Spaisa Trading Limited

Notes Forming Standalone Financial Statements for the year ended March 31, 2020

Note 1. Corporate Information:

Spaisa Trading Limited is a wholly owned subsidiary of Spaisa Capital Limited was incorporated on February 27, 2020. The Company was formed with an objective of commencing on-line business and marketing of all consumer durable and other goods through internet or such other channels. The Company had incorporated in current financial year hence previous year figures are not applicable.

Note 2. Significant Accounting Policies and Key Accounting Estimates and Judgements

2.1 Significant Accounting Policies:

a) Basis of Preparation of Standalone financial statements:

These financial statements are prepared in accordance with Indian Accounting Standards (Ind AS) prescribed under Sec 133 of the Companies Act ("the Act") read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and relevant amendment rules issued thereafter and under the historical cost convention on accrual basis and that there are no financial instruments requiring fair valuation.

The Standalone financial statements for the year ended March 31, 2020 are being authorized for issue in accordance with a resolution of the directors on May 06, 2020.

b) Income Taxes:

Tax expense is the aggregate amount included in the determination of profit or loss for the period in respect of current tax and deferred tax.

Current tax:

Provision for current tax is made as per the provisions of the Income Tax Act, 1961. Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). With effect from April 1, 2019, where there is uncertainty over income tax treatments, the Company determines the probability of the income tax authorities accepting each such tax treatment or group of tax treatments in computing the most likely amount or the expected value of the tax treatment when determining taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates.

Deferred tax:

Deferred tax is provided using the balance sheet method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes as at the reporting date. Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit under Income tax Act, 1961.

Deferred tax liabilities are generally recognized for all taxable temporary differences. However, in case of temporary differences that arise from initial recognition of assets or liabilities in a transaction (other than business combination) that affect neither the taxable profit nor the accounting profit, deferred tax liabilities are not recognized. Also, for temporary differences if any that may arise from initial recognition of goodwill, deferred tax liabilities are not recognized.

Deferred tax assets are generally recognized for all deductible temporary differences to the extent it is probable that taxable profits will be available against which those deductible temporary difference can be utilized. In case of temporary differences that arise from initial recognition of assets or liabilities in a transaction (other than business combination) that affect neither the taxable profit nor the accounting profit, deferred tax assets are not recognized.

The tax effects of income tax losses, available for carry forward, are recognised as deferred tax asset, when it is probable that future taxable profits will be available against which these losses can be set-off.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow the benefits of part or all of such deferred tax assets to be utilized.

Deferred tax assets and liabilities are measured at the tax rates that have been enacted or substantively enacted by the Balance Sheet date and are expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

Additional taxes that arise from the distribution of dividends by the Company are recognised directly in equity at the same time as the liability to pay the related dividend is recognised.

Spaisa Trading Limited

Notes Forming Standalone Financial Statements for the year ended March 31, 2020

Presentation of current and deferred tax:

Current and deferred tax are recognized as income or an expense in the Statement of Profit and Loss, except when they relate to items that are recognized in Other Comprehensive Income, in which case, the current and deferred tax income/expense are recognized in Other Comprehensive Income.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously. In case of deferred tax assets and deferred tax liabilities, the same are offset if the Company has a legally enforceable right to set off corresponding current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority on the Company.

d) Cash and Cash Equivalents :

Cash and cash equivalents for the purpose of Cash Flow Statement comprise cash and cheques in hand, bank balances, demand deposits with banks where the original maturity is three months or less and other short term highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

e) Earning Per Share:

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

2.2 KEY ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of the financial statements in conformity with Ind AS requires the Management to make estimates, judgements and assumptions. These estimates, judgements and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Estimates and underlying assumptions are reviewed on ongoing basis. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

The Company makes certain judgments and estimates for valuation and impairment of financial instruments, fair valuation of employee stock options, useful life of property, plant and equipment, deferred tax assets and retirement benefit obligations. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable.

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below:

a. Income taxes

The Company tax jurisdiction is India. Significant judgements are involved in estimating budgeted profits for the purpose of paying advance tax, determining the provision for income taxes, including amount expected to be paid/recovered for uncertain tax positions. Further Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases.

b. Fair value measurement of Financial Instruments

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques, including the discounted cash flow model, which involve various judgements and assumptions.

Spaisa Trading Limited

Notes forming part of the Standalone Financial Statements for the year ended March 31, 2020

Note 3 : Deferred Tax Assets

(₹ in Millions)

Particulars	As at March 31, 2020

Diluted Earning per Share (₹)	0.07
Face Value per Equity Share (₹)	10.00

Note 11 : Capital, Other Commitments and Contingent Liabilities at Balance Sheet date:

The Company does not have any capital , other commitments and contingent liabilities at balance sheet date.

Spaisa Trading Limited

Notes forming part of the Standalone Financial Statements for the year ended March 31, 2020

Note 12 : Financial Risk Management

12 A. Credit Risk

Credit risk refers to risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. Credit risk arises primarily from financial assets such as trade receivables, investments, derivative financial instruments, other balances with banks, loans and other receivables and other financial asset. The Company does not have any credit risk as at balance sheet date.

12 B. Liquidity Risk

Liquidity risk arises from the Company's inability to meet its cash flow commitments on time. Prudent liquidity risk management implies maintaining sufficient stock of cash and marketable securities and maintaining availability of standby funding through an adequate line up of committed credit facilities. It uses a range of products mix to ensure efficient funding from across well-diversified markets and investor pools. Treasury monitors rolling forecasts of the company's cash flow position and ensures that the company is able to meet its financial obligation at all times including contingencies.

The table below analyse the company financial liability into relevant maturity companying based on their contractual maturity. The amount disclosed in the table are the contractual undiscounted cash flows. Balance due within 1 year equals their carrying balances as the impact of discounting is not significant.

(₹ in Millions)				
As at March 31, 2020	< 1 Year	1 to 5 Years	> 5 Years	Total
Trade and Other Payables	0.01	-	-	0.01
Other Financial Liabilities	-	-	-	-
Total	0.01	-	-	0.01

12 C. Market risk

Market risk is the risk of any loss in future earnings, in realizable fair values or in futures cash flows that may result from a change in the price of a financial instrument. The Company is yet to start its operations hence there is no market risk as on balance sheet date.

12 C.1. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Interest rate change does not affects significantly short term borrowing and current investment therefore the Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long-term debt and Non current investment. Company business is volatile and hence borrowings are done bases on requirement, generally borrowings are done for short term and are on market based interest rate. The Company does not have any borrowings as at balance sheet date.

12 C.2. Fair value sensitivity analysis for fixed-rate instruments

The company does not have any borrowings or any fixed rate instruments as at balance sheet date.

12 C.3. Exposure to currency

The Company does not have any exposure to foreign currency as at balance sheet date.

12 C.4. Exposure to Price

The Company exposure to price risk arising form investment held by the company and is classified in the balance sheet through fair value through profit & loss account. The Company has no investments and exposure to price risk.

5paisa Trading Limited

Notes forming part of the Standalone Financial Statements for the year ended March 31, 2020

12 D. Capital Management

The company's objective when managing capital are to

- Safeguard their ability to continue as going concern, so that they can continue to provide returns for the share holders and benefits for other stake holders, and
- Maintain an optimal capital structure to reduce the cost of capital.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares.

(₹ in Millions)

Particulars	As at March 31, 2020
Borrowings	-
Total Capital	0.49
Debt Equity Ratio	-

12 E. Fair values of financial instruments

The company measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

- Level 1: Inputs that are quoted market prices (unadjusted) in active markets for identical instruments.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.
- Level 3: Inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs that are not observable and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The company uses widely recognised valuation models to determine the fair value of common and simple financial instruments, such as interest rate and currency swaps, that use only observable market data and require little management judgement and estimation. Observable prices or model inputs are usually available in the market for listed debt and equity securities, exchange-traded derivatives and simple OTC derivatives such as interest rate swaps. The availability of observable market prices and model inputs reduces the need for management judgement and estimation and also reduces the uncertainty associated with determining fair values.

12 E. 1. Financial instruments measured at fair value

The Company does not have any asset measured at fair value .

12 E. 2. Financial instruments not measured at fair value

The following table sets out the fair values of financial instruments not measured at fair value and analyses them by the level in the fair value hierarchy into which each fair value measurement is categorised.
