## **INTERNAL RISK FACTORS**

### **BUSINESS RELATED RISKS**

- 1. The continuing impact of the COVID-19 pandemic on our business and operations is uncertain and it may be significant and continue to have an adverse effect on our business, operations and our future financial performance.***

While there has been no material impact of COVID-19 pandemic on the Company's financial condition including liquidity, profitability, capacity utilization, existing contracts and arrangements or trade receivables in previous and in the current Fiscal, we are not in a position to assure that it will continue to be so in the future. The impact of the pandemic on our business, operations and future financial performance may include, but are not limited to the following:

- result in a complete or partial closure of, or disruptions or restrictions on our ability to conduct our operations, resulting from government actions such as imposition of partial or complete lock-down;
- our inability to source goods from our suppliers as a result of the temporary or permanent closure of the facilities of our suppliers;
- a significant percentage of our workforce being unable to work, including because of travel or government restrictions in connection with COVID-19, including stay at home order, which could result in a slowdown in our operations;
- our proposed / existing business plans becoming delayed or postponed indefinitely;
- impact our ability to travel, pursue business transactions and delay shipments of our products;
- delays in fulfilment of existing orders or delivery of orders, which will negatively impact our cash conversion cycle;
- inability to collect full or partial payments from customers due to deterioration in customer liquidity, including customer bankruptcies or payments to suppliers due to delay in collections or liquidity issue;
- our inability to access debt and equity capital on acceptable terms, or at all;
- impact our compliance with the covenants in our credit facilities and other financing agreements and could result in events of default and the acceleration of indebtedness;
- uncertainty as to what conditions must be satisfied before government authorities completely lift lockdown orders; and
- the potential negative impact on the health of our employees, particularly if a significant number of them are afflicted by COVID-19, which could result in a deterioration in our ability to ensure business continuity.

Any resulting financial impact due to the above cannot be reasonably estimated at this time. The extent to which the COVID-19 impacts our business and results will depend on future developments, which are highly uncertain and cannot be predicted, such as new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. In addition, we cannot predict the impact that the COVID-19 pandemic will have on our customers, suppliers and other business partners, and each of their financial conditions; however, any material effect on these parties could adversely impact us. As a result of these uncertainties, the impact may vary significantly from that estimated by our management from time to time, and any action to contain or mitigate such impact, whether government-mandated or opted by us, may not have the anticipated effect or may fail to achieve its intended purpose altogether.

As of the date of this Draft Red Herring Prospectus, there is significant uncertainty relating to the severity of longterm adverse impact of the COVID-19 pandemic on the global economy, global financial markets and the Indian economy, and we are unable to accurately predict the long-term impact of the COVID-19 pandemic on our business to the extent that the COVID-19 pandemic adversely affects our business and operations.

- 2. Our Company is in violation of the provisions of the Foreign Exchange Management Act, 1999 and the rules and regulations framed thereunder especially the Foreign Exchange Management (Transfer or Issue of any Foreign Security) Regulations, 2004, in respect of the acquisition of the Company's foreign wholly owned subsidiary U.E.L International FZE.***

Our Company had acquired 100% shareholding of U.E.L International FZE ("U.E.L"), a company registered in the UAE, from Mr. Manoj Kumar Srinivas Pacheriwala ("Seller") in the year 2014 pursuant to the terms

of the share purchase agreement dated November 13, 2014 (“SPA”) entered into between our Company and the Seller. As per the SPA, the payment of the purchase consideration was agreed to be made on a deferred basis to the Seller. For more information on the SPA please refer to the chapter “*History and Certain Corporate Matters – Material Agreements*” on page 120 of this Draft Red Herring Prospectus. Since the payment of the purchase consideration was on a deferred basis, the acquisition of U.E.L fell under the approval route and hence required a prior written approval of the Reserve Bank of India (RBI). However, our Company failed to take prior approval of the RBI for such acquisition. Consequently, our Company *inter alia* failed to obtain the unique identification number (UIN) from the RBI for filing Form ODI (required under the Foreign Exchange Management (Transfer or Issue of Foreign Security) Regulations, 2004), failed to file the Annual Performance Reports and the Annual Return on Foreign Liabilities and Assets of the Company since the year 2015 and failed to report the receipt of the share certificate of U.E.L, to the RBI. An amount of Rs.10.00 Lakhs (approx.) has been capitalised in respect of expenses for acquisition of the subsidiary and related expenses.

Our Company has still not remitted the purchase consideration agreed under the SPA to the Seller and has therefore approached the RBI through its authorised dealer category-I bank (AD Bank) to allow such remittance. We have *vide* letter dated September 1, 2021 sought RBI’s *post facto* approval for remittance of the said purchase consideration to the Seller. Since we are seeking a *post facto* approval, we cannot assure that such approval would be granted by the RBI or the above mentioned non-compliance would be regularized. Further we may also be subject to penalties or fines that the RBI may impose for violating the provisions of FEMA, 1999 and regulations thereunder, including the abovementioned violations of the Foreign Exchange Management (Transfer or Issue of Foreign Security) Regulations, 2004.

- 3. Our Company is in violation of the provisions of the Foreign Exchange Management Act, 1999 and the rules and regulations framed thereunder especially the Foreign Exchange Management (Transfer or Issue of any Foreign Security) Regulations, 2004 since we failed to report to the RBI about the incorporation of our subsidiary in Singapore ‘Uma Exports Pte. Ltd.’ (currently gazetted to be struck off).***

Our Company had incorporated a foreign wholly owned subsidiary, Uma Exports Pte Ltd. in Singapore (“Singapore WOS”) on January 17, 2019 with a capital of USD 1. But our Company failed to intimate the Reserve Bank of India (RBI) about the incorporation of the Singapore WOS. However, since the incorporation, there were no infusion or remittance of funds in the Singapore WOS. Moreover, no business activities were undertaken by the Singapore WOS. Therefore, on April 1, 2020 our Company decided to close down the Singapore WOS and have it struck off. The current status of Uma Exports Pte. Ltd. is that it is ‘*gazetted to be struck off*’ as indicated on the business filing portal of Accounting and Corporate Regulatory Authority of Singapore (ACRA). We have addressed a letter dated August 9, 2021 to our authorised dealer category-I bank (AD Bank) for seeking RBI’s approval in respect of the closure of the Singapore WOS and the regularization of the aforementioned non-compliance. Thus, we cannot assure that we will receive such approval from RBI in the near future and whether the above-mentioned non-compliance would be regularized in the near future. The Company may also be subject to penalties or fines in respect of the above mentioned non-compliance.

- 4. Our Company was not registered under the Employees’ State Insurance Act, 1948 until September 14, 2021 and consequently had violated the provisions of the Employees’ State Insurance Act, 1948.***

Our Company currently has 16 (sixteen) permanent employees and has had more than 10 (ten) persons employed in the past. However, our Company had failed to obtain registration under the Employees’ State Insurance Act, 1948 (ESI Act) in the past and has recently on September 14, 2021, registered itself with the Employee State Insurance Corporation of India (ESIC). As a result, our Company had violated the provisions of the ESI Act and the rules thereunder. Further our Company has not complied with any of the provisions applicable to us under the ESI Act including failing to pay the applicable contributions in respect of the employees to the ESIC. Due to the aforementioned non-compliance, we may be subject to fines and penalties in the form of payment of increased contribution for the defaulting periods. We may also be liable to punishment under the ESI Act which may include imprisonment for our directors.

- 5. Our Company is in violation of certain provisions of the Companies Act, 2013 and the rules and regulations framed thereunder.***

We had acquired U.E.L. International FZE, a company registered in the United Arab Emirates on November 13, 2014. By virtue of our shareholding, U.E.L. International FZE is our wholly owned subsidiary. Since

U.E.L. International FZE is our wholly owned subsidiary, our Company is required to consolidate the financial statements of U.E.L. International FZE and file it with the ROC in accordance with the section 137 of the Companies Act, 2013 and the applicable rules thereunder. However, our Company has filed its' standalone financial statements only and has failed to file the consolidated financial statements from the fiscal year 2015 till 2020 with the ROC. Further, our Company had constituted an audit committee as per the provisions of section 177 of the Companies Act, 2013 in the year 2014 but has failed to include the reference of the same in the annual reports of the Company. As of the date of this Draft Red Herring Prospectus, we have not received any show cause notice in respect to the above non-compliance. Moreover, to rectify the aforementioned non-compliance we have filed compounding applications with the Registrar of Companies, Kolkata. In addition to the compounding of the above offences, we may be imposed additional penalties under the Companies Act, 2013 for the above violations.

**6. *Some of our corporate records relating to changes in the share capital of our Company are not traceable and we have limited records of bank documents relating to certain share allotments made by our Company. These records may not be available in future also and we may be subject to penalty imposed by the competent regulatory authority in this respect.***

Our Company has not been able to trace certain corporate records such as certain forms (including forms required to be filed under the Companies Act, 1956), filings, and minutes of meetings of our Board and Shareholders, in relation to the changes in the share capital of our Company and the allotments made by our Company. We have not been able to trace minutes of board and shareholders meetings and statutory records and returns till the FY 2007-08. Also, Form 2 for issue of bonus shares in the year 1997 are not traceable. As per the certificate dated August 25, 2021, from Chandni Maheswari, Practicing Company Secretary, she attempted to conduct a physical verification at the office of the RoC, Kolkata, on August 24, 2021 however due to the COVID-19 restrictions she was not allowed to do so. Thereafter, our Company vide its letter dated August 25, 2021 requested the RoC to permit physical verification of the aforementioned documents. However, we have not received any reply from the RoC as on date of filing this Draft Red Herring Prospectus. Further, certain historical bank records for our allotments in the years 1989, 1991, 1995, 1997, 1999 and 2000 could not be traced. We have approached and requested the concerned banks three time for providing us the requested bank records but have failed to receive any response. However, we have managed to trace bank records for a significant amount of the equity share allotments made for cash. Out of the ₹ 2,498.63 lakhs of the issued and paid up capital of our Company, ₹ 1,891 lakhs of issued and paid up capital of the Company correspond to the equity share allotments made in cash and balance ₹ 607.63 lakhs correspond to the equity share allotments made in bonus issues of our Company. Thus, out of aforementioned ₹ 1,891 lakhs of issued and paid up capital of the Company, we have managed to trace the bank records for the equity share allotments amounting to ₹ 1,625 lakhs. The Company has lodged a police complaint with the jurisdictional police station regard the loss of statutory records and documents.

Information in relation to such changes in share capital and allotments, has been disclosed in the section “*Capital Structure*” on page 64, in this Draft Red Herring Prospectus, based on the statutory register of members, minutes of the meetings of our Board (to the extent available), annual reports of our Company, bank and demat statements, depository instruction slips, share certificates, and information available with our Company. Further, we may not be able to furnish any further document evidencing the aforesaid details. For details of periods for which such documents are not available, please see “*Capital Structure*” and “*Capital Structure – Notes to Capital Structure*” on page 64 of this Draft Red Herring Prospectus.

We cannot assure you that the abovementioned corporate records will be available in the future. Further, we cannot assure you that our Company has filed such forms and filings in a timely manner or at all, in the past. Although no regulatory action/ litigation is pending against us in relation to such untraceable secretarial and other corporate records and documents, we cannot assure you that we will not be subject to penalties imposed by regulatory authorities in this respect.

**7. *In the past, there have been instances of delays in filings of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 to RoC.***

In the past, there have been certain instances of delays in filing statutory forms as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 with the RoC, which have been subsequently filed by payment of an additional fee as specified by RoC.

8. ***We depend on a few customers of our products, for a significant portion of our revenue, and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations.***

Our Company is engaged in the business of export and import trade of agricultural produce and commodities for sale to various end users including merchants and distributors. For the Fiscals 2021, 2020 and 2019, 33.13%, 34.17% and 40.53%, respectively, of our revenue from operations were derived from our top ten customers (in the respective Fiscals). Our business operations are highly dependent on our customers.

While we typically have long term relationships with our customers, we have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long-term agreements. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future.

Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing our products. If there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

9. ***Some of our Group Companies are engaged in the line of business which is same or similar to that of our Company. There are no non-compete agreements between our Company and such entities. We cannot assure that our Promoter and Promoter Group members will not favour the interests of such entities over our interest or that the said entities will not expand which may increase our competition and may adversely affect business operations and financial condition of our Company.***

Some of our Group Companies are engaged in same or similar line of business as that of our Company. We have not entered into any non- compete agreement with such entities. We cannot assure that our Promoter/ Promoter Group who has common interest in such entities will not favour the interest of such entities. As a result, conflicts of interests may arise on account of common suppliers/ customers and in allocating business opportunities amongst our Company and such entities in circumstances where our respective interests diverge.

Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations. We cannot assure you that these or other conflicts of interest, in the event such conflicts arise, will be resolved in an impartial manner

10. ***Our Group Companies have incurred losses in the past and may incur losses in the future***

One of our group company, namely Agrocomm Trading Company Private Limited, has incurred loss in the past. There can be no assurance that our Group Companies will not incur losses in the future, which may have an adverse effect on our reputation and business.

11. ***The global scope of our operations exposes us to risks of doing business in foreign countries, including the constantly changing economic, regulatory, social and political conditions in the jurisdictions in which we operate and seek to operate, which could adversely affect our business, financial condition and results of operations.***

We export agricultural produce and commodities in countries such as Sri Lanka, UAE, Bangladesh, Afghanistan and other countries. In Fiscal 2020 and 2021, 5.42% and 9.53%, respectively of our revenue from operations was from exports. Our wholly owned Subsidiary, U.E.L. International FZE had been acquired in the UAE in the year 2014 to ensure our international market presence and help us cater to the needs and requirements of our international customers. We seek to maintain and expand our international

sales operations with the help of our wholly owned Subsidiary. We are also in the process of setting up a procurement office in Australia which will allow us to procure the commodities directly in Australia through such Australian office and dispatch the commodities directly to various other global locations. Further, the recent political instability in Afghanistan may adversely affect our exports to Afghanistan. Our business is therefore subject to diverse and constantly changing economic, regulatory, social and political conditions in the jurisdictions in which we operate and seek to operate.

Operating in the international markets exposes us to a number of risks, including, but not limited to, compliance with local laws and regulations, which can be onerous and costly as the magnitude and complexity of, and continual amendments to, those laws and regulations are difficult to keep abreast with and the liabilities, penalties, costs, obligations and requirements associated with these laws and regulations can be substantial. Our failure to comply with and adapt to changing international regulations and/or trends may result in us failing to maintain and/or expand our international sales operations, which could adversely affect our business, financial condition and results of operations.

In case of any contingencies in the future, due to which we are unable to operate effectively in these markets, our results of operations, revenues and profitability may be adversely affected. Due to this, we may not be able to expand our business effectively in the international market, thereby affecting our business, results of operations and financial condition.

***12. We are dependent on third party transportation service providers for delivery of agricultural produce or commodities to us from our suppliers and delivery of our products to our customers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations could adversely affect our business, financial condition and results of operation.***

We are significantly dependent on third party transportation providers for the delivery of agricultural produce or commodities to us and delivery of the same to our customers. Uncertainties and risks such as transportation strikes, failure to book vessels or delay in supply of raw materials and products due to port congestions, vessel / vehicle breakdown could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, agricultural produce or commodities may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to procure or transport the agricultural produce and commodities or to deliver the same to our distribution intermediaries in a timely, efficient and reliable manner could adversely affect our business, results of operations and financial condition.

Further, we have not entered into any long-term agreements with our transporters and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfill their obligations or would not commit a breach of the understanding with us. In the event that the agricultural produce or commodities suffer damage or are lost during transit, we may not be able to prosecute the agencies due to lack of formal agreements. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which could adversely affect our business, results of operations and financial condition.

***13. There are backward integration challenges in agricultural produce and commodities trading business.***

Our Company is engaged in exporting agricultural produce and commodities to countries like Sri Lanka, Bangladesh and Afghanistan and other countries. and relies on domestic procurement of such agricultural produce and commodities to meet its export demands. However, procurement of agricultural produce and commodities in India poses an inherent risk. The backward integration in India for agricultural produce and commodities is inefficient and unorganized, resulting in quality and longevity issues. Further, the importing nations across the world are also becoming more stringent with respect to production norms and traceability at the farm level. Our Company is exposed to risks associated with trading in perishables and the risks in not being able to meet the requirements of importing nations in respect of production norms and traceability at the farm level. Any such risks materialising may adversely affect our export operations and consequently our profitability.

**14. *Our inability to manage inventory in an effective manner could affect our business.***

Our business model requires us to maintain a certain level of inventory of agricultural produce and commodities, to meet the present and future orders. If we underestimate the orders that we may receive we may experience inventory shortages and a loss of opportunity. Similarly, an over estimation of orders may result in over stocking leading to increased holding costs. Additionally, any over run in holding of such goods may lead to their decay. Therefore, any mismanagement on our part to determine the optimum inventory levels may impact our operations and cause us to incur losses.

**15. *The export / import of certain agricultural produce and commodities is subject to seasonal factors. Consequently, our inability to accurately forecast demand for our products, may have an adverse effect on our business, results of operations, cash flows and financial condition.***

The business of trading in the agricultural produce and commodities is subject to seasonal factors. This is due to the fact that majority of the farmers depend on rain for cultivation. Generally, rainfall occurs during *Kharif* season and hence, the timing and seasonality of rainfall impacts the export operations of our Company. Thus, we are subject to seasonal factors, which make our operating results relatively unpredictable. Due to dependency on seasonality of agro crops in which our business is based, results of one reporting period (quarter/half year/year) may not be necessarily comparable with preceding or succeeding reporting periods. We are impacted by seasonal variations in sales volumes, which may cause our revenues to vary significantly between different quarters in a Fiscal.

Further, while we forecast the demand for the agricultural produce and commodities and accordingly plan our procurement volumes for both export and import operations, any error in our forecast could result in surplus stock, which may not be sold in a timely manner. Each of the agricultural produce and commodities has a specific shelf life and if not sold prior to expiry, may lead to losses or if consumed after expiry, may lead to health hazards.

We cannot assure you that we will be able to sell surplus stock in a timely manner, or at all, which in turn may adversely affect our business, results of operations, future cash flows and financial condition.

**16. *We benefit from certain export benefits from the Government of India, which if withdrawn or modified may have a significant impact on our results operations.***

As on the date of this Draft Red Herring Prospectus, our Company receives certain export benefits from the Government of India. Due to our export activities, our Company enjoys certain benefits of incentives under the “Merchandise Exports from India Scheme” (MEIS) and “Duty Drawback Scheme” provided by the Central Government of India. Under the MEIS scheme, a percentage of achieved FOB (Free on Board) value of 2%, 3%, or 5% of the exports, is paid as incentives. Further, under the Duty Drawback Scheme, the excise duty suffered on inputs, service tax paid for input service and customs duty paid on imported raw material during manufacturing of export goods are remitted after export of such goods. The withdrawal or modification of such export benefits may have an adverse effect on the cost of our imported raw materials, thereby having a significant impact on our results of operations.

The MEIS scheme has been withdrawn by the Government of India w.e.f. January 1, 2021 and has been replaced by the Remission of Duties and Taxes on Export Products Scheme. As on date of this Draft Red Herring Prospectus, our Company is not availing benefits under the Remission of Duties and Taxes on Export Products Scheme. However, as of March 31, 2021 we are receiving residuary benefits under the MEIS Scheme for our export operations completed until December 31, 2020. We cannot assure you that we would be eligible to receive benefits under the Remission of Duties and Taxes on Export Products Scheme or that if we receive benefits under the said scheme, they would be equivalent to the benefits received under the erstwhile MEIS Scheme. Any reduction in the export benefits received by our Company may have an adverse impact on our export operations, business and financial condition. For further details, please refer to the section titled “*Restated Financial Information*” at page 153.

**17. Any failure in our quality control and procurement processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations.**

Our agricultural produce and commodities may suffer from certain quality issues due to inadvertent lapses in procurement leading to purchase of low-quality agricultural commodities. Further the agricultural commodities may also deteriorate in quality or become decay during transit. We have implemented quality control processes for our agricultural produce and commodities that we trade in, on the basis of internal and international quality standards. We are engaged in export operations and have to fulfill the quality conditions and processes prescribed by the importing jurisdictions. However, we cannot assure you that our quality control processes or our agricultural produce and commodities will pass the quality tests and inspections conducted by various international and domestic agencies as per their prescribed standards. It is imperative for us to meet the international quality standards set by our international customers and agencies as deviation from the same can cause them to reject our products and can also cause damage to our reputation, market standing and brand value.

In the event the quality of our agricultural produce and commodities are sub-standard or the agricultural produce and commodities suffer from defects and are returned by our customers due to quality complaints, we might be compelled to take back the sub-standard agricultural produce and commodities and reimburse the cost paid by our customers. Such quality lapses could strain our longstanding relationship with our domestic and international customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our agricultural produce and commodities and could in turn refuse to further deal in our products, which could have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for low quality agricultural produce and commodities sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

**18. Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could adversely affect our business, results of operations and financial condition.**

We have experienced considerable growth over the past three years and we have expanded our operations and product portfolio. Our total revenue grew at a CAGR of 51.10% between Fiscals 2019 and 2021, while our restated profit after tax grew at a CAGR of 105.45% between Fiscals 2019 and 2021. We cannot assure you that our growth strategies will continue to be successful or that we will be able to continue to expand further, or at the same rate.

Our inability to execute our growth strategies in a timely manner or within budget estimates or our inability to meet the expectations of our customers and other stakeholders, could have an adverse effect on our business, results of operations and financial condition. Our future prospects will depend on our ability to grow our business and operations. The development of such future business could be affected by many factors, including general, political and economic conditions in India and abroad, government policies or strategies in respect of specific industries, prevailing interest rates and price of agricultural produce and commodities. Further, in order to manage our growth effectively, we must implement, upgrade and improve our operational systems, procedures and internal controls on a timely basis. If we fail to implement these systems, procedures and controls on a timely basis, or if there are weaknesses in our internal controls that would result in inconsistent internal standard operating procedures, we may not be able to meet our customers' needs, hire and retain new employees or operate our business effectively. Failure to manage growth effectively could adversely affect our business and results of operations.

**19. If we are unable to service our debt obligations in a timely manner or to comply with various financial and other covenants and other terms and conditions of our financing agreements, it may adversely affect our business, credit rating, reputation, prospects, results of operations, cash flows and financial condition.**

As of March 31, 2021, we had a total debt outstanding of ₹4,214.08 lakhs comprising of secured working capital loans and unsecured loans. Our debt outstanding payable could have several adverse consequences, including but not limited to the following:

- a portion of our cash flows may be used towards repayment of our existing debt, which will reduce the availability of our cash flows to fund working capital, capital expenditures, acquisitions and other general corporate requirements;
- our ability to obtain additional financing in the future at reasonable terms may be restricted; and
- fluctuations in market interest rates may affect the cost of our borrowings, as some of our indebtedness is at variable interest rates.

Many of our financing agreements also include various conditions and covenants that require us to obtain lender consents prior to carrying out certain activities or entering into certain transactions. Typically, restrictive covenants under our financing documents relate to obtaining prior consent of the lender for, among others, change in the capital structure, availing additional borrowings, amendment of constitutional documents, change in ownership or management control, changes in shareholding pattern and management set-up, any merger, reorganization or similar action and a failure to observe the restrictive covenants under our financing agreements or to obtain necessary consents required thereunder may trigger an event of default which may lead to *inter alia* the imposition of penalties, conversion of debt into equity, termination of our credit facilities, acceleration of all amounts due under such facilities and/or the enforcement of any security provided. Our future borrowings may also contain similar or additional restrictive covenants. Further, during any period in which we are in default, we may be unable to obtain further financing or any refinancing of our debt could be at higher rates of interest with more onerous covenants.

In addition, lenders may be able to sell our assets charged under such financing arrangements to enforce their claims and/or enforce the guarantees issued by certain members by certain members of our Promoter Group on behalf of our Company. For further details, see “*Financial Indebtedness*” beginning on page 225.

**20. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.***

As on March 31, 2021 our Company’s total fund based indebtedness is ₹3,861.81 lakhs. In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favorable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “*Financial Indebtedness*” on page 225 of this Draft Red Herring Prospectus.

**21. *Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company’s profits, thereby affecting our operation and financial condition.***

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the credit worthiness of our customers. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company’s results of operations and financial condition. For the Fiscals ending March 31, 2021, March 31, 2020 and March 31, 2019 our trade receivables were ₹2,834.71, ₹1,319.28 lakhs and ₹ 1,373.01 lakhs, respectively, out of which, debts amounting to ₹3.24, ₹74.32 lakhs and ₹13.86 lakhs were outstanding for a period exceeding six months.

There is no guarantee on the timeliness of all or any part of our customers’ payments and whether they will

be able to fulfill their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

- 22. *Our Company requires significant amount of working capital for a continuing growth. Increase in business activities may be reflected by an absolute increase in the gap between our trade receivables and trade payables, requiring us to arrange for increased working capital limits. Our inability to meet our working capital requirements may adversely affect our results of operations.***

Our business requires a significant amount of working capital. In our business, working capital is often required to finance the purchase of agricultural produce and commodities and for payment of earnest money for participating in government and international tenders. Further, we are also required to meet the export demand and for achieving the same, adequate stocks have to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such demand of the agricultural produce and commodities or stock adequate quantities of the same, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for an agricultural produce or commodity on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults.

All of these factors, including increase in business activities, may widen the absolute gap between trade receivables and trade payables putting strain on our Company's financial resources and may result in increase in the amount of short-term borrowings/ working capital loans. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations. For details of our working capital gap, please refer to the chapter titled — "*Object of the Issue*" on page 78 of this Draft Red Herring Prospectus.

- 23. *We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.***

Our Company seeks to grow its market reach internationally to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Availability of agricultural produce and commodities and logistical challenges in the agro trading industry may prevent us from expanding our presence in other jurisdictions. Further, customers may be price conscious and we may be unable to compete effectively with the price offered by our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

- 24. *Any adverse change in regulations governing our products and the products of our customers, may adversely impact our business prospects and results of operations.***

Regulatory requirements with respect to trading in agricultural products and commodities are subject to change. An adverse change in the regulations governing the trading in agricultural products and commodities, including the payment of minimum support prices and requirement of certification from recognized governmental institutes and agencies for export of agricultural produce and commodities, may be onerous and have an adverse impact on our operations. Our Company may be required to alter our

procurement or distribution process and target markets and incur expenditure to achieve compliance with such new regulatory requirements applicable to us and our customers.

We cannot assure you that we will be able to comply with the regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay procurement and/or export of the agricultural produce and commodities. Moreover, if we fail to comply with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to trade in such agricultural commodities and/or we may be deemed to be in breach of our arrangements with our customers. Consequently, there is an inherent risk that we may inadvertently fail to comply with such regulations, which could lead to forced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for the agricultural commodities we deal in, which may adversely impact our business, results of operations and financial condition.

**25. *There are outstanding litigations involving our Company which, if determined adversely, may affect our business and financial condition.***

As on the date of this Draft Red Herring Prospectus, our Company is not involved in any legal proceedings. However, we cannot assure you that there will not be any legal proceedings involving our Company in the future. In the event there are any legal proceedings involving the Company, we may incur significant expenses in such legal proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. Any adverse decision may adversely affect our business, results of operations and financial condition.

A summary of the pending litigations involving our Company is provided below:

**Cases filed against our Company:**

**26. *Our insurance coverage may not adequately protect us against certain operating risks and this may have as adverse effect on the results of our business.***

Our policies for covering these risks through insurance may not always be effective or adequate. We have not identified every risk and may not be insured against every risk, including operational risk that may occur and the occurrence of an event that causes losses in excess of the limits specified in our policies or losses arising from events or risks not covered by insurance policies or due to the same being inadequate, could materially harm our financial condition and future results of operations. There can be no assurance that any claims filed will be honoured fully or timely under our insurance policies. Also, our financial condition may be affected to the extent we suffer any loss or damage that is not covered by insurance or which exceeds our insurance coverage. In addition, we may not be able to renew certain of our insurance policies upon their expiration, either on commercially acceptable terms or at all. For details on insurance policies taken by our Company please see “*Our Business – Insurance*” on page 100 of this Draft Red Herring Prospectus.

**27. *Our Promoter, Sumitra Devi Khemuka does not have any formal education and documentary evidence of her work experience is not available with our Company.***

Our Promoter, Sumitra Devi Khemuka does not have any formal education. Documentary evidence of her past work experience is not available with our Company. Due to lack of documents and relevant information, we have not disclosed such information in the chapter titled “*Our Promoters and Promoter Group*” as is

required under the SEBI ICDR Regulations. For further details, please refer to the chapter titled “Our Promoters and Promoter Group” on page 143 of this Draft Red Herring Prospectus.

**28. *Our Company does not have any documentary evidence for the educational qualifications of one of our Directors.***

Our Non-Executive Director, Madan Mohan Khemuka is unable to trace his educational certificates. Due to lack of documents and relevant information, we have not disclosed details of his educational qualifications in his biography in the chapter titled “Our Management” as is required under the SEBI ICDR Regulations. For further details, please refer to the chapter titled “Our Management” on page 126 of this Draft Red Herring Prospectus.

**29. *Our success largely depends upon the knowledge and experience of our Promoter, Directors and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.***

Our Company depends on the management skills and guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Managerial Personnel. Some of our Directors have been associated with our Company since inception and have been integral to the growth and in the success of our Company. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Directors or Key Managerial Personnel are unable or unwilling to continue in his/ her present position, it could be difficult for us to find a suitable or timely replacement and our business could be adversely affected. There is significant competition for management and other skilled personnel in the industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages and incentives to such Key Managerial Personnel. In the event we are not able to attract and retain talented employees, as required for conducting our business, or we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and operations may be adversely affected. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled “Our Management” on page 126 of this Draft Red Herring Prospectus.

**30. *We operate in a competitive business environment and our inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.***

The agricultural produce and commodities industry in India is competitive with both organized and unorganized markets. However, we are required to compete both in the domestic and international markets. We may be unable to compete with the prices and products offered by our competitors (local as well as international). We may have to compete with new players in India and abroad who enter the market and are able to offer better quality agricultural commodities. Our competitors may have access to greater financial, marketing, distribution and other resources and more experience in obtaining the relevant regulatory approvals. Increasing competition may result in pricing pressures and decreasing profit margins or loss of market share or failure to improve our market position, any of which could substantially harm our business and results of operations. We cannot assure you that we will be able to compete with our existing as well as future competitors as well as the agricultural commodities prices and payment terms offered by them.

**31. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.***

Our Promoter, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoter, Rakesh Khemka is the Managing Director of our Company and therefore may be deemed to be interested in any remuneration which may be payable to him in such capacity. Our Promoter, Director and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraph titled — the paragraphs titled — “Interest of our Directors” in the chapter titled - “Our Management”, the paragraphs titled — “Interest of our Promoters and Other Interests and Disclosures” in the chapter titled — “Our Promoters and Promoter Group”, “Financial Indebtedness” and

“Restated Financial Information Annexure 36 - Related Party Transactions” on pages 126, 143, 225, 191, respectively of this Draft Red Herring Prospectus.

There can be no assurance that our Promoter, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

- 32. *Our Promoter, Directors and members of our Promoter Group have extended personal guarantees with respect to loan facilities availed by our Company. Further, member of our Promoter Group has provided their property as collateral security for loan facilities availed by our Company. Revocation of any or all of these personal guarantees or withdrawal of such property may adversely affect our business operations and financial condition.***

Our Promoters, Rakesh Khemka; our Non-Executive Director Madan Mohan Khemuka; Mukesh Khemuka, Sweta Khemka and Uma Agro Exports Private Limited, members of our Promoter Group have extended personal guarantees in favour of certain banks with respect to the loan facilities availed by our Company from them. Further, Uma Agro Exports Private Limited, member of our Promoter Group has provided its property as collateral security for the loan availed by our Company.

In the event any of these guarantees are revoked or the properties provided as collateral security are withdrawn, our lenders may require us to furnish alternate guarantees or an additional security or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative guarantees or provide an alternate collateral security in a timely manner or at all. If our lenders enforce these restrictive covenants or exercise their options under the relevant debt financing agreements, our operations and use of assets may be significantly hampered and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations. For further details, please refer to the chapter titled — “Financial Indebtedness” on page 225 of this Draft Red Herring Prospectus.

- 33. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.***

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold [●]% of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company’s best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

- 34. *The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.***

Our Promoter's average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price as may be decided by the Company, in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled “Capital Structure”

on page 63 of this Draft Red Herring Prospectus. The Auditors has certified the average cost of acquisition of shares for the promoters vide their certificate dated September 25, 2021.

**35. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

**36. *We have certain contingent liabilities and our financial condition and profitability may be adversely affected if any of these contingent liabilities materialize.***

As of March 31, 2021, our contingent liabilities and commitments (to the extent not provided for) as disclosed in the notes to our Restated Financial Information aggregated to ₹17.00 lakhs. The details of our contingent liabilities are as follows:

<b>Particulars</b>	<b>Amount</b>
Estimated amount of contracts remaining to be executed on capital account and not provided for	17.00
<b>Total</b>	<b>17.00</b>

(₹ in lakhs)

Further, since the company has failed to take the registration under Employees' State Insurance Act, 1948 since the time it was applicable, there may be additional liability arised on the basis of the assessment, for the employer contribution to be made under the said Act.

For further details of contingent liability, see the section titled — “*Financial Information*” on page 153 of this Draft Red Herring Prospectus. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

**37. *We have in past entered into related party transactions and we may continue to do so in the future.***

As of March 31, 2021, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group and our Subsidiary relating to our operations. In addition, we have in the past also entered into transactions with other related parties. Our Company has entered into related party transactions for the Fiscal ended March31, 2021. For further details, please refer to the chapter titled — “*Restated Financial Information- Annexure 36- Notes to Restated Financial Statements - Related Party Transactions*” at page 191.

While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

**38. *The occurrence of natural or man-made disasters may adversely affect our business, results of operations and financial condition.***

Given the nature of our operations and the mobility required in meeting customer demands, the occurrence of natural disasters, including hurricanes, floods, tsunamis, earthquakes, tornadoes, fires, explosions, pandemic disease and manmade disasters, including acts of terrorism and military actions, may adversely affect our financial condition or results of operations. We are particularly susceptible to accidents, system failures, adverse geological, ecological or weather conditions, natural disasters, demographic and population changes and other unforeseen events and circumstances across India. While we are covered by our insurance policies for such contingencies, any disruptions, damage or destruction of our facilities may temporarily affect our ability to meet our clients' demand and the loss of any one of our key clients or a

significant reduction in demand from clients located in these locations may adversely affect our business, results of operations and financial condition.

**39. *Terrorist attacks, communal disturbances, civil terrorist attacks and other acts of violence or war involving may adversely affect the financial markets and our business.***

Terrorist attacks and other acts of violence or war may negatively affect the markets on which our Equity Shares trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, and adversely affect our business. Some of the locations we operate in have witnessed civil unrest including communal disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events may have a negative impact on us. Such incidents may also create a greater perception that investment in Indian companies involves a higher degree of risk and may have an adverse impact on our business and the price of our Equity Shares. Further, we cannot predict the effects on our business of heightened security measures, threatened terrorist attacks, efforts to combat terrorism, military action against a foreign state or other similar events. It is possible that one or more of these events could be directed at Indian or foreign ports, borders, railroads or highways. Heightened security measures or other events are likely to slow the movement of freight, within or across Indian States and may adversely affect our business and results of operations. Any of these events could also negatively affect the economy and consumer confidence, which could cause a downturn in the transportation industry. In addition, any deterioration in the relations between India and its neighbouring countries may result in investor concern about stability in the region, which may materially and adversely affect the price of our Equity Shares.

**40. *Our Company is subject to foreign exchange control regulations which can pose a risk of currency fluctuations.***

Our Company is involved in various business transactions with international clients and has to conduct the same in accordance with the rules and regulations prescribed under FEMA. Due to non-receipt of such payments in a timely manner, our Company may fail to adhere to the prescribed timelines and may be required to pay penalty to the appropriate authority or department to regularize the payment. Further, our international operations (export sales and imports) make us susceptible to the risk of currency fluctuations, which may directly affect our operating results. In case we are unable to adhere to the timelines prescribed under the applicable laws or are unable to mitigate the risk of currency fluctuation, it could adversely affect our business, results of operations, financial conditions and cash flows.

**41. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.***

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital intensive and we are required to obtain consents from certain of our lenders prior to the declaration of dividend as per the terms of the agreements executed with them. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. There can be no assurance that our Company will declare dividends in the future. For further details, please refer to the chapter titled “*Dividend Policy*” on pages 152, of this Draft Red Herring Prospectus.

**42. *Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.***

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition,

if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

- 43. *Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by any bank or financial institution or any other independent agency and our management will have broad discretion over the use of the Net Proceeds. The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Issue”.***

We intend to use the Net Proceeds of the Issue for the purposes described in “*Objects of the Issue*” on page 78 of this Draft Red Herring Prospectus. The objects of the Issue have not been appraised by any bank or financial institution. Whilst a monitoring agency will be appointed for monitoring utilisation of the Net Proceeds, the proposed utilisation of Net Proceeds is based on current conditions, our business plans and internal management estimates and is subject to changes in external circumstances or costs, or in other financial condition, business or strategy, as discussed in the “*Objects of the Issue*” on page 78 of this Draft Red Herring Prospectus. Based on the competitive nature of our industry, we may have to revise our business plan and/or management estimates from time to time and consequently our funding requirements may also change. Our internal management estimates may exceed fair market value or the value that would have been determined by third party appraisals, which may require us to reschedule our expansion or reallocate our capital expenditure and may have an adverse impact on our business, financial condition, results of operations and cash flows.

Our Company, in accordance with the policies established by the Board from time to time, will have flexibility to deploy the Net Proceeds. Further, pending utilisation of Net Proceeds towards the Objects of the Issue, our Company will have the flexibility to deploy the Net Proceeds and to deposit the Net Proceeds temporarily in deposits with one or more scheduled commercial banks included in Second Schedule of Reserve Bank of India Act, 1939, as may be approved by our Board or IPO Committee. Accordingly, prospective investors in the Issue will need to rely upon our management’s decision with respect to the use of Net Proceeds.

#### **ISSUE SPECIFIC RISKS**

- 44. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a Book Building Process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

- 45. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.***

The Issue Price of the Equity Shares will be determined by our Company in consultation with the BRLM through the Book Building Process. This price will be based on numerous factors, as described under “*Basis for Issue Price*” on page 84 of this Draft Red Herring Prospectus and may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that as an investor you will be able to sell their Equity Shares at or above the Issue Price.

- 46. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.**

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

- 47. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.**

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

- 48. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.**

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

- 49. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.**

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

- 50. QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.**

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Issue Period and withdraw their Bids until Bid/ Issue Closing Date. While our Company is required to complete Allotment pursuant to the Issue within six Working Days from the Bid/Issue Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

- 51. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.***

Our listed Equity Shares will be subject to a daily “circuit breaker” imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares’ circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

- 52. *Any issuance or sale of the Equity Shares by any existing shareholder could significantly affect the trading price of the Equity Shares.***

Any future issuance of Equity Shares by us or the disposal of Equity Shares by any of the major shareholders or the perception that such issuance or sales may occur may significantly affect the trading price of the Equity Shares. There can be no assurance that we will not issue further Equity Shares or that the shareholders will not dispose of, pledge or otherwise encumber their Equity Shares.

- 53. *The Equity Shares issued pursuant to the Issue may not be listed on BSE and NSE in a timely manner, or at all, and any trading closures at BSE and NSE may adversely affect the trading price of our Equity Shares.***

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issuing of Equity Shares to be submitted and there could therefore be a failure or delay in listing the Equity Shares on BSE and NSE. Any failure or delay in obtaining such approval would restrict your ability to dispose of your Equity Shares. BSE and NSE have in the past experienced problems, including temporary exchange closures, broker defaults, settlements delays and strikes by brokerage firm employees, which, if continuing or recurring, could affect the market price and liquidity of the securities of Indian companies, including our Equity Shares. A closure of, or trading stoppage on BSE and NSE could adversely affect the trading price of the Equity Shares.

- 54. *There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.***

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the BRLM, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the BSE, NSE and securities markets elsewhere in the world.

- 55. *The price of the Equity Shares may be highly volatile after the Issue.***

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the agricultural produce and commodities trading industry; adverse media reports on us or the Indian agricultural produce and commodities trading industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies;

and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

**56. *You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.***

The Equity Shares will be listed on the BSE and the NSE. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within six (6) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI. We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all, and any trading closures at the Stock Exchanges may adversely affect the trading price of the equity shares.

## **EXTERNAL RISK FACTORS**

**57. *Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as International Financial Reporting Standards ("IFRS"), which investors may be more familiar with and consider material to their assessment of our financial condition.***

Our restated summary statements of assets and liabilities and restated summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Fiscals 2021 have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules and restated in accordance with the SEBI ICDR Regulations, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of IFRS or any other system of accounting principles on the financial data included in this Draft Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of IFRS or any other accounting principles. IFRS differs in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited.

**58. *Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.***

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products or services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and

liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

**59. *The requirements of being a listed company may strain our resources.***

We are not a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing compliances and reporting requirements to the Stock Exchanges, which require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

Further, as a listed company we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could affect our business, prospects, results of operations and financial condition and the price of our Equity Shares. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely manner.

**60. *A slowdown in economic growth in India could cause our business to suffer.***

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- variations in exchange rates;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including India's neighboring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

**61. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.***

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards (“**ICDS**”), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

- the General Anti Avoidance Rules (“**GAAR**”) have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.
- a comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

**62. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.***

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although

economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

These could include further falls in Stock Exchange indices and greater volatility of markets in general due to the increased uncertainty. These and other related events could have a significant impact on the global credit and financial markets as a whole, and could result in reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the global credit and financial markets. There are also concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

**63. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.***

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

**64. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be

granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, are not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

**65. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favorable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

**66. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.***

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2021 and the Ministry of Finance has notified the Finance Act, 2021 ("**Finance Act**") on March 28, 2021, pursuant to assent received from the President, and the Finance Act will come into operation with effect from March 28, 2021. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. Further, a draft of the Personal Data Protection Bill, 2019 ("**Bill**") has been introduced before the Lok Sabha on December 11, 2019, which is currently being referred to a joint parliamentary committee by the Parliament. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

**67. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.***

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

**68. *We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.***

We are incorporated in India and we conduct our corporate affairs and our business in India. Our Equity Shares are listed on BSE and NSE. Consequently, our business, operations, financial performance and the market price of our Equity Shares will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health crisis in India or in countries in the region or globally, including in India's various neighboring countries;
- hostile or war like situations with the neighboring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies; and
- Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares. For example, our manufacturing facilities are located in western India, hence any significant disruption, including due to social, political or economic factors or natural calamities or civil disruptions, impacting this region may adversely affect our operations.

**69. *Financial instability in other countries may cause increased volatility in Indian financial markets.***

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in

each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The recent outbreak of COVID-19 has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

The SEBI (ICDR) Regulations have permitted the Issue of securities to the public through the Book Building Process. In terms of Rule 19(2)(b)(i) of the Securities Contracts (Regulation) Rules, 1957, as amended (the “SCRR”) the Issue is being made for at least 25% of the post-Issue paid-up Equity Share capital of our Company wherein not more than [●]% of the Issue shall be allocated on a proportionate basis to QIBs. Our Company in consultation with the BRLM may allocate up to [●]% of the QIB portion to Anchor Investors on a proportionate basis at the Anchor Investor Allocation Price in accordance with the SEBI ICDR Regulations, out of which at least one-third will be available for allocation to domestic Mutual Funds, subject to valid Bids being received from domestic Mutual Funds at or above the Anchor Investor Allocation Price. An Anchor Investor shall make a minimum Bid of such number of Equity Shares that the Bid Amount is at least ₹ 1,000 lakhs. In the event that the aggregate demand from Mutual Funds is greater than [●] Equity Shares, allocation shall be made to Mutual Funds proportionately, to the extent of the Mutual Fund Portion. The remaining demand by the Mutual Funds shall, as part of the aggregate

demand by QIBs, be available for allocation proportionately out of the remainder of the Net QIB Portion, after excluding the allocation in the Mutual Fund Portion. However, in the event that the aggregate demand from Mutual Funds is less than as specified above, the balance Equity Shares available for allotment in the Mutual Fund Portion will be added to the Net QIB Portion and allocated proportionately to the QIB Bidders (including mutual funds) in proportion to their Bids. Further not less than [●] % of the Issue shall be allocated on a proportionate basis to Non-Institutional Bidders and not less than [●] % of the Issue shall be allocated on a proportionate basis to Retail Individual Bidders, subject to valid Bids being received at or above the Issue Price.

Subject to valid Bids being received at or above the Issue Price, under-subscription in any category, if any, would be allowed to be met with spill-over from any other category or combination of categories at the discretion of our Company in consultation with the BRLM and the Designated Stock Exchange, on a proportionate basis. However, under subscription, if any, in the QIB Portion will not be allowed to be met with spill over from other categories or a combination of categories.

Bidders are advised to contact the Company Secretary and Compliance Officer and/or the Registrar to the Issue in case of any pre-Issue or post-Issue related problems such as non-receipt of letters of Allotment, credit of Allotted Equity Shares in the respective beneficiary account, non-receipt of funds by electronic mode etc.

In accordance with the SEBI ICDR Regulations, QIBs Bidders (other than Anchor Investors) Bidding in the QIB Portion and Non-Institutional Bidders Bidding in the Non-Institutional Portion are not allowed to withdraw or lower the size of their Bids (in terms of the quantity of the Equity Shares or the Bid Amount) at any stage. Retail Individual Bidders can revise their Bids during the Bid/ Issue Period and/or withdraw their Bids until the Bid/Issue Closing Date. Anchor Investors cannot withdraw their Bids after the Anchor Investor Bidding Date. Further, allocation to QIBs in the QIB Portion will be on a proportionate basis. By submitting a Bid, each Bidder will be deemed to have acknowledged the above restrictions and the terms of the Issue. For further details, refer to the section titled “*Issue Structure*” and “*Issue Procedure*” on pages 247 and 250 respectively, of this Draft Red Herring Prospectus.

Our Company will comply with the SEBI ICDR Regulations and any other ancillary directions issued by SEBI for the Issue. Our Company has appointed the BRLMs to manage the Issue and procure Bids for the Issue.

**The process of Book Building under the SEBI (ICDR) Regulations is subject to change from time to time and the investors are advised to make their own judgment about investment through this process prior to making a Bid or application in the Issue.**

Notwithstanding the foregoing, Bidders should note that this Issue is also subject to obtaining (i) the final approval of the RoC after the Prospectus is filed with the RoC; and (ii) final listing and trading approvals of the Stock Exchanges, which our Company shall apply for after Allotment.

For further details on the method and procedure for Bidding, please see section entitled “*Issue Procedure*” on page 250 of this Draft Red Herring Prospectus.

**Illustration of Book Building Process and Price Discovery Process** (*Investors should note that this example is solely for illustrative purposes and is not specific to the Issue.*)

Bidders can bid at any price within the price band. For instance, assume a price band of ₹20/- to ₹24/- per equity share, Issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centres during the bidding period. The illustrative book below shows the demand for the equity shares of the issuer company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Price(₹)	Cumulative Bid Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to Issue

the desired number of shares is the price at which the book cuts off, i.e., ₹22/- in the above example. The issuer, in consultation with the Book Running Lead Manager will finalize the Issue price at or below such cut-off price, i.e., at or below ₹22/-. All bids at or above this Issue price and cut-off bids are valid bids and are considered for allocation in the respective categories.

<sup>(1)</sup>To be finalized on determination of the Issue Price and updated in the Prospectus prior to filing with the ROC.

### Requirement of Funds and Utilization of Net Proceeds

The Net Proceeds are proposed to be used in the manner set out in in the following table:

Sr. No.	Particulars	Estimated amount
1.	Augmentation of working capital requirements	5,000
2.	General corporate purposes <sup>(1)</sup>	[●]

<sup>(1)</sup>To be finalized on determination of the Issue Price and updated in the Prospectus prior to filing with the ROC. The amount utilised for general corporate purposes shall not exceed 25% of the Gross Proceeds of the Issue.

### Schedule of implementation

We propose to deploy the Net Proceeds for the aforesaid purposes in accordance with the estimated schedule of implementation and deployment of funds set forth in the table below.

Sr. No.	Particulars	Amount to be funded from the Net Proceeds	Estimated Utilisation of Net Proceeds
Fiscal 2022			
1	Augmentation of working capital requirements	5,000	5,000
2	General corporate purposes <sup>1</sup>	[●]	[●]

<sup>1</sup>To be finalized on determination of the Issue Price and updated in the Prospectus prior to filing with the RoC.

The fund requirements, the deployment of funds and the intended use of Net Proceeds as described herein are based on current business plan, management estimates, and other commercial and technical factors. We may have to revise our funding requirements and deployment on account of variety of factors such as out financial and market condition, business and strategy, competition and interest or exchange rate fluctuations and other external factors, which may not be within the control of our management. This may entail rescheduling or revising the planned expenditure and funding requirements, including the expenditure for a particular purpose, at the discretion of our management. Subject

to applicable law, if the actual utilisation towards any of the Objects is lower than the proposed deployment such balance will be used for general corporate purposes to the extent that the total amount to be utilized towards general corporate purposes will not exceed 25% of the gross proceeds from the Fresh Issue in accordance with Regulation 7(2) of the SEBI ICDR Regulations.

In case of a shortfall in raising requisite capital from the Net Proceeds, business considerations may require us to explore a range of options including utilising our internal accruals and seeking additional debt from existing and future lenders. We believe that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in this Issue. To the extent our Company is unable to utilise any portion of the Net Proceeds towards the aforementioned objects, as per the estimated scheduled of deployment specified above, our Company shall deploy the Net Proceeds in subsequent Fiscals towards the aforementioned objects.

Since, our Company is not proposing to set up a project with the proceeds of this Issue, we are not required to make firm arrangements of finance through verifiable means towards seventy five per cent of the stated means of finance.

The above fund requirements are based on our current business plan, internal management estimates and have not been appraised by any bank or financial institution and are based on valid quotations received from vendors and suppliers, which are subject to change in the future. These are based on current conditions and are subject to revisions in light of changes in external circumstances or costs, or our financial condition, business or strategy. For further details of factors that may affect these estimates, see “Risk Factors” on page 22.

#### **Augmentation of working capital requirements**

We fund a majority of our working capital requirements in the ordinary course of business from banks and internal accruals. As on March 31, 2021, our Company has total sanctioned limit of working capital facilities of ₹8500 lakhs, including fund-based and non-fund based limits. For details, see “Financial Indebtedness” on page 225. We propose to utilise ₹5,000 lakhs from the Net Proceeds to fund the working capital requirements of our Company in Fiscal Years 2022.

#### *Basis of estimation of long-term working capital requirement*

The details of our Company’s working capital as at March 31, 2020 and March 31, 2021, derived from the standalone restated financial statements, and source of funding of the same are provided in the table below. Our expected working capital requirements for Fiscal 2022 and 2023 and the proposed funding of such working capital requirements are as set out in the table below;

### GLOBAL OUTLOOK

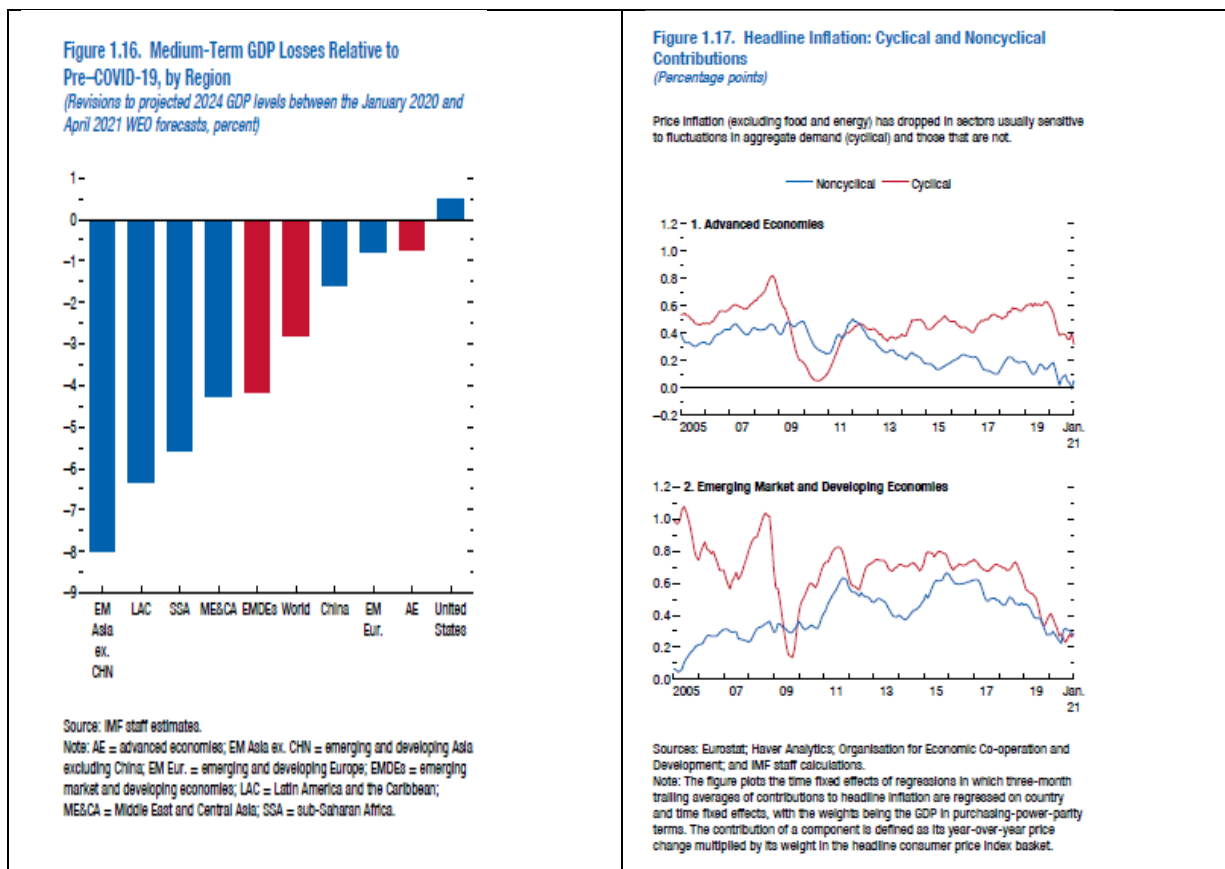

After an estimated contraction of –3.3 percent in 2020, the global economy is projected to grow at 6 percent in 2021, moderating to 4.4 percent in 2022. The contraction for 2020 is 1.1 percentage points smaller than projected in the October 2020 WEO, reflecting the higher-than-expected growth outturns in the second half of 2020 for most regions after lockdowns were eased. The projections for 2021 and 2022 are 0.8 percentage point and 0.2 percentage point stronger than in the previous forecast, reflecting additional fiscal support in a few large economies and the anticipated vaccine-powered recovery in the second half of the year. This pace reflects continued adaptation of all sectors of the economy to the challenging health situation.

The strength of the projected recovery varies across countries, depending on the severity of the health crisis, the extent of domestic disruptions to activity (related to countries’ reliance on contact-intensive sectors), the exposure to cross-border spillovers, and—importantly—the effectiveness of policy support to limit persistent damage.

Beyond 2022 global growth is projected to moderate to 3.3 percent into the medium term. Persistent damage to supply potential across both advanced and emerging market economies and slower labor force growth because of population aging (largely in advanced economies, but also in a few emerging market economies), and necessary rebalancing to a sustainable growth path in China, are all expected to weigh on the growth outlook for the global economy in the medium term. GDP levels are projected to remain well below the pre-pandemic trend path through 2024 for most countries (Figure 1.16).

In advanced economies, occasional regional restrictions will likely be necessary at times to stem the progression of new strains of the virus. As the vulnerable population gets vaccinated, contact-intensive activities are expected to resume and drive a significant pickup in growth thanks to pent-up demand funded by accumulated savings in 2020. Recovery paths also vary within the group. The United States is projected to return to end-of-2019 activity levels in the first half of 2021 and Japan in the second half. In the euro area and the United Kingdom, activity is expected to remain below end-of-2019 levels into 2022. The gaps can be traced back to differences in behavioural and public health responses to infections, flexibility and adaptability of economic activity to low mobility, pre-existing trends, and structural rigidities predating the crisis. With respect to the October 2020 WEO, projections for 2021 have been revised down in Europe and up in Japan and the United States. The downward revision in Europe is more than offset by stronger-than-expected growth in the United States and Japan, reflecting additional fiscal support legislated in both countries at the end of 2020. In addition, the Biden administration’s \$1.9 trillion rescue package is expected to further boost GDP over 2021–22, with significant spillovers to main US trading partners. European countries (for example, Cyprus, Italy, Malta, Portugal, Spain), were able to salvage part of the summer tourist season by reopening in mid-2020. But this was followed by a surge in infections that forced new lockdowns in the last months of 2020, carrying over to 2021. GDP growth for 2022 has been revised up by 0.7 percentage point to 3.8 percent in the euro area and by 1.9 percentage points in the United Kingdom to 5.1 percent. In emerging market and developing economies, vaccine procurement data suggest that effective protection will remain unavailable for most of the population in 2021. Lockdowns and containment measures may be needed more frequently in 2021 and 2022 than in advanced economies, increasing the likelihood of medium-term scarring effects on the potential output of these

countries. Considerable differentiation is expected between China—where effective containment measures, a forceful public investment response, and central bank liquidity support have facilitated a strong recovery—and others. Tourism-based economies within this group (such as Fiji, Seychelles, Thailand) face particularly difficult prospects considering the expected slow normalization of cross-border travel. Recovery profiles vary, based on regional differences in the severity of the pandemic, economic structure (employment and GDP shares of contact-intensive sectors), exposure to specific shocks (for instance, due to reliance on commodity exports), and the effectiveness of the policy response to combat the fallout.

### Inflation Pressure to Remain Contained in Most Countries

As noted, commodity prices (particularly for oil) are expected to firm up further in the months ahead. Given their record-low levels of a year ago, firmer prices should mechanically lift consumer price indices, and headline inflation, in particular, could turn volatile in coming months. The volatility should be short lived. Baseline projections show a return of inflation to its long-term average as the remaining slack subsides only gradually and commodity-driven base effects fade away. The subdued outlook reflects developments in the labor market, where subdued wage growth and weak worker bargaining power have been compounded recently by high unemployment, underemployment, and lower participation rates. Moreover, various measures of underlying inflation remain low. IMF staff analysis on sectoral price developments points to muted price pressure, both in sectors where pricing is typically less sensitive to the business cycle and in sectors where prices tend to respond to aggregate demand fluctuations (Figure 1.17). Trimmed-mean inflation rates (which eliminate extreme price changes from the price distribution every month to filter out underlying inflation and provide slow- moving, unbiased estimates of price pressure) point to declining, not increasing, inflation pressure (Figure 1.18).

Measuring slack has arguably become more difficult during the pandemic as both supply and demand have shifted. Nevertheless, even if output gaps are less negative than currently estimated, the implications for inflation should be relatively moderate. Phillips curves have become flatter in recent years—reflecting various factors, including globalization, automation, rising market concentration, and associated higher monopsony power of firms in labor

markets. For the same reason that inflation did not drop much when output gaps were large and negative during the global financial crisis, inflation is unlikely to increase much—unless output gaps become positive and very large for an extended period of time and monetary policy does not react to rising inflation expectations.

## INDIAN ECONOMY OVERVIEW

The second wave of COVID-19 (in 2021) has spread rapidly worldwide, especially in India, Latin America and the European countries. The global best practices focused on localising mini-containment zones, restricting movement, strengthening health infrastructure and accelerating vaccination drive. In April 2021, the average transmission rate of COVID-19 virus was observed to have dropped in countries with high vaccination rates.

Recognising vaccination as a key pillar of the ‘rapid testing, follow-up, treatment and COVID-19 appropriate behaviour’ strategy, the government started Phase III of the vaccination drive for the 18–45 age group in May 2021. To accelerate the pace of vaccinations for all age groups across states, the government relaxed vaccine access and pricing.

In April 2021, economic recovery moderated due to impact of the second wave of COVID-19; however, outlook for FY22 performance remains favourable considering most high-frequency indicators continued to record growth in FY21 amid COVID-19 challenges.

- For FY22, the government has set a food grain production target at 307.31 million tonnes, an increase of 1.3% YoY, driven by the projected ‘normal’ monsoon.
- Given the rebound of COVID-19 in its second wave, the government decided to distribute food grains to ~80 crore beneficiaries covered by the National Food Security Law of 2013. It offered an additional 5 kg of grains per person per month over and above the regular monthly supplies of food grains for May and June 2021 under the Pradhan Mantri Garib Kalyan Anna Yojana (PM-GKAY).
- In FY21, the Indian government announced PMGKAY-I (April–June 2020) and PMGKAY-II (July–November 2020), under which the FCI (Food Corporation of India) provided 104 LMT wheat and 201 LMT rice to their respective state governments/union territories (UTs).

- Employment demand under the Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS) improved significantly, with 21.2 crore man-days of work (a 50% YoY increase) recorded under the scheme in April 2021.
- In April 2021, the Manufacturing Purchasing Managers' Index (PMI) in India stood at 55.5, improving from 55.4 in March 2021, indicating favourable prospects for the domestic manufacturing sector.
- Power consumption increased 40% in April 2021, indicating sustained industrial and commercial activities.
- In March 2021, strong demand renewal continued, with sales of passenger vehicles and two- and three-wheelers increasing by 115% and 71%, respectively.
- An increase in port traffic and railway freight was recorded, indicating higher industrial development. In March 2021, port traffic grew 16.4% for the fifth month in a row, reflecting sustained expansion of economic activities. In April 2021, railways recorded >10% increase in freight loading.
- Gross GST collections stood at Rs. 141,384 crore (US\$ 19.41 billion) in April 2021.
- As per the provisional data for FY21 on indirect tax collections, net revenue collection stood at Rs. 10.71 lakh crore (US\$ 147.03 billion), an increase of 12.3% YoY.
- E-way invoices is a leading indicator of tax, supply chain correction and logistics growth. Since May 2020, continued recovery of interstate freight transportation has laid a good foundation for economic recovery.
- In April 2021, 5.8 crore e-way bills were issued. In terms of value, e-way bills generation reached Rs. 17.36 lakh crore (US\$ 238.33 billion) in April 2021 as against Rs. 3.9 lakh crore (US\$ 53.54 billion) in April 2020.
- In the fourth quarter of FY21 (as of May 2, 2021), earnings of 213 companies indicated a 15% increase in total sales of the corporate sector, highlighting recovery prospects in the manufacturing industry.
- In the fourth quarter of FY21, income and net sales of these 213 companies increased YoY by 9.5% and 12.8%, respectively.
- In FY21, UPI digital transactions were valued at Rs. 41.0 lakh crore (US\$ 562.88 billion) compared with Rs. 21.3 lakh crore (US\$ 292.42 billion) in FY20. In April 2021, UPI transactions were valued at Rs. 4.93 lakh crore (US\$ 67.68 billion)—recording >3x YoY growth. Also, in terms of volume, UPI transactions increased to 264 crore—more than 2x the volume in April 2020.
- In April 2021, the Indian basket of crude oil reached US\$ 63.1 a barrel, compared with the average crude oil price of US\$ 64.8 a barrel in March 2021, due to the demand build up amid vaccination optimism.
- In April 2021, merchandise exports increased to US\$ 30.2 billion (at 197.0% YoY growth), driven by strong performance from key sectors such as electronic goods, gems & jewellery, engineering, petroleum products, jute, carpet, handicrafts, leather, oil meals, cashew, marine products and chemicals.
- The RBI (Reserve Bank of India) has conducted open market purchases worth Rs. 3.13 lakh crore (US\$ 42.97 billion) in FY21 and Rs. 25,000 crore (US\$ 3.43 billion) in April 2021 to maintain sufficient liquidity in the system.
- Daily net liquidity absorption under the liquidity adjustment facility (LAF) averaged at Rs. 5.8 lakh crore (US\$ 79.63 billion) in April 2021.
- In FY21, foreign portfolio investment (FPI) inflows in India stood at US\$ 36.2 billion (the highest in a decade after FY15).

- As of April 23, 2021, India's foreign exchange reserves stood at US\$ 584.11 billion.

To ensure sufficient liquidity support in India's economic growth, the RBI announced (on April 7, 2021) its plan to extend the TLTRO (Targeted Long-term Repo Operations) on Tap programme for six months until September 30, 2021 and allocate Rs. 50,000 crore (US\$ 6.86 billion) to the All-India Financial Institutions (AIFIs) for FY22.

In addition, the RBI announced new measures on May 5, 2021, as part of a comprehensive calibration strategy for the second wave. These measures are as follow:

- Provision of regular liquidity facilities of Rs. 50,000 crore (US\$ 6.86 billion) to give access to emergency medical services.
- Special long-term repurchase business (SLTRO) of small financial banks (SFB) for Rs. 10,000 crore (US\$ 1.37 billion).
- Loans by Small Finance Banks (SFBs) to MFIs for on-lending delegated Priority Sector loans, boosting credit to MSME entrepreneurs.
- Resolution framework 2.0 for stress assets related to individuals, small businesses and MSME's COVID-19 challenges.
- Rationalise compliance with KYC requirements for the convenience of customers.
- Use floating clauses and counter cycle term buffers and ease state government overdraft limits.

The final budget for FY22 announced by 17 states and UTs indicates an increase of 9.7% in capex expenditures from the FY21 reviewed estimates. Growth in capex expenditure is expected to stimulate revenues and return the economy to high-growth trajectories.

The 28<sup>th</sup> round of services and infrastructure outlook survey (SIOS) conducted by the RBI, from January to March 2021, indicated the respondent's optimism for commercial state and employment conditions for the first and third quarters of FY22. Infrastructure companies also indicated an optimistic outlook for the fourth quarter of FY21 and estimated quick growth in the overall situation of the business.

## **Indian Agriculture Industry Analysis**

### **Introduction**

Agriculture is the primary source of livelihood for about 58% of India's population. Gross Value Added by agriculture, forestry, and fishing was estimated at Rs. 19.48 lakh crore (US\$ 276.37 billion) in FY20. Share of agriculture and allied sectors in gross value added (GVA) of India at current prices stood at 17.8 % in FY20. Consumer spending in India will return to growth in 2021 post the pandemic-led contraction, expanding by as much as 6.6%.

The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry. Indian food and grocery market is the world's sixth largest, with retail contributing 70% of the sales. The Indian food processing industry accounts for 32% of the country's total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth.

Principal agricultural commodities export for April 2020 - January 2021 was US\$ 32.12 billion.

## Market Size

- Coffee export stood at US\$ 742.05 million in FY20.

### **Road Ahead**

India is expected to achieve the ambitious goal of doubling farm income by 2022. The agriculture sector in India is expected to generate better momentum in the next few years due to increased investment in agricultural infrastructure such as irrigation facilities, warehousing and cold storage. Furthermore, the growing use of genetically modified crops will likely improve the yield for Indian farmers. India is expected to be self-sufficient in pulses in the coming few years due to concerted effort of scientists to get early maturing varieties of pulses and the increase in minimum support price.

In the next five years, the central government will aim US\$ 9 billion in investments in the fisheries sector under PM Matsya Sampada Yojana. The government is targeting to raise fish production to 220 lakh tonnes by 2024-25.

Going forward, the adoption of food safety and quality assurance mechanisms such as Total Quality Management (TQM) including ISO 9000, ISO 22000, Hazard Analysis and Critical Control Points (HACCP), Good Manufacturing Practices (GMP) and Good Hygienic Practices (GHP) by the food processing industry will offer several benefits. The agri export from India is likely to reach the target of US\$ 60 billion by the year 2022.

## **Indian Retail Industry Analysis**

Indian retail industry is one of the fastest growing in the world. As per Forrester Research, in 2020, India's retail sector was estimated at US\$ 883 billion, with grocery retail accounting for US\$ 608 billion. The market is projected to reach ~US\$ 1.3 trillion by 2024. India ranked 63 in the World Bank's Doing Business 2020 publication. India ranked 73 in the United Nations Conference on Trade and Development's Business-to-Consumer (B2C) E-commerce Index 2019. India's direct selling industry recorded sales of US\$ 2.47 billion in 2019, improving its rank to 15 from 19 a year before. Consumer spending in India increased to US\$ 245.16 billion in the third quarter of 2020 from US\$ 192.94 billion in the second quarter of 2020.

India is the fifth-largest and preferred retail destination globally. The country is among the highest in the world in terms of per capita retail store availability. India's retail sector is experiencing exponential growth with retail development taking place not just in major cities and metros, but also in tier II and III cities. Healthy economic growth, changing demographic profile, increasing disposable income, urbanisation, changing consumer tastes and preferences are some of the factors driving growth in the organised retail market in India.

Indian online grocery market is estimated to exceed sales of about Rs. 22,500 crore (US\$ 3.19 billion) in 2020, witnessing a significant jump of 76% over the previous year.

According to India Ratings and Research (Ind-Ra), domestic organised food and grocery retailers are expected to increase by 10% YoY in FY22, with organised retailers and e-commerce likely to benefit from the ongoing demand for essentials.

India's population is taking to online retail big way. By 2024, India's e-commerce industry is expected to increase by 84% to US\$ 111 billion, driven by mobile shopping, which is projected to grow at 21% annually over the next four years. In 2020, the most common payment methods online were digital wallets (40%), followed by credit cards (15%) and debit cards (15%). Online penetration of retail is expected to reach 10.7% by 2024 versus 4.7% in 2019.

According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation eased to 4.2% in April 2021, compared with 5.5% in March 2021.

In March 2021, Big Bazaar announced expansion into the instant home delivery service, aiming to offer 2-hour delivery guarantee service; it has started the service in Delhi NCR, Mumbai and Bengaluru.

In April 2021, Flipkart expanded its hyperlocal delivery service Quick to six new cities including Delhi, Gurugram, Ghaziabad, Noida, Hyderabad and Pune as the demand for essential goods on e-commerce platforms surges amid the second wave of the pandemic.

After an unprecedented decline of 19% in the January-March 2020 quarter, the FMCG industry displayed signs of recovery in the July-September 2020 quarter with a y-o-y growth of 1.6%. The growth witnessed in the fast-moving consumer goods (FMCG) sector was also a reflection of positivity recorded in the overall macroeconomic scenario amid opening of the economy and easing of lockdown restrictions.

India is expected to become the world's third-largest consumer economy, reaching Rs. 27.95 lakh crore (US\$ 400 billion) in consumption by 2025. ^Increasing participation from foreign and private players has given a boost to Indian retail industry. India's price competitiveness attracts large retail players to use it as a sourcing base. Global retailers such as Walmart, GAP, Tesco and JC Penney are increasing their sourcing from India and are moving from third-party buying offices to establishing their own wholly owned/wholly managed sourcing and buying offices in India.

The Government of India has introduced reforms to attract Foreign Direct Investment (FDI) in retail industry. The Government has approved 51% FDI in multi-brand retail and 100% FDI in single-brand retail under the automatic route, which is expected to give a boost to Ease of Doing Business and Make in India schemes, with plans to allow 100% FDI in E-commerce. Cumulative FDI inflows in the retail sector stood at US\$ 3.44 billion between April 2000 and December 2020. India's retail sector attracted US\$ 6.2 billion from various private equity and venture capital funds in 2020.

According to the Ground Zero Series findings of the consulting firm RedSeer, the retail sector is expected to recover ~80% of pre-Covid revenue (amounting to US\$ 780 billion) by end-2020. India will become a favourable market for fashion retailers on the back of a large young adult consumer base, increasing disposable income and relaxed FDI norms.

Many fintech companies are competing for their presence in local stores. In May 2020, Paytm announced a US\$ 1 billion loyalty programme and launched online ledger services for kirana stores in India. Other fintech companies such as PayNearby, Phonepe, BharatPe and Mswipe introduced different services for small shop owners, enabling better digital payments and delivery options at these stores. For example, Amazon partnered with local stores to provide a platform for many small shops and merchants on its Amazon marketplace. While, Walmart has its own network of 28 'best-priced' stores serving local stores across the country.

Flipkart Wholesale, a digital B2B marketplace, announced strengthening of its commitment towards growth and prosperity of kiranas and MSMEs by boosting supply chain infrastructure and enhancing employment opportunities. During the online festive sale in October 2020, the Indian e-commerce firms—Flipkart, Amazon, Myntra and Snapdeal—together sold goods worth US\$ 3.1 billion. Online retail rose to record high during the festive season in October-November 2020 with smartphone sales accounting for 53% of the total sales.

### ***Impact of COVID-19 on our business operations***

The current outbreak of COVID-19 pandemic has adversely impacted the global economy. The World Health Organization declared the outbreak of COVID-19 as a public health emergency of international concern on January 30, 2020 and a pandemic on March 11, 2020. The Government of India announced a nation-wide lockdown on March 24, 2020 and imposed several restrictions. Subsequently in view of the second wave of COVID-19, various state governments had imposed a complete lockdown on or about the beginning of May, 2021. However, as we are engaged in import/export and trading of agricultural produce and commodities which are ‘essential goods’, our operations were not shut down during this pandemic. However, due to limited availability of labour, logistics and supply chain constraints, our business were impacted during the initial period of the lockdown. We continued our operations and business activities after making arrangements to meet the government’s requirements on sanitization, people movement and social distancing.

Since, the relaxation of the aforementioned restrictions, our procurement, day to day operations and logistics have become more regular. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in “*Risk Factors – External Risk Factors No. 22 - The outbreak of Novel Coronavirus or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations*” on page 22 of this Draft Red Herring Prospectus. We are continuously monitoring the economic conditions and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business. For more details, see “*Management’s Discussion and Analysis of Financial Condition and Results of Operations – Significant Developments after March 31, 2021 that may affect our results of operations– Estimation of uncertainties relating to the global health pandemic from COVID-19 (COVID-19)*” on page 212 of this Draft Red Herring Prospectus.

## **Our Business Strategies**

### ***Backward Integration***

We import lentils, faba beans, black urad dal and tur dal majorly from Canada, Australia and Burma. We are in process of setting up a procurement office in Australia through a wholly owned subsidiary which will allow us to procure the commodities directly in Australia through such Australian office and dispatch the commodities directly to various other global locations. This move will enable us to save costs like freight and import duties and thereby improving the profitability.

### ***Vessel load procurement***

We generally procure the commodities in a container or by sharing the vessel load. Procurement of commodities through vessel has larger economies of scale as compared to a container. We can save on reduced costs such as freight, duties etc. if the commodities are procured through a vessel. This will in turn result in better profitability for our Company. Our Company is continuously thriving to initiate various steps to reduce the costs attached with procurement of agricultural produce and commodities.

### ***Focusing on increasing the exports***

Our Company primarily exports sugar to Sri Lanka, UAE & Afghanistan and corn to Bangladesh. In the financial years 2021, 2020 and 2019, exports constituted 9.53%, 5.42% and 37.64% respectively of our total income. With the infusion of additional capital, we shall be in a better position to bid and participate in for bigger tenders and as a result export larger quantities than before.

### ***C. Foreign Investment related Laws and Regulations***

Foreign investment in Indian securities is governed by the provisions of the Foreign Exchange Management Act, 1999 (“**FEMA**”) read with the applicable FEM Rules. FEMA replaced the erstwhile Foreign Exchange Regulation Act, 1973. Foreign investment is permitted (except in the prohibited sectors) in Indian companies, either through the automatic route or the government approval route, depending upon the sector in which foreign investment is sought to be made. The DIPP (now DPIIT) makes policy pronouncements on FDI through press notes and press releases which are notified by the RBI as amendments to the FEM Rules. In case of any conflict, the FEM Rules prevail. Therefore, the regulatory framework, over a period of time consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The DIPP (now DPIIT) issued the FDI Policy which consolidates the policy framework on FDI issued by DIPP (now DPIIT), in force on August 28, 2017 and reflects the FDI policy as on August 28, 2017. The FDI Policy consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP (now DPIIT). As per the FDI Policy, FDI up to 100% is permitted in wholesale trading under automatic route and upto 51% is permitted in multi brand retail trading under the government route subject to certain conditions prescribed under FDI policy. As per the Press Note No. 3 of 2020 dated April 17, 2020 issued by the DIPP, has amended the FDI Policy to include restrictions on entities belonging to a country, which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, where they can invest only under the Government route. Foreign investment in India is primarily governed by the provisions of the Foreign Exchange Management Act, 1999 (“**FEMA**”) and the rules, regulations and notifications thereunder, as issued by the Reserve Bank of India from time to time. The RBI, in exercise of its power under the FEMA, has notified the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 by Notification No. FEMA. 395/2019-RB dated October 17, 2019 (“**FEMA Rules**”) to prohibit, restrict, or regulate transfer by or

issue security to a person resident outside India. As laid down by the FEMA Rules, no prior consents and approvals are required from the RBI for Foreign Direct Investment (“*FDI*”) under the “automatic route” within the specified sectoral caps. In respect of all industries not specified as FDI under the automatic route, and in respect of investment in excess of the specified sectoral limits under the automatic route, approval may be required from the RBI. At present, the FDI Policy does not prescribe any cap on the foreign investments in the sector in which the Company operates. The Restated Consolidated Financial Statements has been prepared by the Management to comply in all material respects with the requirements of:

- a) Section 26 of Part I of Chapter III of the Companies Act, 2013 ("the Act");
- b) The Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, as amended ("ICDR Regulations"); and
- c) The Guidance Note on Reports in Company Prospectuses (Revised 2019) issued by the Institute of Chartered Accountants of India (ICAI), as amended (the "Guidance Note").

The accounting policies have been consistently applied by the Group in preparation of the Restated Consolidated Financial Statements and are consistent with those adopted in the preparation of consolidated financial statements for the year ended 31 March 2021. This Restated Consolidated Financial Statements do not reflect the effects of events that occurred subsequent to the respective dates of board meeting on the audited consolidated financial statements mentioned above.

The Restated Consolidated financial statements are prepared and presented under the historical cost convention and evaluated on a going-concern basis using the accrual system of accounting in accordance with the Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Companies Act, 2013, read with Companies (Indian Accounting Standards) Rules, 2015 (as amended) and other relevant provisions of the Act.

The Restated Financial Information also contains the proforma Ind AS financial information as at and for the year ended March 31, 2020, March 31, 2019. The proforma Ind AS financial information have been prepared by making Ind AS adjustments to the audited Indian generally accepted accounting principles (the "Indian GAAP") financial statements as at and for the year ended March 31, 2020, March 31, 2019 as described in Annexure 43 to the Restated Financial Information.

**2. BASIS OF MEASUREMENT**

The Restated Consolidated Financial Statements have been prepared under the historical cost convention.

### **3. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS**

The preparation of Restated Consolidated financial statements in conformity with Ind AS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the consolidated financial statements, and the reported amount of revenue and expenses during the reporting period. The estimates and assumptions used in the accompanying consolidated financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the consolidated financial statements which in management's opinion are prudent and reasonable. Actual results may differ from the estimates used in preparing the accompanying consolidated financial statements. Any revision to accounting estimates is recognized prospectively in current and future periods.

### **4. FAIR VALUE MEASUREMENT**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to / by the Company.

All assets and liabilities for which fair value is measured or disclosed in the restated Consolidated financial statements are categorized within fair value hierarchy, described as follows, based on the lowest level of input that is significant to the fair value measurement as a whole.

Level 1 — Quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the Restated Consolidated financial statements on a recurring basis, the Holding Company determines whether transfers have occurred between levels in the hierarchy by reassessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Fair value of financial instruments measured at fair value through profit and loss and amortised cost.

## **B.2: OTHER SIGNIFICANT ACCOUNTING POLICIES**

### **1. PROPERTY, PLANT & EQUIPMENT**

Items of property, plant and equipment are measured at cost, less accumulated depreciation and accumulated impairment losses.

The cost of an item of property, plant and equipment comprises: (a) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates; (b) any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management; (c) the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

The cost of a self-constructed item of property, plant and equipment comprises the cost of materials and direct labour, any other cost directly attributable to bringing the item to working condition for its intended use.

The cost of improvements to leasehold premises, if recognition criteria are met, are capitalized and disclosed separately under leasehold improvement.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal and retirement of an item of property, plant and equipment is determined as the difference between the sale proceeds and the carrying amount of the asset is recognized in Statement of profit and loss.

### Subsequent cost

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with expenditure will flow to the Group and the cost of the item can be measured reliably. All other subsequent cost are charged to Statement of profit and loss at the time of incurrence.

### Depreciation

Depreciation on PPE is provided on the straight-line method computed on the basis of useful life prescribed in Schedule II to the Companies Act, 2013 ('Schedule II') on a pro-rata basis from the date the asset is ready to put to use. Considering the applicability of Schedule II as mentioned above, the details of estimated life for each category of assets are as under:

Category of assets	Estimated Life (Years)
Motor Car	8 years
Bike	10 years
Plant and Machinery	15 years
Xerox Machine	5 years
Furniture & Fixtures	10 years
Office Equipment	5 years
Computer & Mobile	3 years

The residual values, useful lives and methods of depreciation of property plant and equipment are reviewed by management at each reporting date and adjusted prospectively, as appropriate.

## 2. INVENTORIES

Inventories of finished goods are valued at cost or net realizable value ('NRV'), whichever is lower. Costs of inventories has been determined using weighted average cost method and comprise all costs of purchase after deducting non-refundable rebates and discounts and all other costs incurred in bringing the inventories to their present location and condition. Provision is made for items which are not likely to be consumed and other anticipated losses wherever considered necessary. The comparison of cost and NRV for traded goods is made on at item group level basis at each reporting date.

## 3. LEASES

Lease payments in respect of assets taken on operating lease are charged to the Statement of profit and loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with the expected general inflation to compensate the lessor's expected inflationary cost increases.

## 4. BORROWING COSTS

Borrowing costs attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for

intended use. All other borrowing costs are recognized as an expense in the period in which they are incurred. Capitalization of borrowing costs is suspended during the extended period in which active development is interrupted. Capitalization of borrowing costs is ceased when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete. Other borrowing costs are charged to statement of profit and loss as and when incurred.

## **5. IMPAIRMENT OF ASSETS**

At each reporting date, the Company reviews the carrying amounts of its non-financial assets to determine whether there is any indication of impairment. If any such indication of impairment exists, then the asset's recoverable amount is estimated. For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or cash generating units ('CGU').

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its estimated recoverable amount.

Impairment losses are recognized in the Statement of profit and loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU and then to reduce the carrying amounts of the other assets in the CGU on a pro-rata basis.

For other assets, an impairment loss is reversed only if there has been a change in the estimates used to determine the recoverable amount. Such a reversal is made only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized

## **6. PROVISIONS AND CONTINGENT LIABILITIES AND ASSETS**

### **Provisions**

Provisions are recognized when the Company has a present legal or constructive obligation as a result of a past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

### **Contingent liabilities**

Contingent liabilities are possible obligations that arise from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote.

## **7. EMPLOYEE BENEFITS**

Employee benefit liabilities such as salaries, wages and bonus, etc. that are expected to be settled wholly within twelve months after the end of the reporting period in which the employees render the related service are recognized in respect of employee's services up to the end of the reporting period and are measured at an undiscounted amount expected to be paid when the liabilities are settled.

**Footnotes:**

- i) The Company has not disclosed the fair value of financial instruments such as trade receivables, trade payables, advances, security deposits, other current assets and liabilities etc. because their carrying amounts are a reasonable approximation of fair value.
- c) **Fair value hierarchy:**  
The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of the following three levels:
- i) **Level 1:** Level 1 hierarchy includes financial instruments measured using quoted prices in an active market. This included listed equity instruments, traded debentures and mutual funds that have quoted price. The fair value of all equity instruments (including debentures) which are traded in the stock exchanges is valued using the closing price as at the reporting period. The mutual funds are valued using the closing NAV.
- ii) **Level 2:** Level 2 hierarchy includes financial instruments that are not traded in an active market (for example, traded bonds/ debentures, over the counter derivatives). The fair value in this hierarchy is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level
- ii) **Level 3:** If one or more of the significant Inputs is not based on observable market data, the instrument is included in level 3. Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data. Financial instruments such as unlisted equity shares, loans are included in this hierarchy.
- d) **Valuation technique used to determine fair value**  
Specific valuation techniques used to value financial instruments include:
- a) the use of quoted market prices for the equity instruments
- b) the fair value of the unlisted shares are determined based on the income approach or the comparable mark approach. For these unquoted investments categorised under Level 3, their respective cost has been considered as an appropriate estimate of fair value because of a wide range of possible fair value measurements and cost represents the best estimate of fair value within that range.
- c) the fair value of the remaining financial instruments is determined using the discounted cash flow analysis

(viii) **Disclosures about the Group's ability to continue as a going concern**

The Group has made total comprehensive income of Rs. 1230.54 Lakhs in current year (31 March 2020: 826.15, 31 March 2019: 246.74) and has total other equity of Rs. 4451.02 as at 31 March 2021(31 March 2020: 3248.68, 31 March 2019: 2341.74), which has significantly strengthened the net worth of the Group as at 31 March 2021. Further, the Group's current assets exceeds its current liabilities as at 31 March 2021 by INR 6555.37 (31 March 2020: INR 5114.01, 31 March 2019: INR 3995.84).

Based on financial projections, revised and detailed business strategies, the Group expects growth in its operations and improved operating performance in coming years and also, expects to earn enhanced cash inflows from its operating activities. The Group believes such anticipated internally generated funds from operations in future and its available revolving undrawn credit facilities as at 31 March 2021 and certain other current assets (financial and non-financial) as on date, will enable it to meet its future known obligations due in next year, in the ordinary course of business. Based on the projections, the Group expects to earn cash inflow from operating activities, which can be used to settle liabilities due in the near future.

In view of the same, the management of the Group is of the view of generating sufficient cash flows in the future to meet the Group's financial obligations. Therefore, these restated consolidated financial information have been prepared on a going concern basis

(ix) **Estimation of uncertainties relating to the global health pandemic from Coronavirus (Covid 19)**

The global spread of Covid 19 impacted businesses across all sectors and geographies. As a result, operations of most restaurants and commissaries were affected temporarily in compliance with lockdown announced by the Central Government of India and government of other countries, along with other directives/orders issued by other relevant authorities which resulted in lower sales as compared to previous periods.

The management of the Group has considered all internal and external sources of information, including economic forecasts and estimates from market sources as at the date of the approval of these consolidated financial information in determining its liquidity position for next one year, carrying value of assets comprising property, plant and equipment, right of use assets, inventories, receivables and other current assets as at the balance sheet date.

On the basis of evaluation and current indicators of future economic conditions, the Group has concluded that no material adjustments are required in the consolidated financial information other than those already recognised as of the reporting date. Given the uncertainties associated with nature, condition and duration of Covid 19, the impact assessment on the Group's financial information will be continuously made and provided for as required.

(xi) **First-time adoption of Ind-AS**

**A. Explanation of transition to Ind AS**

The Company's financial statements for the year ended March 31 2021 are prepared in accordance with Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015 in accordance with the accounting policies as set out in Note 1. For the year ended March 31 2020, the company had prepared its financial statements in accordance with Companies (Accounting Standards) Rules, 2006 notified under section 133 of the Act and other relevant provisions of the act (previous GAAP).

The accounting policies as set out in Note 1 have been applied in preparing financial statements for the year ended March 31 2021 including comparative information for the year ended March 31 2020 and the opening Ind AS balance sheet on the date of transition date i.e. April 1 2019.

In preparing its Ind AS balance sheet as at April 1 2019 and in preparing the comparative information for the year ended March 31, 2020, the company has adjusted amounts reported previously in financial statements prepared in accordance with previous GAAP. This note explains the principal adjustments made by the company in restating its financial statements prepared in accordance with previous GAAP, and how the transition from previous GAAP to Ind AS has affected the Company's financial position.

(i) **Exemptions availed on first time adoption of Ind AS**

However, Ind AS 101 allows a first-time adopter to apply the de-recognition requirements in Ind AS 109 retrospectively from a date of entity's choosing, provided that the information needed to apply Ind AS 109 to financial assets and financial liabilities derecognised as a result of past transactions was obtained at the time of initially accounting for those transactions.

The Company has elected to apply the de-recognition provisions of Ind AS 109 retrospectively from the date of transition to Ind AS.

**Impairment of financial assets**

As set in Ind AS 101, an entity shall apply the impairment requirements of Ind AS 109 retrospectively if it does not entail any undue cost or effort. The Company has assessed impairment of financial assets in conformity with Ind AS 109.

### **QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

Market risk is the risk of loss related to adverse changes in market prices, including interest rates and foreign exchange rates. In the normal course of business, we are exposed to certain market risks including foreign exchange rate risk and interest risk.

#### ***Interest rate risk***

Interest rate risk results from changes in prevailing market interest rates, which can cause a change in the fair value of fixed-rate instruments and changes in the interest payments of the variable-rate instruments. Our operations are funded to a certain extent by borrowings. Our current loan facilities carry interest at variable rates as well as fixed rates. We mitigate risk by structuring our borrowings to achieve a reasonable, competitive cost of funding. There can be no assurance that we will be able to do so on commercially reasonable terms, that our counterparties will perform their obligations, or that these agreements, if entered into, will protect us adequately against interest rate risks.

#### ***Foreign exchange rate risk***

Changes in currency exchange rates influence our results of operations. We import certain finished goods, the price of which are denominated in foreign currency, which is mostly the U.S. dollar. Our export sales, are denominated in currencies other than Indian Rupees. Although we selectively enter into hedging transactions to minimise our foreign currency exchange risks, there can be no assurance that such measures will enable us to avoid the effect of any adverse fluctuations in the value of the Indian Rupee against the U.S. Dollar or other relevant foreign currencies.

#### ***Liquidity risk***

Adequate and timely cash availability for our operations is the liquidity risk associated with our operations. We have availed working capital limits for our business operations such as maintaining and operating facility, marketing and sales and enhance existing products and the failure to obtain such capital may adversely affect our growth prospects and future profitability.

#### ***Credit Risk***

We are exposed to the risk that our counterparties may not comply with their obligations under a financial instrument or customer contract, leading to a financial loss. We are exposed to credit risk from our operating activities, primarily from trade receivables. Our customer base majorly has creditworthy counterparties which

limits the credit risk, however, there can be no assurance that our counterparties may not default on their obligations, which may adversely affect our business and financial condition.

### ***General***

Market risk is a collective term for risks that are related to the changes and fluctuations of the financial markets. One actuarial assumption that has a material effect is the discount rate. The discount rate reflects the time value of money. An increase in discount rate leads to decrease in Defined Benefit Obligation of the plan benefits and vice versa. This assumption depends on the yields on the corporate/government bonds and hence the evaluation of liability is exposed to fluctuations in the yields as at the valuation date.

### **An analysis of reasons for the changes in significant items of income and expenditure is given hereunder:**

#### ***1. Unusual or infrequent events or transactions***

As on date, there have been no unusual or infrequent events or transactions including unusual trends on account of business activity, unusual items of income, change of accounting policies and discretionary reduction of expenses.

#### ***2. Significant economic changes that materially affected or are likely to affect income from continuing operations.***

Apart from the risks as disclosed under Section “*Risk Factors*” beginning on page 22, there are no significant economic changes that may materially affect or likely to affect income from continuing operations.

#### ***3. Known trends or uncertainties that have had or are expected to have a material adverse impact on sales, revenue or income from continuing operations.***

Apart from the risks as disclosed under Section “*Risk Factors*” beginning on page 22, in our opinion there are no other known trends or uncertainties that have had or are expected to have a material adverse impact on revenue or income from continuing operations.

#### ***4. Future changes in relationship between costs and revenues***

Our Company’s future costs and revenues will be determined by demand/supply situation, both of the end products as well as the government policies and budget constraints of our customer(s).

#### ***5. Increases in net sales or revenue and Introduction of new products or services or increased sales prices***

Increases in revenues are by and large linked to increases in volume of business and also dependent on the price realisation on our products.

#### ***6. Status of any publicly announced New Products or Business Segment***

Except as disclosed elsewhere in the Draft Red Herring Prospectus, we have not announced and do not expect to announce in the near future any new products or business segments.

#### ***7. Total Turnover of Each Major Industry Segment in Which the Issuer Operates***

Our business is limited to a Trading and marketing of agricultural produce and commodities and is a single reportable segment. Details of the industry turnover and other relevant information is disclosed in the section “*Industry Overview*” beginning on page 90 of this Draft Red Herring Prospectus.

#### ***8. Seasonality of business***

We are impacted by seasonal variations in sales volumes, which may cause our revenues to vary significantly between different quarters in a Fiscal. Typically, we see an increase in our business during the festive periods and various seasons across the globe. Therefore, our results of operations and cash flows across quarters in a Fiscal may not be comparable sequentially and any such comparisons may not be meaningful, or may not be indicative of our annual financial results or our results in any future quarters or periods, see the section titled

“Risk Factors” beginning on page 22.

**9. Any Major Dependence on a single or few suppliers or customers**

The % of contribution of our Company’s customer vis-à-vis the total revenue from operations respectively as on Fiscal 2019, 2020 and 2021 is as follows:

Particulars	Top Customers as a percentage (%) of revenues		
	Fiscal 2021	Fiscal 2020	Fiscal 2019

Top 5	59.67	29.44	32.96
Top 10	67.98	29.77	43.14

**10. Competitive conditions:**

Competitive conditions are as described under the chapters “Industry Overview” and “Our Business” beginning on pages 90 and 100 respectively.

**11. Significant Developments after March 31, 2021 that may affect our results of operations**

There have not arisen, since the date of the last financial statements disclosed in this Draft Red Herring Prospectus, any circumstances which materially and adversely affect or are likely to affect our profitability taken as a whole or the value of our consolidated assets or our ability to pay our liabilities within the next 12 months. For further information, see “Management’s Discussion and Analysis of Financial Condition and Results of Operation”, “Our Business”, “History and Certain Corporate Matters” and “Risk Factors” on pages 212, 100, 120 and 22, respectively.

**Estimation of uncertainties relating to the global health pandemic from COVID-19 (COVID-19):**

The current outbreak of COVID-19 pandemic has adversely impacted the global economy. The World Health Organization declared the outbreak of COVID-19 as a public health emergency of international concern on January 30, 2020 and a pandemic on March 11, 2020. The Government of India announced a nation-wide lockdown on March 24, 2020 and imposed several restrictions. Subsequently in view of the second wave of COVID-19, various state governments had imposed a complete lockdown on or about the beginning of May, 2021. However, as we are engaged in import/export and trading of agricultural produce and commodities which are ‘essential goods’, our operations were not shut down during this pandemic. However, due to limited availability of labour, logistics and supply chain constraints, our business were impacted during the initial period of the lockdown. We continued our operations and business activities after making arrangements to meet the government’s requirements on sanitization, people movement and social distancing.

Since, the relaxation of the aforementioned restrictions, our procurement, day to day operations and logistics have become more regular. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in “Risk Factors – Internal Risk Factors No. 1 - The outbreak of Novel Coronavirus or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations on page 23 of this Draft Red Herring Prospectus. We are continuously monitoring the economic conditions and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business. For more details, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Significant Developments after March 31, 2021 that may affect our results of operations– Estimation of uncertainties relating to the global health pandemic from COVID-19 (COVID-19)” on page 23 of this Draft Red Herring Prospectus.

UPI has been introduced in a phased manner as a payment mechanism with the ASBA for applications by Retail Individual Investors through intermediaries from January 1, 2019. The UPI Mechanism for Retail Individual Investors applying through Designated Intermediaries, in phase I, was effective along with the prior process and existing timeline of T+6 days (“**UPI Phase I**”), until June 30, 2019. Subsequently, for applications by Retail Individual Investors through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCsBs for blocking of funds has been discontinued and only the UPI Mechanism with existing timeline of T+6 days is applicable for a period of three months or launch of five main board public issues, whichever is later (“**UPI Phase II**”), with effect from July 1, 2019, by SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, read with circular (SEBI/HO/CFD/DIL2/CIR/P/2019/85) dated July 26, 2019. Further, as per the SEBI circular (SEBI/HO/CFD/DCR2/CIR/P/2019/133) dated November 8, 2019, the UPI Phase II had been extended until March 31, 2020. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, has decided to continue with the UPI Phase II till further notice. The final reduced timeline of T+3 days for the UPI Mechanism for applications by RIBs (“**UPI Phase III**”) and modalities of the implementation of UPI Phase III maybe notified and made effective subsequently, as may be prescribed by SEBI. The Issue will be undertaken pursuant to the processes and procedures under UPI Phase II, subject to any circulars, clarification or notification issued by the SEBI from time to time. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 as amended pursuant to SEBI circular no. The authorised employees of the Designated Stock Exchange, along with the BRLM and the Registrar, shall ensure that the Basis of Allotment is finalised in a fair and proper manner in accordance with the procedure specified in SEBI ICDR Regulations or as may be prescribed by SEBI from time to time.

#### **Method of allotment as may be prescribed by SEBI from time to time**

Our Company will not make any allotment in excess of the Equity Shares offered through the Issue through the offer document except in case of oversubscription for the purpose of rounding off to make allotment, in consultation with the Designated Stock Exchange. If the aggregate demand in this category is greater than the allocation to in the Retail Portion at or above the Issue Price, then the maximum number of RIBs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIBs by the minimum Bid Lot (“**Maximum RIB Allottees**”).

The Allotment to the RIBs will then be made in the following manner:

1. In the event the number of RIBs who have submitted valid Bids in the Issue is equal to or less than Maximum RIB Allottees, (i) all such RIBs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Portion shall be Allotted on a proportionate basis to the RIBs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).
2. In the event the number of RIBs who have submitted valid Bids in the Issue is more than Maximum RIB Allottees, the RIBs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

### **Allotment to NIBs**

Bids received from NIBs at or above the Issue Price may be grouped together to determine the total demand under this category. The allocation may be made in marketable lots, on a proportionate basis as explained below:

- (a) Bidders may be categorized according to the number of Equity Shares applied for;

- (c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- (d) In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;

- (e) If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid Lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all Bidders in such categories may be arrived at after such rounding off; and
- (f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for Allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. ## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017 has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DIPP issued the Consolidated FDI Policy Circular of 2017 (“**FDI Circular 2017**”), which, with effect from August 28, 2017, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 28, 2017. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2017 will be valid until the DIPP issues an updated circular. The DIPP issued the Standard Operating Procedure (“**SOP**”) for Processing FDI Proposals on June 29, 2017, provides a list of the competent authorities for granting approval for foreign investment for sectors/activities requiring Government approval. For sectors or activities that are currently under automatic route but which required Government approval earlier as per the extant policy during the relevant period, the concerned Administrative Ministry/Department shall act as the competent authority (the “**Competent Authority**”) for the grant of post-facto approval for foreign investment. In circumstances where there is a doubt as to which department shall act as the competent authority, DIPP shall identify the Competent Authority. Further as per the Press Note No. 3 of 2020 dated April 17, 2020 issued by the DIPP, has amended the FDI Policy to include restrictions on entities belonging to a country, which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, where they can invest only under the Government route. Further, a citizen of Pakistan or an entity incorporated in Pakistan can invest, only under the Government route, in sectors/ activities other than defence, space, atomic energy and sectors/activities prohibited for foreign investment.

As per current foreign investment policies, the transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and FEMA and transfer does not attract provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with guidelines prescribed by SEBI / RBI. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB and accordingly, the process for FDI and its approval from the Government of India will now be handled by the relevant ministries or departments, in consultation with the DIPP.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue. The above information is given for the benefit of the Bidders.
