

Principles of Business Management prepares students for the responsibilities of starting and managing a business in today's economic climate. Students will interact with the mechanisms of management systems from the perspective of business leadership, with emphasis on honing their technical toolset to operate effectively in a changing landscape, develop a functional awareness of the economic relationship between finance and marketing, and attain an understanding of what it takes to both start and ethically run an enterprise with organizational goals in mind.

This full year course is applicable to both the Finance and Business Administration programs of study in Indiana in alignment with Perkins V and NLPS requirements and is built to state standards. Students who complete this principles course will be prepared to take the Concentrator A options in either aforementioned pathway.
