

xii) Income taxes

Tax expense for the period comprises of current tax, deferred tax and Minimum alternate tax credit considered in determining the net profit or loss for the year.

Current tax

Provision for current tax is recognized on the basis of estimated taxable income for the current accounting year in accordance with the Income-tax Act, 1961.

Deferred tax

The deferred tax for timing differences between the book and tax profits for the year is accounted for, using the tax rates and laws that have been substantively enacted as of the reporting date.

Deferred tax charge or credit reflects the tax effects of timing differences between accounting income and taxable income for the period. The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realised in future; however, where there is unabsorbed depreciation or carry forward of losses, deferred tax assets are recognised only if there is a virtual certainty of realisation of such assets. Deferred tax assets are reviewed at each balance sheet date and are written-down or written up to reflect the amount that is reasonably/virtually certain (as the case may be) to be realised.

At each reporting date, the Company reassesses the unrecognized deferred tax assets, if any.

Minimum alternate tax

Minimum alternate tax (MAT) paid in a year is charged to the Statement of Profit and Loss as current tax. The Company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternative Tax under the Income-tax Act, 1961, the said asset is created by way of credit to the Statement of Profit and Loss and shown as “MAT Credit Entitlement.” The Company reviews the “MAT credit entitlement” asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

xiii) Leases

Operating leases - As a lessee

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases are charged to Statement of Profit and Loss on a straight-line basis over the period of lease.

xiv) Provisions, Contingent Liability and Contingent Asset

Provisions

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of obligation.

Contingent liabilities

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that probably will not require an outflow of resources or where a reliable estimate of the obligation cannot be made.

Contingent assets

Contingent assets are neither recorded nor disclosed in the financial statements.

xv) Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average numbers of equity shares are adjusted for events such as bonus issue, bonus element in the rights issue, share split and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

Based on the information provided above, it is evident that PAT margin of 13% in FY 20-21 due to the recognition of additional deferred tax assets amounting to Rs. 713.53 lakhs related to unabsorbed depreciation and brought forward business losses, which were not recognised in the audited financials. The Company had loss in financial year 15-16 due to purchase of 20 containers of PMIDA (Raw material of herbicide named GLYPHOSATE) from China in 2014. The product was bad in quality and the Company had paid as per LC. Despite trying many efforts, the LCs couldn't be stopped. This resulted in loss of almost 3 million dollars and further the losses compounded in subsequent years due to diminished sales and cash flow. We had tried to get our losses recovered from the supplier but our financial condition, at that time, did not permit us to go legal in a big way as we were reeling under huge losses and the legal costs would run in Crores. Consequentially, the said losses were booked in FY 15-16 and FY 16-17 with deferred tax not provided for in those years, leading to the provision of deferred tax of Rs. 713.53 lakhs in FY 20-21 according to the Accounting Standard 22 ("Accounting for Taxes on Income"), thereby enhancing the PAT margin.

In FY 21-22, the company's EBIDTA margin stood at approximately 13% of total revenue, which is consistent with the margin observed in FY 20-21. The PBT margin also increased by 2% over FY 20-21, primarily due to a reduction in finance costs by Rs. 104.42 lakhs (approx 1.4%). It's noteworthy that the higher PAT margin of 13% in FY 20-21 was influenced by the recognition of additional deferred tax assets, as previously mentioned.

In FY 22-23, due to increase in some major material costs (e.g., phenol, Caustic Soda Lye, DMA Di Methyl, etc.), led to a compromise of 3% in the EBITDA margin in FY 22-23. It is also observed that the utilization of unabsorbed depreciation and brought forward business losses of Rs. 698.67 lakhs in FY 22-23 resulted in an increase in deferred tax liabilities, consequently resulting in a PAT margin similar to that of FY 21-22.

In the stub period ending January 31, 2024, the company effectively reduced employee benefits expenses and other expenses (including legal & professional fees, business promotion expenses etc.), and increased export sales out of total sales compared to FY 22-23, resulting in an improvement in EBITDA margin over FY 2022-23, which impacted the bottom line of the PAT margin.

Therefore, despite the significant year-on-year growth in revenue, the company's PAT margin remained

consistent in FY 20-21 and FY 22-23 and improved in the stub period due to the increased sales volume of new products constituting upto 35% of the total sales of the year.

Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 and circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019 circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
